Claudia Anthony
[redacted]
Baton Rouge, La. 70805

Dear Ms. Goode:

My name is Claudia Anthony I've lived in Baton Rouge, Louisiana all my life. And through time I have racial discrimination and environmental injustice. As I have said many times these "problems have been ignored and the injustice has not been expored" deeply by you all the Environmental Protection Agency. If it is suppose to be an equal thing, why is my side of town filled with toxic fumes, dense air quality, and sut stabs? When the other side has neighborhood parks, shopping malls, and subburbs. If that's not enough, the university I attend is surrounded toxic plants. On each side of the campus plants have "HACHED". And at the opening gates there is a railroad track that delivers the Naparm to the Nodia plants on the right side of our prestigus campus. But why is it on the "other side" of town at the other University they are known for having the prettiest campus, and some of the oldest "trees". On "my side" "trees" are hard to come by; our trees are frail hanging on tring to live. Ms. Goode soon that's how it will be for us students and the minorities in the surrounding comunities We will be hanging on tring to live if this injustice continues. It's not fair this is killing us and it seems that this "issue has been ignored and the injustice has not been explored". All that I ask of you is to do something about it, something, anything, the best thing! Give us JUSTICE and help stop this environmental Rasism!
