

## **EPA Announces Stakeholder Meetings for Revisions to Methods 325B**

EPA is conducting a series of stakeholder meeting later this winter and into early spring to identify potential revisions to EPA Method 325B. Method 325B (Sampler Preparation and Analysis) describes preparation of sampling tubes, shipment and storage of exposed sampling tubes, and analysis of sampling tubes collected as part of a fence line monitoring work practice program in a number of current and proposed NESHAPs.

These stakeholder meetings will be conducted remotely via Microsoft Teams. If you are interested in participating in the stakeholder calls, please contact Charlotte O'Donnell ([codonnell@scainc.com](mailto:codonnell@scainc.com)) to register. For any additional questions, please contact Ned Shappley ([shappley.ned@epa.gov](mailto:shappley.ned@epa.gov)) or David Berkowitz ([berkowitz.david@epa.gov](mailto:berkowitz.david@epa.gov)).
