To: Ann Goode

Reducing our Civil Rights and allowing more pollutants into the environment is not acceptable.

It is not acceptable to allow the racial make-up of a place to influence the decision of what is an acceptable amount of pollutants to release into the air, water, or any part of the environment.

Pollutants are injurious to the health and well-being of <u>every</u> <u>life</u>.

Do Not allow the EPA to become the agency known for promoting environmental injustice and racism

Do Not allow the EPA to become the agency known for promoting bad health, debilitating illness and the destruction of ourselves and our neighborhoods.

Change Title 6 to reflect our great need for protection from those who would take advantage of any weakness or loophole to make money regardless of the destruction inflicted on others.
