A. Instructions

Important: When filling out forms on the computer, use only the tab key to move your cursor - do not use the return key.

Submission of this Notice of Intent constitutes notice that the entity named at item B1. of this form intends to be authorized by the DEP General Permit issued jointly with EPA for stormwater discharges from the small municipal separate storm sewer system (MS4), in the location identified at item B2. of this form. Submission of the Notice of Intent also constitutes notice that the party identified at item B1. has read, understands and meets the eligibility conditions of Part I.B. of the NPDES Small MS4 General Permit, agrees to comply with all applicable terms and conditions of the NPDES Small MS4 General Permit, and understands that continued authorization to discharge is contingent on maintaining eligibility for coverage. **In order to be granted coverage, all information required on BRP WM 08A, including the Stormwater Management Program Summary and Time Frames form, must be completed. Please read the permit and make sure you comply with all requirements, including the requirement to develop and implement a stormwater management program.**

Measurable Goal: # in Attendance, Public Assistance and Violations

7e. DPW Maintenance, Cleanup and Identification of Illegal Disposals – As discussed in Section 5.6, the DPW will implement maintenance, inspection and disposal programs to ensure that pollutants are minimized or prevented. Illegal disposals will be noted and monitored and fines will be given when necessary.

Timeline: Year 1-5
Responsible Party: DPW/Engineering Department
Measurable Goal: Facilities Maintained, Repaired and Cleaned and Violations Recorded

5.8 Other Permit Requirements and Information
Other permit requirements and information related to the NPDES Regulations are shown below:

Interconnected Municipal Stormwater Systems
The Town of Sandwich will identify, if any, shared stormwater systems with other bordering towns (Barnstable, Bourne and Mashpee) and agencies within Sandwich (e.g., Army Corp of Engineers, MassHighway and Massachusetts Military Reservation). The Town will attempt to work cooperatively with these towns and agencies in an effort to minimize stormwater impacts from interconnected systems.

Water Recharge, Coastal and Wellhead Protection Areas
As described in Section 3.2 (General Areas of Concern) and in Control Measure 5.3, the Town will focus its data collection and improvement efforts on sensitive environmental areas, including water resource, coastal beach and wellhead protection areas. As listed in Section 4.2 (Recent Town Actions), the Town has already installed BMP's in these areas.

Endangered and Threatened Species – Eligibility Criteria
The Town has used the Endangered and Threatened Species List for Barnstable County to determine permit eligibility (see Appendix G). This list includes Piping Plovers, which exist in Sandwich. The Engineering Department and Department of Natural Resources reviewed the known outfall locations in Sandwich and its potential impact on species near these areas. The Town finds that it meets Criteria D of Part I.B.2.e of the permit requirements. To the best of the Towns knowledge and judgement, there is no reason to believe that discharge related activities from the Town of Sandwich will jeopardize the continued existence of any species (e.g., Piping Plovers) or result in the adverse modification or destruction of critical habitat. In fact, based on recent Town drainage improvements, it is likely that water quality in these habitat areas has improved. The Town will continue to monitor and improve water quality in an effort to protect listed species and critical habitats. Additionally, as mentioned in Section 3.2, Cape Cod Commission maps (see Appendix B) identifying rare wetland wildlife and sites for rare species will be reviewed in an effort to prioritize stormwater improvement projects.
