Re:

Correction to Draft Guidance Document "Criteria For Assessing Whether an Ozone Nonattainment Area is Affected by Overwhelming Transport"

In the June 29, 2005, draft of the subject draft guidance document, footnote 9 inadvertently contained the following sentence: "Paragraph (a)(1) indicates an OTA must meet the criteria as specified for rural transport areas under section 182(h) of the CAA; however, EPA is proposing to revise this to allow for an area that meets the section 182(h) criteria--except it is adjacent to a county or counties in an adjacent C/MSA, where the adjacent county/counties is/are designated attainment."

The clause following the semicolon was erroneously included and the entire footnote should read: "Paragraph (a)(1) indicates an OTA must meet the criteria as specified for rural transport areas under section 182(h) of the CAA."
