

Testing your home for radon is easy and inexpensive, and you can do it yourself.

If your test result shows radon levels of 4.0 pCi/L or greater, you should take action.

Consult a radon mitigation professional about installing a mitigation system.

Installation is quick and cost effective and will protect your family.

**High levels of radon can cause lung cancer.
Test. Fix. Save a life. Learn more at [epa.gov/radon](https://www.epa.gov/radon).**
