

Working ~~The~~ Web 2.0 Show

Using Web 2.0 To Improve Getting Work Done

December 11, 2008

Today's Guests

- Evangeline (Evie) Cummings
- Jeremy Ames
- Jeffrey Levy

Background

- Web 2.0 is all about collaboration, communication, and efficiency.
- Harnesses 'the wisdom of crowds' to gather knowledge, capture ideas, and foster networks of people, expertise and opportunities Staff have been using them unofficially for several years.
- Enterprises, both corporate and government, have been struggling with how to get value from these tools in an appropriate and secure manner.
- EPA has officially embraced these tools (beginning with "Flow of the River" and now Greenversations) and is seen a leader in the Federal space.

Web 2.0 Future @ EPA

- OEI currently supports the use of Intranet Wikis and Blogs through hosting at the NCC
- Looking into other Web 2.0 capabilities (from above list) to support EPA business
- Reach out to EPA programs interested in using this new set of tools to carry out their functions
- Based on program needs, deploy new wikis and blogs at EPA
- Continue central support for wikis and blogs in FY2009
- Design, Test, Deploy RSS integration in FY2009
- Explore Web 2.0 integration with the EPA Portal
