

# Table of Contents

Section	Page
1. Introduction.....	1-1
2. Background.....	2-1
2.1 Selection of Health Effects.....	2-1
2.2 Overview of the COI Approach.....	2-3
2.3 COI Literature Review.....	2-3
2.4 Discussion.....	2-4
3. Cost Analysis Data and Methods.....	3-1
3.1 Direct Costs.....	3-1
3.1.1 Medical Costs.....	3-1
3.1.2 Self-Administered Prescription Drug Costs.....	3-3
3.1.3 Nursing Home Costs.....	3-4
3.2 Indirect Costs.....	3-5
3.2.1 Increased Morbidity.....	3-5
3.2.2 Premature Mortality.....	3-6
4. Cost-of-Illness Estimates for Selected Conditions in Older Americans.....	4-1
4.1 Chronic Lung Disease.....	4-1
4.1.1 Direct Costs: Medical.....	4-1
4.1.2 Direct Costs: Self-Administered Prescription Drugs and Nursing Home Care.....	4-1
4.1.3 Indirect Costs: Morbidity.....	4-3
4.1.4 Indirect Costs: Mortality.....	4-3
4.2 Ischemic Heart Disease.....	4-4
4.2.1 Direct Costs: Medical.....	4-4
4.2.2 Direct Costs: Self-Administered Prescription Drugs and Nursing Home Care.....	4-5
4.2.3 Indirect Costs: Morbidity.....	4-6
4.2.4 Indirect Costs: Mortality.....	4-7
4.3 Stroke.....	4-7
4.3.1 Direct Costs: Medical.....	4-8
4.3.2 Direct Costs: Self-Administered Prescription Drugs and Nursing Home Care.....	4-8
4.3.3 Indirect Costs: Morbidity.....	4-9
4.3.4 Indirect Costs: Mortality.....	4-10
4.4 Lung Cancer.....	4-10
4.4.1 Direct Costs: Medical.....	4-11
4.4.2 Direct Costs: Self-Administered Prescription Drugs and Nursing Home Care.....	4-11
4.4.3 Indirect Costs: Morbidity.....	4-12
4.4.4 Indirect Costs: Mortality.....	4-13
4.5 Pneumonia.....	4-13
4.5.1 Direct Costs: Medical.....	4-14

4.5.2	Direct Costs: Self-Administered Prescription Drugs and Nursing Home Care .....	4-14
4.5.3	Indirect Costs: Morbidity .....	4-16
4.5.4	Indirect Costs: Mortality .....	4-16
4.6	Gastrointestinal Illness .....	4-16
4.6.1	Direct Costs: Medical .....	4-17
4.6.2	Direct Costs: Self-Administered Prescription Drugs and Nursing Home Care .....	4-17
4.6.3	Indirect Costs: Morbidity .....	4-18
4.6.4	Indirect Costs: Mortality .....	4-19
5.	Discussion of Results .....	5-1
6.	References .....	6-1
Appendixes		
A:	Summaries of Methods, Data Sources, and Findings by Disease .....	A-1
B:	Detailed Methods for Estimating Missed Work Days and Bed Days Attributable to Stroke, Heart Disease, and Chronic Lung Disease .....	B-1
C:	Annual Medicare Payments in 2000 by Region and State .....	C-1

## List of Tables

Number	Page
1-1	Estimated Aggregate Annual Costs of Illness Among Older Americans for Selected Health Conditions in 2000 (in millions of 2000\$) ..... 1-2
2-1	Selected Health Conditions (by ICD-9 Code) ..... 2-2
4-1	Costs of Illness Associated with Chronic Lung Disease—Estimated Aggregate Costs in 2000 for Individuals 65 and Older ..... 4-1
4-2	Direct Medical Costs Associated with Chronic Lung Disease—Number of Beneficiaries and Average Medical Payments by Type of Service and Age-Gender Category ..... 4-2
4-3	Other Direct Costs Associated with Chronic Lung Disease—Incremental Cost Estimates for Prescription Medications and Nursing Home Services by Age-Gender Category ..... 4-2
4-4	Morbidity-Related Indirect Costs Associated with Chronic Lung Disease—Estimated Annual Per-Person Productivity Losses by Age-Gender Category ..... 4-3
4-5	Mortality-Related Indirect Costs Associated with Chronic Lung Disease—Estimated Aggregate Productivity Losses by Age Category ..... 4-4
4-6	Costs of Illness Associated with Ischemic Heart Disease—Estimated Aggregate Costs in 2000 for Individuals 65 and Older ..... 4-4
4-7	Direct Medical Costs Associated with Ischemic Heart Disease—Number of Beneficiaries and Average Medical Payments by Type of Service and Age-Gender Category ..... 4-5
4-8	Other Direct Costs Associated with Ischemic Heart Disease—Incremental Cost Estimates for Prescription Medications and Nursing Home Services by Age-Gender Category ..... 4-6
4-9	Morbidity-Related Indirect Costs Associated with Ischemic Heart Disease—Estimated Annual Per-Person Productivity Losses by Age-Gender Category ..... 4-6
4-10	Mortality-Related Indirect Costs Associated with Ischemic Heart Disease—Estimated Aggregate Productivity Losses by Age Category ..... 4-7
4-11	Costs of Illness Associated with Stroke—Estimated Aggregate Costs in 2000 for Individuals 65 and Older ..... 4-7
4-12	Direct Medical Costs Associated with Stroke—Number of Beneficiaries and Average Medical Payments by Type of Service and Age-Gender Category ..... 4-8
4-13	Other Direct Costs Associated with Stroke—Incremental Cost Estimates for Prescription Medications and Nursing Home Services by Age-Gender Category ..... 4-9
4-14	Morbidity-Related Indirect Costs Associated with Stroke—Estimated Annual Per-Person Productivity Losses by Age-Gender Category ..... 4-9
4-15	Indirect Costs Resulting from Increased Mortality Associated with Stroke—Estimated Aggregate Productivity Losses by Age Category ..... 4-10

4-16	Costs of Illness Associated with Lung Cancer—Estimated Aggregate Costs in 2000 for Individuals 65 and Older.....	4-10
4-17	Direct Medical Costs Associated with Lung Cancer—Number of Beneficiaries and Average Medical Payments by Type of Service and Age-Gender Category.....	4-11
4-18	Other Direct Costs Associated with Lung Cancer—Incremental Cost Estimates for Prescription Medications and Nursing Home Services by Age-Gender Category .....	4-12
4-19	Morbidity-Related Indirect Costs Associated with Lung Cancer—Estimated Annual Per-Person Productivity Losses by Age-Gender Category.....	4-13
4-20	Mortality-Related Indirect Costs Resulting Associated with Lung Cancer—Estimated Aggregate Productivity Losses by Age Category .....	4-13
4-21	Costs of Illness Associated with Pneumonia—Estimated Aggregate Costs in 2000 for Individuals 65 and Older.....	4-14
4-22	Direct Medical Costs Associated with Pneumonia—Number of Beneficiaries and Average Medical Payments by Type of Service and Age-Gender Category.....	4-15
4-23	Other Direct Costs Associated with Pneumonia—Incremental Cost Estimates for Prescription Medications and Nursing Home Services by Age-Gender Category .....	4-15
4-24	Mortality-Related Indirect Costs Associated with Pneumonia—Estimated Aggregate Productivity Losses by Age Category.....	4-16
4-25	Costs of Illness Associated with Gastrointestinal Illness—Estimated Aggregate Costs in 2000 for Individuals 65 and Older .....	4-16
4-26	Direct Medical Costs Associated with Gastrointestinal Illness—Number of Beneficiaries and Average Medical Payments by Type of Service and Age-Gender Category .....	4-17
4-27	Other Direct Costs Associated with Gastrointestinal Illness—Incremental Cost Estimates for Prescription Medications and Nursing Home Services by Age-Gender Category.....	4-18
4-28	Mortality-Related Indirect Costs Associated with Gastrointestinal Illness—Estimated Aggregate Productivity Losses by Age Category .....	4-19
