

CRASH COURSE!

Mark your calendar for a FREE workshop on best practices in the Collision Repair Industry

You are invited to a FREE workshop on best practices in the Collision Repair Industry. Upon completion, you will receive a certificate of training that complies with the training requirements in the new 6H Surface Coating NESHAP.

The workshop combines training from Design for the Environment (DfE) on best business practices, painter training by the Pacific NW Pollution Prevention Resource Center, a regulatory overview of the 6H Surface Coating NESHAP requirements, and Envirostars registration.

Completing the classroom and hands-on training provided in this workshop satisfies the training requirements in the new surface coating NESHAP and you will receive a certificate documenting your participation.

For more information contact: Ashley Zanolli 206.553.4425
Register via email at: zanolli.ashley@epa.gov

Learn how to SAVE MONEY, reduce waste, protect the health of painters in your shop, and reduce your toxic emissions.

This workshop also includes:

- A painter's perspective on best business practices
- Spray efficiency painter training with tips and techniques to increase transfer efficiency with HVLP guns
- Key chemicals of concern and your exposure
- Managing health and safety
- An overview of new environmental regulations affecting the Collision Repair Industry
- Practices for breathing easy in the mixing room
- Determining the right protective equipment for the job
- Analysis of cost savings associated with best business practices and efficient painting techniques
