

CAA Violations and Deviations⁽⁵⁾ Identified in 2008 - Counts by State

All data combine activities and violations reported by States, Local agencies and EPA.

A State	B Active Major Facilities Universe ⁽¹⁾	C Active Non-Major ⁽²⁾ Universe	D HPV's identified in 2008		E Violations ⁽³⁾ Identified in 2008		F Stack Tests in 2008: Conducted and Failures ⁽⁴⁾				G Facilities with Self-Reported Violations/Deviations ⁽⁵⁾ Based on Title V Annual Compliance Certifications (ACCs) (Majors Only)		
			Majors	Non-majors	Majors	Non-majors	Majors Tested	Majors with Failed Tests	Non-majors Tested	Non-majors with Failed Tests	ACCs Received / Reviewed	Deviations Reported ⁽⁵⁾	Violations Discovered ⁽⁵⁾

Notes:	Totals for Facilities with Inspections and Actions/Events may not be additive because EPA and states can take an activity against the same facility Generally, EPA counts will include activities conducted at facilities on Tribal lands. Facility counts and other data are from 2008 Frozen Data used under the State Review Framework (SRF) - the information may differ from the updated/live data pulled from ECHO or other sources.												
Footnotes:													
1	Active in this report indicates facility is either operating, temporarily closed, seasonally operated or, for columns on activity counts, had one of this activities conducted in FY2008.												
2	Non-major universe is a plain language term for the universe of facilities which are not major (e.g., Synthetic Minor and other minor or area facilities)												
3	Violations are types of noncompliance. They represent "alleged violations" determined from various compliance monitoring activities or self-reporting by the facility and tracked as: compliance status change to one of several "in-violation" or "meeting schedule" such as a commitment to install pollutant control equipment. These alleged violations are agency determinations. They are "alleged" until the facility has an opportunity to adjudicate them in court or acknowledge them as fact.												
4	Stack Tests are performance emissions tests conducted to determine compliance of the source against a permit or regulatory control standard for a CAA regulated pollutant. See the National Stack test Guidance at http://www.epa.gov/compliance/resources/policies/monitoring/caa/stacktesting.pdf .												
5	Title V Operating Permits require sources to submit Annual Compliance Certifications (ACC's) and include: (1) A certification of Continuous or Intermittent Compliance and, if occurred, (2) any deviations from permit requirements or standards. These deviations are not automatically considered violations and must be evaluated on a case-by-case basis because of various waived or allow periods of deviation. Examples include approved Start-up, Shutdown or Malfunction provisions, standards with averaging periods allowing short deviations, etc.)
