

The *Reliable One*®

October 1, 2010

Mr. Craig Dufficy
US Environmental Protection Agency (5304P)
1200 Pennsylvania Avenue, NW
Washington, DC 20460

Dear Mr. Dufficy:

I am writing to respond to the EPA letter the Orlando Utilities Commission recently received from Mr. Mathy Stanislaus concerning the *Request for Information Under Section 104(e) of the Comprehensive Environmental Response, Compensation, and Liability Act, 42, U.S.C.9604(e)-Curtis H. Stanton Energy Center.*

I have reviewed the above mentioned letter. The questions listed therein pertain to a surface impoundment or similar diked or bermed management unit or a management unit designated as a landfill that receives liquid-borne material for the storage or disposal of residuals or by-products from the combustion of coal; including, but not limited to, fly ash, bottom ash, boiler slag, or flue gas emission control residuals. The questionnaire also pertains to any unit that no longer receives coal combustion residues or by-products, but still contains free liquids.

The Curtis H. Stanton Energy Center does not have any units that meet the above criteria. All of the materials placed into our landfill units are considered to be liquid-free by the Paint Filter Liquids Test, Method 9095.

Do not hesitate to contact me if you have any questions or need any additional information.

Sincerely,

Charlie Doud, PE
Environmental Engineer

Cc Garfield Blair, Director Environmental Division
Wade Gillingham, Director Curtis H. Stanton Energy Center
Nick Murrow, Headwaters, Florida Operations Manager

ORLANDO UTILITIES COMMISSION
