

## Address.xls

<b>Code</b>	<b>Name</b>	<b>Description</b>
MAIL	Mailing	Address that is used to send letters and small packages from an external source (e.g., sending a letter via US Mail)
SHIP	Shipping	Address that is used to send packages and/or freight when the mailing address is non-acceptable (e.g., most freight companies will not ship packages to a Post Office Box) - if identical to mailing address, include only the "mailing" address
LOCN	Actual Location	Address that is used to describe the actual location of the related entity (e.g., street address for an office building), may be used to send packages via a courier service
INT	Internal	Address that is used to send packages through internal mail delivery systems (e.g., inter-office mail)
BILL	Billing	Address that is used to send bills and invoices from external sources (i.e., not an internal forwarding address for sending invoices through inter-office mail)
OTHER	Other	Address type is other than one presented in this list
