

## Top 20 On-site Partner List (as of January 5, 2012)

The Top 20 On-site Generation list represents those partners generating and consuming the most green power on-site within the Green Power Partnership. The combined on-site green power consumption of these organizations amounts to more than 663 million kilowatt-hours of green power annually, which is the equivalent amount of electricity needed to power more than 57,000 average American homes each year.
