Subject Correction to Olefins Panel Category Report

On August 16, 2004, the Olefins Panel submitted a final category report for the Low Benzene Naphthas category. Subsequently, the Panel entered data from all its category reports into the HPVIS database. In the process of doing the data entry, it came to our attention that the category report text and summary tables were not consistent. Therefore, we are submitting a revision of the August 2004 category report with corrections that make the text and table consistent. I am also resubmitting the robust summaries, which have not been changed, so you have a complete revised submission for this HPV Challenge Category. The data entered into the hpvis database is consistent with the table in the revised report.

We apologize for any inconvenience.
