RE: Removal of Chemicals That are No Longer HPV

Dear Ms. Browner:

In 1994, Koch Petroleum Group, L.P., formerly known as Koch Refining Company, L.P., Corpus Christi, TX., submitted the following chemical produced in HPV quantities on their IUR report:

6196-95-8 Benzene, 1,2-dimethyl-4-(1-phenylethyl)-

Koch Petroleum Group no longer produces this chemical in HPV quantities. The 1998 IUR submission indicates production of only 569,000 pounds of this chemical. In addition, we believe we are currently the only U.S. producer of this material. We manufacture our product from orthoxylene and the chemical name for CAS RN 6196-95-8 indicates this. This site has no intentions to resume high volume production of the orthoxylene-derived chemical at this time, and do not believe our sponsorship for testing this chemical is warranted.

If we can provide further information with regard to this issue, please feel free to contact us.

Sincerely,

Cliff W. Romin

RE: Release of Documents as Non-CBI
Registrant Number

Dear Ms. Browner:

Koch Industries, Inc. has determined that no claim of confidentiality exists for the following documents that were dated March 10, 1999 and submitted to the Agency.

Copies of the revised letters are enclosed. If we can provide additional information on these documents, please contact me.

Sincerely,

Carol W. Komin

RE: Removal of Chemicals That Are No Longer HPV
Registrant Number

Dear Ms. Browner:

In 1994, Koch Petroleum Group, L.P., formerly known as Koch Refining Company, L.P., Corpus Christi, TX, submitted the following chemical produced in HPV quantities on their IUR report:

[CAS RN 6196-95-8] Benzene, 1,2-dimethyl-4-(1-phenylethyl)-

Koch Petroleum Group no longer produces this chemical in HPV quantities. The 1998 IUR submission for Koch Petroleum indicates production of only 569,000 pounds of this chemical. In addition, we believe we are currently the only U.S. producer of this material. We manufactured our product from orthoxylene, as reflected by the TSCA description for CAS RN 6196-95-8. The site has no intentions to resume high volume production of the substance at this time and do not believe our sponsorship for testing this chemical is warranted.

If we can provide further information with regard to this issue, please feel free to contact us.
