RECEIVED

Ref: HPV Status of CAS Number 65381-09-1

Dear Mr. Auer,

Please note that the above listed product has been inappropriately assigned with regard to CAS Number. The more appropriate description of this product is under **CAS Number 73398-61-5**, which is defined as "**Glycerides, mixed decanoyl and octanoyl**"; the product which we produce is glycerine esterified with commercial C8-C10 fatty acid as opposed to "Decanoic acid, ester with 1,2,3-propanetriol octanoate", which describes the 65381-09-1 listing.

I believe that the correct number (73398-61-5) is included in the SDA glycerides consortium with testing to be completed in 2001.

Please remove Ethox from the HPV list for the referenced number.

Sincerely,

C. V. Hinton
Vice President
