OPPT NCIC

02 FEB -1 AM 10:00

January 31, 2002

Christine Todd Whitman, Administrator
U.S. Environmental Protection Agency
Attention: Chemical Right to Know
P.O. Box 1473
Merrifield, Virginia 22116

I am writing to provide the Agency with a consolidated report of commitments to the ICCA HPV initiative since my letter of August 4, 200. Nearly all of the commitment information presented here was included in attachments to my letters of July 26, 2001, December 20, 2001 and January 17, 2002. However, EPA staff requested that it be provided in a consolidated form.

There are a few instances, noted in the document, where I have repeated commitments previously reported in August 2000. In most cases this is because the chemicals and sponsors involved are still listed as "tentative" commitments by EPA in its October 15, 2001 status report. Those cases are marked in the table as "Was on 2000 list, but reported as tentative." Those tentative designations, among others, should be changed.

I also repeated the commitment to formaldehyde, CAS number 50-00-0. This is because the consortium has been expanded to include the membership of the Formaldehyde, Epidemiology, Toxicology, and Environmental Group, Inc. (FETEG). FETEG had previously sponsored this chemical in the US Challenge Program, but informed EPA that it intended to fulfill its commitment through the ICCA initiative, in cooperation with a previously established international consortium. EPA staff informed the FETEG that I would need to confirm this change.

If there are any questions regarding this information, EPA staff should contact me (703/741-5926, e-mail Fred_McEldowney@americanchemistry.com).

Sincerely,

Frederick C. McEldowney
Chair, ICCA HPV Work Group
