Printed Name: Maureen G. Valente

Title: Town Manager

Date: April 30, 2008

Part II. Self-Assessment

The updating of database information, mapping, and prioritizing actions related to our storm water is ongoing as new drainage structures are added due to new construction or reconstruction projects. Sudbury now requires all plan information to be submitted electronically in a format compatible with our database system. Our Year 5 focus has been on adjusting our tracking system for maximum effectiveness and to adopt a Stormwater Management Bylaw.

DEP has promulgated new stormwater regulations which became effective in 2008. These new Regulations are incorporated into the Sudbury Wetlands Bylaw.

Sudbury is participating in the Massachusetts Environmental Trust-funded MAPC Sustainable Water Resources Project. The goal of working with MAPC is to produce a Stormwater Management Bylaw for review at the 2009 Town Meeting. Although Sudbury has Stormwater Management requirements in our bylaws, we do not have a separate Bylaw. Stormwater systems are managed by the Conservation Commission for sites within wetlands jurisdiction, the Planning Board for new subdivisions and permits under the Water Resource District Bylaw, and the Board of Selectmen through Site Plan Review of commercial and industrial uses. All of these permitting bodies are aware that there is much overlap, however there are still a small number of projects where there is no jurisdiction; e.g. single-family house tear down where the new design results in a major increase in impervious surface on the lot. A separate, updated, Stormwater Bylaw will address these loopholes, incorporate LID designs, and be more visible to homeowners and the development community.

To aid in implementation of this Bylaw, Sudbury is planning to publish a guidebook, checklist, submittal requirements, and design standards. At the present time, we are focusing on enforcement procedures, nutrient removal, and long-term monitoring and reporting requirements. In addition we are looking into a two-tier approach. Developers will be required to identify sub-watersheds and soils within a site and infiltrate runoff as close to pre-development conditions. We also recognize that the majority of our Zone II recharge areas are within built-out commercial or limited industrially zoned sections of town. Adopting extremely costly or otherwise overly burdensome regulations on redevelopment is not practical. To encourage redevelopment, and thereby upgrade the antiquated drainage system currently in place, we will be adopting standards and thresholds which will achieve core improvements to the quality of runoff leaving the site.

Appropriateness of Selected BMP's

Over the past year Sudbury (Conservation, Planning, Board of Selectmen) have been requiring developers to investigate and utilize where practical, Limited Impact Development designs into new and re-developments. New development designs are no longer looking at "end-of-pipe" design. We believe a BMP is effective only if it is maintained to function as designed. Therefore with equal or greater pollutant removal and infiltration capabilities, the best BMP is one which needs the least maintenance to continue to treat runoff to the design goals.

Much of our infrastructure is aging, particularly culverted roadway crossings. With our new drainage monitoring database system, we can prioritize the repairs or replacements. In 2007 a total of four piped culverts were removed and replaced with box culverts with a wider stream span

to allow the natural channel to flow unimpeded. The bottom of the box culverts were installed below grade with the stream substrate replaced within the span.

Our monitoring program identified 10 roadways where catch basins within those public ways were repaired, replaced, or retrofitted with hooded sumps. The street sweeping program is ongoing. All public ways are swept April through May of each year.

PROGRESS TOWARDS ACHIEVING MEASURABLE GOALS

Year V Measurable Goals:

Public Education and Outreach:

Sudbury again contracted for Year V with the SuAsCo Watershed Community Council to provide both the Public Education and Outreach and the Public Involvement and Participation components of the Year V permit requirements. A “Stormwater Ad Campaign” with seven ads covering a variety of stormwater topics will be distributed. We have received the materials as of April 29th. Posters, post-cards, website information, and cable television ads, and a press release will be part of this public educational endeavor. There are seven advertisements, each one addressing a different topic: what is stormwater, storm drains, litter, lawn care, pet waste, car care, and Low Impact Development (LID).

Public Participation and Involvement

The Ponds & Waterways Committee, established in 2005, has a mission to inventory, assess, prioritize, and develop management options as part of a Waterway Master Plan. With some funding assistance from the River Stewardship Council, the PWC has been mapping all the waterways in Sudbury. Preliminary maps can be viewed on the town website at www.sudbury.ma.us under the Ponds and Waterways Committee link to their documents. Water quality will be a major component of the Waterway Master Plan.

Illicit Discharge Detection and Elimination

The town-wide catch basin sampling program is the one area where we are having difficulty. Limited time and personnel to collect samples has been the major obstacle. In October 2007 the Town hired a full-time Conservation/Board of Health Technical Assistant. Due to the time of year the position was funded catch basin samples have not yet been collected. We anticipate making the catch basin sampling a priority for this position over the next four to six months.

Construction Site and Post-Construction Runoff Control

The Town’s practice of requiring pre-application meetings continues and include all projects that disturb greater than one acre; are a new subdivision; are a commercial or business project requiring Selectmen Site Plan Review; or trigger new or revised storm water design or structures

Sudbury requires the SWPPP (Storm water Pollution Prevention Plan) to be submitted to the Town for review and approval prior to the start of construction under the Planning Board and Conservation Commission permits. Larger projects are now required to hire an erosion control monitor

to ensure the effectiveness the methods of site stabilization. Two large projects had an environmental monitor on site weekly and after each rain storm.

Pollution Prevention/Good Housekeeping

The Noyes School septic system was flagged as a pollutant generator due to the design and location of the septic system leach field in the water table and in close proximity to a pond. As a result, the pond and groundwater is degraded in this area.

A total of 500 catch basins (25% of total) were cleaned during 2007. This is an ongoing process and we have hired a private cleaning service at a cost of over \$15,000 to clean catch basins. We have over 2,000 structures to inspect routinely and clean as needed.

As mitigation for work within 100' of wetlands, the Conservation Commission continues to require developers to install or upgrade drainage structures in existing roads along the project frontage. Drainage upgrades by private developers or the Town, under the direction of the DPW Department, is in process on Landham Road, Old County Road, and Old Framingham Road.

Drainage structure repairs were performed on Victoria Road, Brewster Road, Hawthorn Drive, Union Avenue, Warren Road, Concord Road, Haynes Road and continue from 2006 on August Rd., and Dutton Rd.

Street sweeping is currently underway will be completed by May 1. The Town has spent \$41,305 for street sweeping.

Activities for Next Reporting Cycle

Although at this time the requirements for future reporting are unknown, the Town will continue to perform the following activities:

- Continued sampling of catch basins for illicit discharge detection as prioritized by the Board of Health.
- Continued operation and maintenance of drainage structures in accordance with the new database schedule.

Funding sources for the continued success of the Program will be sought;

- The Stormwater Management Bylaw will be presented to Town Meeting.
- Work closely with the Ponds & Waterways Committee to identify areas where joint water quality goals can be achieved.
- The Planning Board is investigating a revision of our Earth Removal Bylaws for 2009 Annual Town Meeting. A review of site stabilization procedures brought to the town's attention the need to have regulatory control over large earth removal projects that were not part of a subdivision plan or within wetlands jurisdiction.

Part IV. Summary of Information Collected and Analyzed

Sudbury feels very confident at this point that we know what we have in Town for stormwater structures. We have a complete inventory under constant updating. The maintenance tasks are prioritized. Equipment is available for the necessary tasks. Areas suitable for design upgrades for more effective pollutant removal and infiltration are identified. Our new Stormwater Management Bylaw is in process.

Our analysis indicates that the area needing the greatest focus now is in illicit discharge detection and follow-up. The new Technical Assistant position will allow us to begin an organized catch basin sampling program, provided funds are available for the necessary laboratory work. Sudbury's override did not pass the election this year. The Board of Health budget is reduced for FY2009. We will be seeking funding sources for the testing, however, budget cuts are likely to have an impact on this program.

Part V. Program Outputs & Accomplishments (OPTIONAL)

(Since beginning of permit coverage unless specified otherwise by a **, which indicates response is for period covering July 1, 2007 through March 31, 2008)

Programmatic

	(Preferred Units)	Response
Stormwater management position created/staffed * new Cons/Health Technical Asst. for site monitoring	(y/n)	Y*
Annual program budget/expenditures **	(\$)	\$36,000
Total program expenditures since beginning of permit coverage	(\$)	\$36,000
Funding mechanism(s) (General Fund, Enterprise, Utility, etc)	Gen. Fund	Gen. Fund

Education, Involvement, and Training

Estimated number of property owners reached by education program(s)	(# or %)	5,500
Stormwater management committee established	(y/n)	Y
Stream teams established or supported	(# or y/n)	Y
Shoreline clean-up participation or quantity of shoreline miles cleaned **	(y/n or mi.)	9.4mi
Shoreline cleaned since beginning of permit coverage	(mi.)	9.4
Household Hazardous Waste Collection Days		
▪ days sponsored **	(#)	1

▪ community participation **	(# or %)	229 people
▪ material collected **	(tons or gal)	1,995 gallons
School curricula implemented	(y/n)	

Legal/Regulatory

	In Place Prior to Phase II	Reviewing Existing Authorities	Drafted	Draft in Review	Adopted
Regulatory Mechanism Status (indicate with "X")					
▪ Illicit Discharge Detection & Elimination		X			
▪ Erosion & Sediment Control	X				
▪ Post-Development Stormwater Management	X				
Accompanying Regulation Status (indicate with "X")					
▪ Illicit Discharge Detection & Elimination					
▪ Erosion & Sediment Control	X				
▪ Post-Development Stormwater Management	X				

Mapping and Illicit Discharges

	(Preferred Units)	Response
Outfall mapping complete	(%)	100
Estimated or actual number of outfalls	(#)	706
System-Wide mapping complete (complete storm sewer infrastructure)	(%)	100
Mapping method(s)		
▪ Paper/Mylar	(%)	
▪ CADD	(%)	100
▪ GIS	(%)	100
Outfalls inspected/screened **	(# or %)	25%
Outfalls inspected/screened (Since beginning of permit coverage)	(# or %)	100% attached
Illicit discharges identified **	(#)	2

Illicit discharges identified (Since beginning of permit coverage)	(#)	4
Illicit connections removed **	(#); and (est. gpd)	2
Illicit connections removed (Since beginning of permit coverage)	(#); and (est. gpd)	2
% of population on sewer	(%)	0
% of population on septic systems	(%)	100

Construction

	(Preferred Units)	Response
Number of construction starts (>1-acre) **	(#)	33
Estimated percentage of construction starts adequately regulated for erosion and sediment control **	(%)	100
Site inspections completed ** Victoria: same as #1 above	(# or %)	100
Tickets/Stop work orders issued **	(# or %)	3
Fines collected **	(# and \$)	0
Complaints/concerns received from public **	(#)	5

Post-Development Stormwater Management

Estimated percentage of development/redevelopment projects adequately regulated for post-construction stormwater control	(%)	99%
Site inspections (for proper BMP installation & operation) completed **	(# or %)	99%
BMP maintenance required through covenants, escrow, deed restrictions, etc.	(y/n)	Y
Low-impact development (LID) practices permitted and encouraged	(y/n)	Y

Operations and Maintenance

Average frequency of catch basin cleaning (non-commercial/non-arterial streets) **	(times/yr)	1
Average frequency of catch basin cleaning (commercial/arterial or other critical streets) **	(times/yr)	1
Qty of structures cleaned ** *represents publically maintained structures	(#)	500*

Qty. of storm drain cleaned **	(%, LF or mi.)	600 LF
Qty. of screenings/debris removed from storm sewer infrastructure **	(lbs. or tons)	1,116 tons
Disposal or use of screenings (landfill, POTW, compost, beneficial use, etc.) **	(location)	DPW
Basin Cleaning Costs		
• Annual budget/expenditure (labor & equipment)**	(\$)	10,000
• Hourly or per basin contract rate **	(\$/hr or \$ per basin)	\$25/Basin
• Disposal cost**	(\$)	N/A
Cleaning Equipment		
• Clam shell truck(s) owned/leased	(#)	1
• Vacuum truck(s) owned/leased	(#)	1
• Vacuum trucks specified in contracts	(y/n)	N
• % Structures cleaned with clam shells **	(%)	20
• % Structures cleaned with vactor **	(%)	10

	(Preferred Units)	Response
Average frequency of street sweeping (non-commercial/non-arterial streets) **	(times/yr)	1/yr
Average frequency of street sweeping (commercial/arterial or other critical streets) **	(times/yr)	1/yr
Qty. of sand/debris collected by sweeping **	(lbs. or tons)	1,500 Tons
Disposal of sweepings (landfill, POTW, compost, beneficial use, etc.) **	(location)	DPW
Annual Sweeping Costs		
• Annual budget/expenditure (labor & equipment)**	(\$)	42,000
• Hourly or lane mile contract rate **	(\$/hr. or ln mi.)	\$70/hr
• Disposal cost**	(\$)	N/A
Sweeping Equipment		
• Rotary brush street sweepers owned/leased	(#)	4
• Vacuum street sweepers owned/leased	(#)	0
• Vacuum street sweepers specified in contracts	(y/n)	N
• % Roads swept with rotary brush sweepers **	%	100

• % Roads swept with vacuum sweepers **	%	0
