<b>Note 1</b>	<b><i>What is “compliance assistance?”</i></b> EPA’s compliance assistance includes activities, tools or technical assistance that provides clear and consistent information to help regulated entities understand and meet their obligations under environmental regulations; or to help compliance assistance providers aid the regulated community in complying with environmental regulations. EPA’s compliance assistance may also help regulated entities find cost effective ways to comply with regulations and/or go “beyond compliance” through the use of pollution prevention, environmental management practices, and innovative technologies, thus improving their environmental performance. To be counted as a compliance assistance project or activity, at least one objective must be related to achieving or advancing regulatory compliance.
<b>Note 2</b>	<b><i>What are "Assistance Tools?"</i></b> Compliance assistance tools include materials such as compliance booklets, instructional DVD’s, brochures, web sites and newsletters.
<b>Note 3</b>	<b><i>What are Workshops &amp; Training?</i></b> Compliance assistance workshops and training events for the regulated community and assistance providers.
<b>Note 4</b>	<b><i>What are Facility Visits &amp; Re-visits?</i></b> EPA helps owners and operators to comply during facility visits. On-site assistance visits were conducted on a variety of subjects, including keeping drinking water safe on tribal lands, reducing lead paint risk, and protecting students from chemical exposure.
