National Enforcement Trends (NETs) Metadata

NETs Page I-6: FY 2006 - FY 2010 Overall Contribution of National Initiatives to EPA's Annual Results	
Note 1	Investigations are reported manually by the EPA regions via the mid-year and end-of-year certification process (see note 2 for exception).
Note 2	Starting in FY 2005, Clean Air Act (CAA) Stationary Source investigation data has been obtained from the Air Facility System (AFS) data base.
Note 3	Prior FY dollar figures in this document are adjusted to reflect the value in FY 2010 dollars based on the average fiscal year value of the U.S. Department of Labor Consumer Price Index for All Urban Consumers.
Note 4	Some national enforcement initiative totals may be double counted as a result of some cases having two national initiatives selected in the database.
Definitions	An investigation is a more complex assessment of a facility's compliance status than a compliance inspection defined through specific media guidance. Inspections typically assess facility compliance broadly. Investigations, on the other hand, generally focus on certain aspects of a facility's operations or on a predetermined set of compliance concerns, and do so in substantially more depth than an inspection. Investigations involve considerably more time (more than 1 day) and resources to complete. Typically, an investigation is initiated in one of two ways: 1) based on information discovered during an inspection, or 2) as the result of an overall industry sector initiative or specific regulatory or statutory area. An October 26, 1998 memo titled MOA Guidance (Air Program) Clarification and NPMS Pilot describes the CAA investigation in greater detail.
Definitions	The definitions of Inspections and Evaluations can be found at: http://www.epa.gov/compliance/monitoring/inspections/index.html .
