\*Unless otherwise specified, the fee is per use and the fee is to be multiplied by the number of new uses. The number of uses is tracked in the Agency's tracking system using a decimal to reflect the number of uses requested, i.e. one use – R170, three uses – R170.3, etc.

\*\*In the Agency's tracking system, one amendment will be listed with the PRIA category and the other associated amendments will be tracked as .0's to indicate no fee associated with the amendment, i.e. R170 and R170.0.

\*\*\*The fee for the new product is the greatest of 25% of the final new use fee or the application's fee if the new use(s) had been registered. If three uses are being requested in an application, the fee for the application will be three times the new use fee shown in the table, which is termed the "final new use fee". The fee for each new product submitted with this request is 25% of the "final new use fee". All amounts are rounded up to the nearest whole dollar. If the new product application also includes a request to approve an inert, the fee will be reduced to the greatest of 25% of the "final new use fee" or the fee of the appropriate new product category.

Examples –

1. A new non-food indoor antimicrobial use is requested. The package consists of one amendment and one new product registration application with chemistry and acute toxicology data.

Description of item	Item Fee (\$)	Tracking Code
Amendment to add single new use to registered label	11,577	A500
New Product	4,631	A500.1
Total Fee	16,208	

2. One conventional food use requested - The package consists of three label amendments; an application for a new product label for the new requested use (with product chemistry and acute tox data); and another new product that requires approval of a new food-use inert to be registered.

Description of item	Item Fee (\$)	Tracking Code
Amendment to add use to registered labels	59,976	R170
Other Amendments to add use to registered labels	0.00	R170.0
New Product	14,994	R170.1
New Product with inert approval	17,133	R170.1
Total Fee	92,103	

3. Example 2 with 3 new conventional food uses.

Description of item	Item Fee (\$)	Tracking Code
Amendment to add 3 uses to registered labels	179,928	R170.3
Other Amendments to add 3 uses to	0.00	R170.0

registered labels		
New Product	44,982	R170.1
New Product with inert approval	44,982	R170.1
Total Fee	269,892	

4. The application package contains applications to register 3 products that are a mixture of a conventional new active ingredient (K) and a registered conventional active ingredient (L). The 8 proposed food uses are not registered for either active ingredient. Also requested are more than six rotational crop tolerances for the registered active ingredient.

Description of item	Item Fee (\$)	Tracking Code
New active ingredient – food use application for K	569,221	R010
8 new uses for L (only new products – one product included)	359,856	R190
New Product for L	89,964	R190.1
New Product for L	89,964	R190.1
6 rotational crop tolerances for L	359,856	R296
Total	1,468,861
