## e-Submission Help Desk Support

In preparation for the upcoming release of our e-Submission Project, the Environmental Protection Agency's (EPA) Office of Pesticide Programs (OPP) is offering help desk support that will assist registrants with the creation of the electronic submission (referred to as "e-Submission") eXtensible Markup Language (XML) package. Please utilize the resources we have provided to support your technical needs.

# 1 Introduction

The purpose of this guidance document is to provide registrants instructions for constructing an XML file and submitting the documents to the Agency electronically.

The e-Submission application allows users to upload zip files (including electronic submission of information in response to EDSP orders) containing digitized versions of their submission documents (i.e., studies, labels, and forms, Acceptance Review Report, etc). The zip file will also contain a XML file that describes the submitted document using the prescribed schema adopted from Canada's Pest Management Regulatory Agency (PMRA). Once EPA receives the files from the registrant, the e-Submission system will unzip the files, parse the XML, perform several validation checks, and store the package and document in the database records.

## 2 XML File Creation & Submission Instructions

**Note:** the Alternative for creation of an electronic package is using eDossier Builder application developed by EPA.

Registrants can create a XML file by using a XML file creation application (i.e., Notepad, Microsoft Word, etc.) as described below.

### 2.1 XML File Creating Application

Follow the steps listed below to create and submit the XML file using a XML file creation application (i.e., Notepad, Microsoft Word, etc.).

1. Create the XML file using one of the following applications:
  - Notepad
  - Microsoft Word
  - Text Editor
  - XML Editor (i.e., XMLSpy, XML Notepad).
2. Save the XML file using a file naming convention that contains the prefix “e-PRISM.” Examples of the file naming convention are provided below.
  - e-PRISMXXXX.xml
  - e-PRISM.xml
  - e-PRISMXXsampleXX.xml
3. Alter the XML with the required EPA specific metadata fields and data types, which are provided in Appendix A. Additionally, a detailed sample XML file containing all the required fields is provided in Appendix B. (Please note that the EDSP metadata fields are marked as ‘’).
4. Group all pertinent forms, studies, labels, and payment receipts associated into one submission. Use a file compression application (i.e., WinZip) for combining all the relevant documents for the submission.
5. Use a separate zip file for each submission. For example, if you are applying for a New Registration and an Amendment to an existing registration, create two separate zip files. For EDSP, it will be one submission per EDSP order.
6. Save the file to a DVD/CD.
7. Place a label on the DVD/CD. The label should provide the following information:
  - EPA company number
  - EDSP Number
  - Contact information
  - Name of chemical
  - Date when the DVD/CD is mailed
  - Brief description of the contents provided on the DVD/CD

8. Deliver the labeled DVD/CD to EPA for EDSP orders and electronic submissions:

A. For EDSP or Consortium Order

**Document Processing Desk (E-Sub PRD-EDSP)**  
**U.S. EPA - Office of Pesticide Programs S-4900**  
**2777 S. Crystal Drive**  
**Arlington, VA 22202**

B. For eSubmission

**Document Processing Desk (E-Sub)**  
**U.S. EPA – Office of Pesticide Programs S-4900**  
**2777 S. Crystal Drive**  
**Arlington, VA 22202**

## Appendix A: Metadata Field Description & Data Type

e-Submission XML Guidance Document v2.0 The “Data Type/Enumeration /Format” provided in the table below is the standard used by the Office of Pesticide Programs Information Network (OPPIN). Please ensure the necessary changes are made when converting the file from the PMRA e-index format to the format accepted by EPA e-Submissions.

**Detail description of content categories described under US\_MD12:**

<b>Code</b>	<b>Nature of Document</b>
01	Complete primary reports of the author's experimental research, including discussions of materials and , methods, results and conclusions
02	Incomplete or summarized primary reports of the author's experimental research, missing one or more of the elements listed for code 01
03	Complete primary reports of the author's survey or monitoring research including discussions of methods, results, and conclusions. This category is for non-experimental research, and will usually be associated with such fields as economics, use practices , epidemiology, environmental monitoring, etc.
04	Incomplete or summarized primary reports of the author's survey or monitoring research, missing one or more of the elements listed for code 03
05	Complete reports of case studies performed by the author. This category is distinguished from 03/04 survey research; case studies are reactive investigations of incidents. This category will be associated with such data as medical investigations of accidental or intentional poisonings, investigations of wildlife kills, of spills etc. There is no corresponding category for uninvestigated reports; these will be treated as news reports.
06	Complete reports of experimental, survey, or analytical methods, where the emphasis is on the method itself rather than on the results of its application. If a method is discussed in the same document as result of it use, use codes 01-05
11	Secondary reports of research attributed to others. When the reported research is not that of the author, either code 11 or 12 is appropriate. When data reported or conclusions drawn are supported by cited primary references, use code 11. These reports may be broad pr narrow in scope, and may review experimental or non experimental research.
12	Unattributed secondary reports or summaries of research data or conclusions, not supported by cited primary references. These may take such form as " fact sheets" or technical specifications, or assertions of scientific facts or conclusions by reputable companies or scientists
21	News reports from the scientific press. These are distinguishable from code 12 by emphasis on events rather than research results.
22	News reports from popular or trade media
23	Opinion or commentary from interested groups or their representatives. In this context ,interested groups would include registrant firms, associations in the regulated community, government agencies, environmental groups, etc
24	Opinion or commentary from individuals. This may be either favorable or adverse comment about a pesticide, and includes comments received in response to proposed regulatory actions. If affiliation of author with an interested group is mentioned but the comment is not made on behalf of the group, use code 24 rather than 23
31	Patents, either U.S. or foreign
32	Legal and regulatory documents including laws, judicial opinions or orders, briefs , hearing records, official notices, regulations, etc whether U.S. or foreign
41	Bibliographies, when free-standing and not a part of a document falling into another category
42	General reference works, or portions thereof
