

### Predicting Adsorption on Quartz with Vapor Pressure

### Predicting Adsorption on Quartz with a LSER

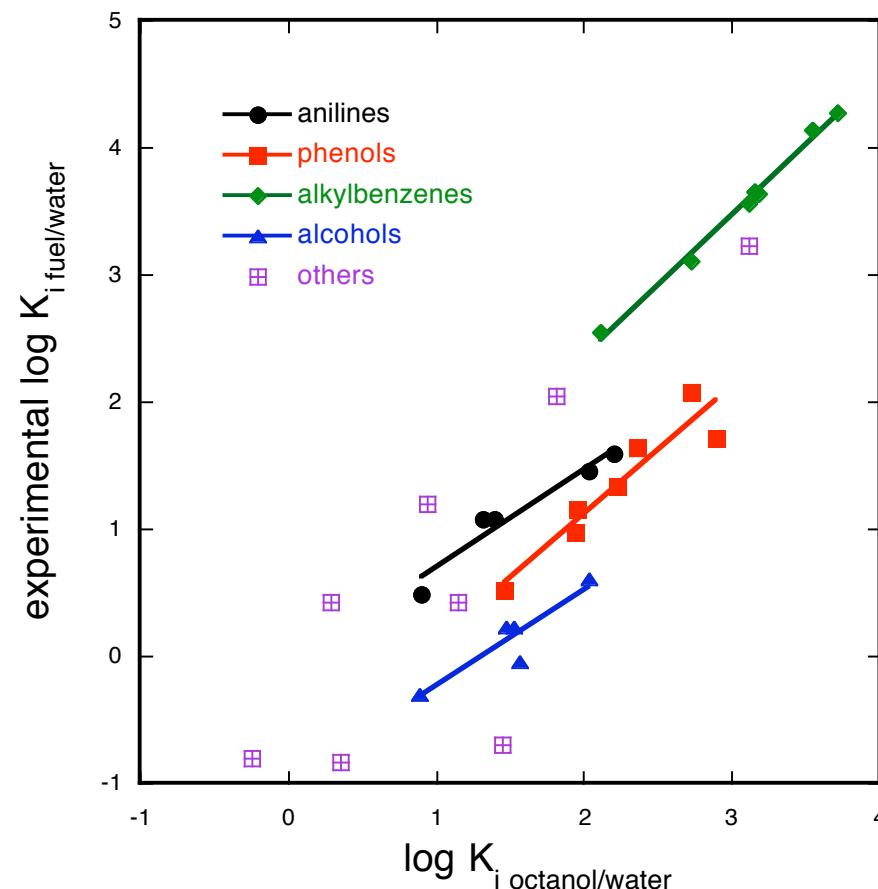

# Sorption of 74 Non-polar and 146 Polar Chemicals to Humic Matter

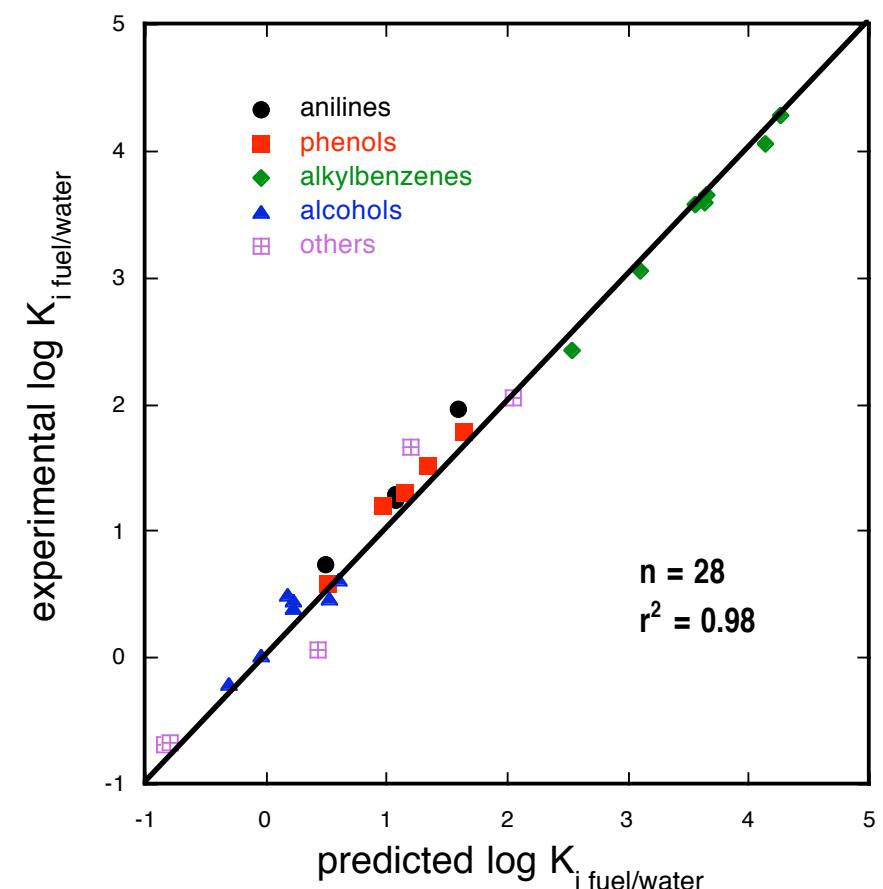

Niederer et al., unpublished

# Fuel / water partitioning

fitted with  $\log K_{\text{OW}}$

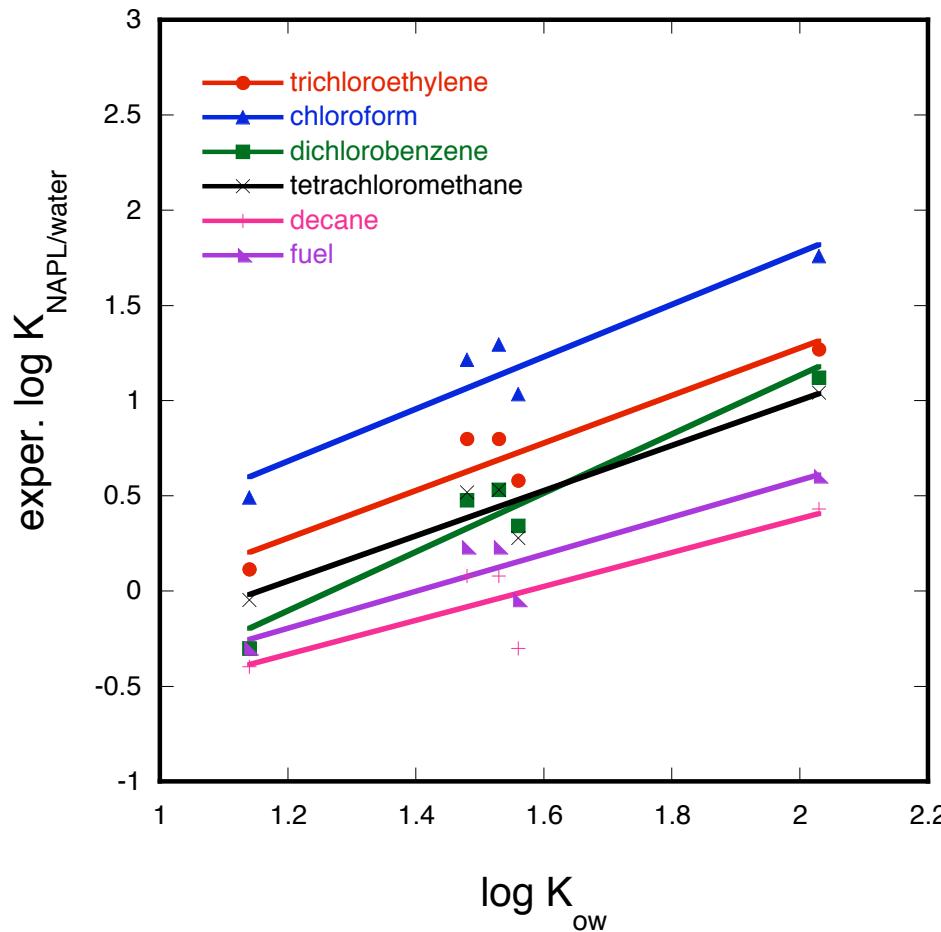

predicted with LSER

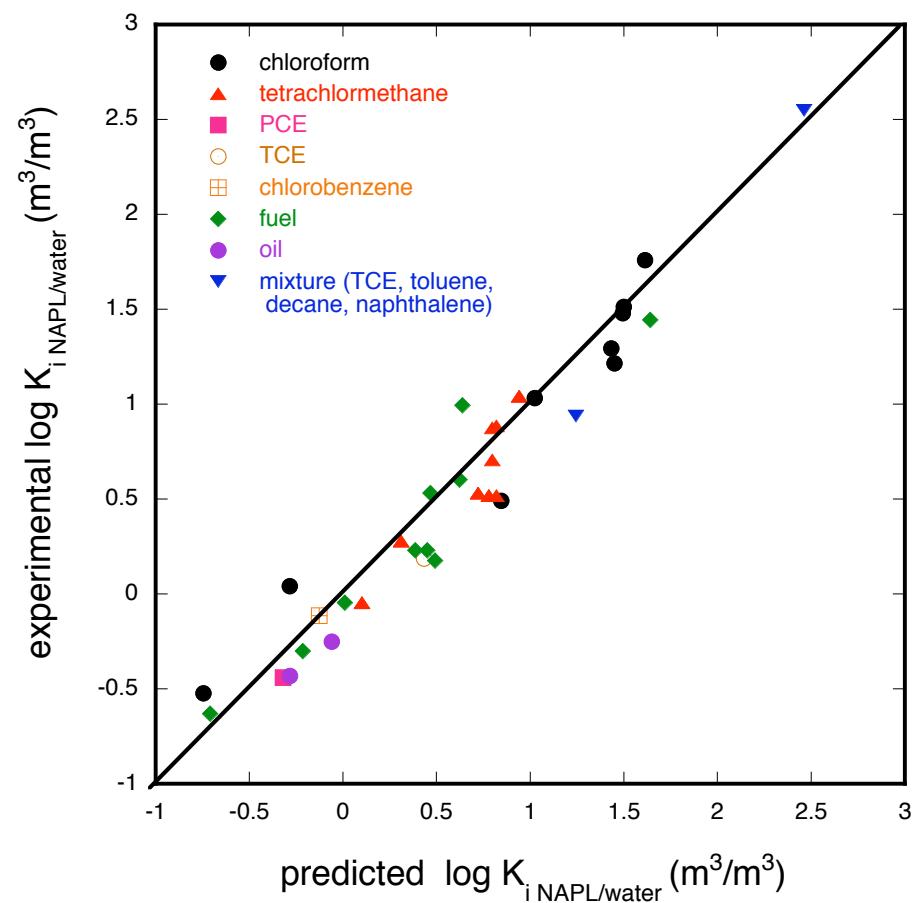

(adapted from Schmidt et al., 2002)

# *Predicting Partitioning of Alcohols between Water and various NAPL's*

fitted with  $\log K_{\text{ow}}$

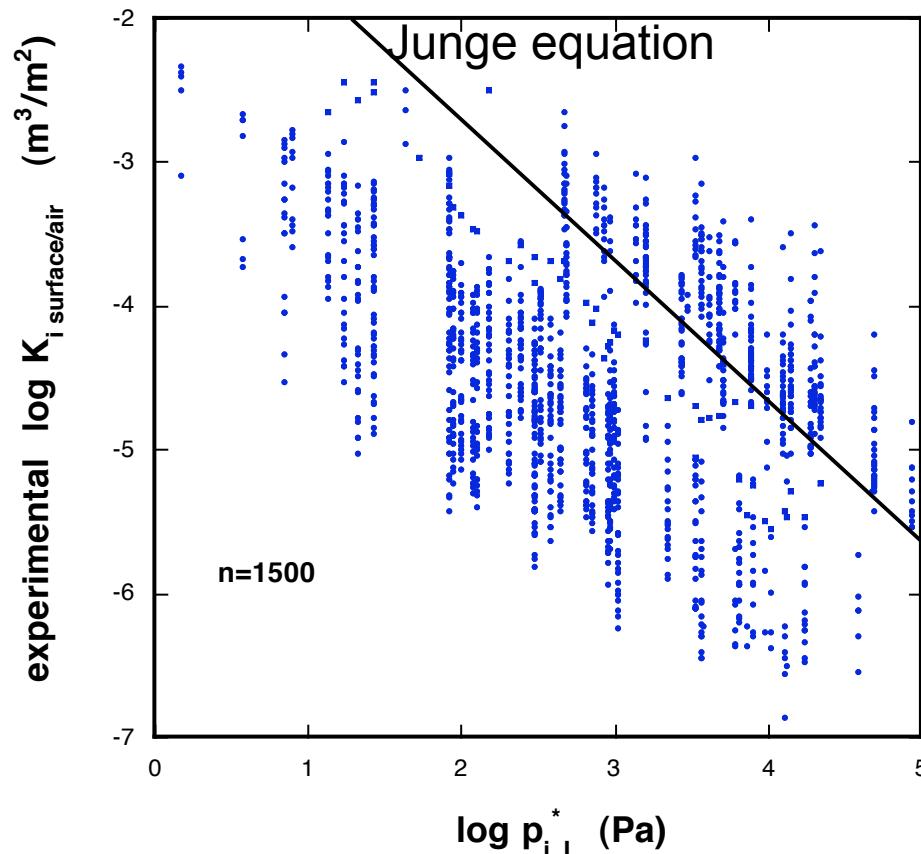

**predicted** with LSER

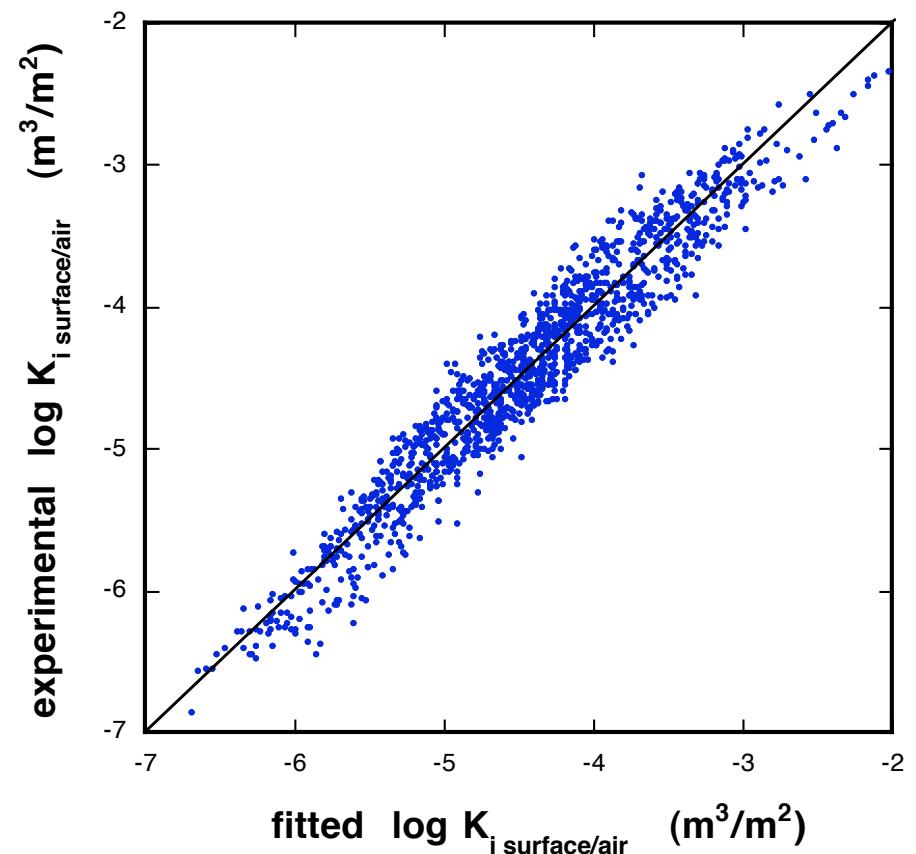

# Adsorption of ca. 50 compounds on 12 surfaces (15°C) at rh between 20 and 90%

fitted with vapor pressure

Fitted with an LSER

(Goss, Crit. Rev. Env. Sci. Technol. 2004)
