

RADON: TEST, FIX, SAVE A LIFE.

JANUARY IS NATIONAL
RADON ACTION MONTH

Start the New Year Off Right: Conduct National Radon Action Month Activities and Events

Join the effort to double lives saved from radon exposure in five years.

Radon is a natural radioactive gas that you can't see, smell, or taste. It's easy to ignore, but it could be present in your home, school, or office. Radon is the second leading cause of lung cancer deaths in the U.S., claiming about 20,000 lives annually, or slightly more than two every hour. The only way to know if you have a radon problem is to test.

January is National Radon Action Month. It's a time when radon partners in communities across the country lead activities and events to increase awareness of radon, promote testing and mitigation, and advance the use of radon-resistant new construction practices. Through these outreach efforts, the U.S. Environmental Protection Agency (EPA) and others can prevent thousands of lung cancer deaths.

How can I get involved?

By hosting activities and events during National Radon Action Month, you are raising awareness about radon in your community and contributing to the national effort to double the lives saved from radon exposure in five years. Radon Action Week, traditionally the third full week in October, is an ideal time to begin planning or conducting radon activities or events in your community. Such efforts can be leveraged and showcased in January.

- ▶ Conduct events and activities. (See ideas on the right!)
- ▶ Recognize successful efforts and share best practices.
- ▶ Promote radon outreach and education through your Web site, newsletters, and listservs.
- ▶ Order free Radon Public Service Announcements and campaign materials from www.epapsa.com and ask your local media outlets to donate free air time.
- ▶ Generate media coverage of radon topics, events, and activities.
- ▶ Set goals and collect results from your events and activities.
- ▶ Share your project ideas, efforts, and results at www.epa.gov/radon/nram/activities.html.

NATIONAL RADON ACTION MONTH

Activities

Below are just a few ideas for conducting activities in your community.

Set a bold goal for your community to reduce radon risks.

Whether you are conducting a single National Radon Action Month event, or developing an entire radon risk reduction program for your community, it is important to set goals to define what you will achieve. See page 10 of the Event Planning Kit for more information.

Plan a National Radon Action Month activity or event to kick off your campaign.

Conduct activities and events designed to raise awareness, recognize successful efforts, and share best practices. Set goals for and establish ways to measure results from your activities and events. View the Event Planning Kit for tips and tools.

Promote your activity or event on EPA's Web site and elsewhere.

In addition to promoting radon outreach and education through your Web site, newsletters, and listservs, use EPA's Activity Submittal Form to register your event and have it featured on the National Radon Action Month Web site. This Web site is a great way to promote your event and get exposure for your important work.

Collaborate with local radon partners.

Coordinate with your state radon program (see the back of this flyer) and local radon professionals to hold events and measure results.

Work with the media to spread your message.

Work with your local media outlets to run Public Service Announcements (PSAs) and generate media coverage of radon topics, events, and activities in your community. View and order customizable radon PSAs. See pages 26 and 28 of the Event Planning Kit for tips on preparing press releases and Op-Eds.

Have fun! You know your community better than anyone. Do something that grabs people's attention and makes them want to learn more. Be creative, and find an exciting way to help your community to understand a serious topic and to save lives!

See the Web site and Event Planning Kit at:

www.epa.gov/radon/nram.

Who should conduct National Radon Action Month Activities?

- ▶ State radon programs;
- ▶ Tribal Nations and Pueblos;
- ▶ Government agencies and non-profit organizations working on public health, safety, environmental, or housing programs;
- ▶ Radon testers, mitigators, and laboratories;
- ▶ Radon test kit providers, manufacturers and retailers;
- ▶ Housing professionals, including real estate agents, home inspectors, builders, and contractors;
- ▶ Doctors, nurses, and other health care professionals;
- ▶ Human resources, environmental, and safety officers at worksites;
- ▶ Advocacy organizations concerned about cancer; and

- ▶ Schools, homeowner's associations, and other community-based groups.

Use our Web site to plan and publicize your efforts and results.

EPA has developed tools to help you plan successful outreach activities, available at www.epa.gov/radon/nram. The Web site includes:

- ▶ A downloadable National Radon Action Month Event Planning Kit;
- ▶ A national map for viewing brief descriptions of events;
- ▶ Sample proclamations by government officials and other templates; and
- ▶ Radon materials and other resources to help you plan events.

Contact your state radon program for help!
