Congressional District 14  
EPA ID #: PAD096338066  
Last Updated: 10/06/2008**

## **Current Progress at the Site**

---

After an extensive search, it was determined that after being bought, sold, divided, and terminated several times, CSR is no longer a viable entity. An Environmental Indicator Inspection Report, dated February 2008, revealed that there are no known or suspected human health exposures or groundwater issues. The EPA RCRA Corrective Action program has proposed to make a Corrective Action Complete without Controls determination for the Facility. A Statement of Basis which explains EPA's proposed decision is available to the public. A public notice will be posted in The Pittsburgh Tribune-Review newspaper on October 15, 2008 for a 30-day comment period ending November 15, 2008.

## **Site Description**

---

CSR began operations at 632 Fort Duquesne Boulevard, an approximately 16,000 ft<sup>2</sup> building, on June 30, 1974. Circuit boards were designed, manufactured, cleaned, and painted at this location. By 1986, the facility closed. This former CSR facility was located in the commercial district of downtown Pittsburgh approximately 150 feet south of the Allegheny River. Due to the size of the building, it is thought that CSR probably leased the space for their operations.

## **Site Responsibility**

---

RCRA Corrective Action activities at this facility are being conducted under the direction of EPA Region 3 with assistance from the State.

## **Institutional Controls**

---

There is no need for institutional controls at the facility at this time.
