

US EPA REGION 9 AIR QUALITY TRENDS, 1970-2009
CARBON MONOXIDE DESIGN VALUE CONCENTRATIONS BY AIR BASIN

Standard: 9 parts per million (ppm).

Source: US EPA's Air Quality System (AQS) database.

Design Value: Highest second high day over two years.

Not all design values are valid due to data completeness issues. X-axis labels represent the last year of a monitor's two-year time period. All regionally-concurred exceptional events have been excluded from design value calculations.
