

Renewable Energy & Energy Efficiency in Vermont

U.S. EPA | ENERGY OUTREACH AT EPA NEW ENGLAND

THE ENERGY & CLIMATE CHANGE

efforts at EPA New England include working with businesses, federal, state, and local organizations and New England citizens to reduce energy use by providing tools, guidance and technical assistance for energy efficiency, cleaner fuels and renewable sources of energy. The goal of these efforts is to reduce greenhouse gas emissions and impacts of climate change.

INTRO:

Reducing our use of fossil fuel-based energy reduces greenhouse gases that contribute to global climate change. EPA New England is providing this resource fact sheet as a starting point for residential, municipal and commercial energy consumers. It lists the federal and state incentives for energy efficiency and renewable sources of energy. For more information, please refer to our website www.epa.gov/region1/eco/energy/mitigation-efforts-epane.html#RenewableEnergy, the Database of State Incentives for Renewable Energy www.dsireusa.org, or the contacts list for more information.

FEDERAL INCENTIVES:
