SUCCESS STORIES

SOLAR FLEET

CLIENT CONNECT

Solar power plants are quiet, motionless and create no emissions. So how do you know if they are producing clean, renewable power?

That's the beauty of Client Connect

Client Connect is a secure, online portal where existing customers can login to get full visibility into the performance of their solar power plants. Via Client Connect, customers who receive solar energy services can view:

- solar energy production
- energy costs and savings
- facility load offset
- environmental impact of the solar power plants

CUSTOMER SUCCESS STORY

City of San Diego

"In the end, SunEdison offered the best price per kWh and the best overall cost profile for the design, installation and maintenance of a large solar system."
