

Technical Development Document for the Final Section 316(b) Phase II Existing Facilities Rule

February 12, 2004

**U.S. Environmental Protection Agency
Office of Water (4303T)
1200 Pennsylvania Avenue, NW
Washington, DC 20460**

**EPA 821-R-04-007
DCN 6-0004**

Table of Contents

Chapter 1: Technology Cost Modules

Introduction

- 1.0 Submerged Passive Intakes
- 1.1 Relocated Shore-based Intake to Submerged Near-shore and Offshore with Fine Mesh Passive Screens at Inlet
 - 1.1.1 Selection/Derivation of Cost Input Values
 - 1.1.2 Capital Cost Development
- 1.2 Add Submerged Fine Mesh Passive Screens to Existing Offshore Intakes

References

Attachment A

Table A1

Table A2

Figures 1-1 to 1-17 [pg 22 to 38]

- 2.0 Improvements to Existing Shoreline Intakes with Traveling Screens [pg 39]
- 2.1 Replace Existing Traveling Screens with New Traveling Screen Equipment
 - 2.1.1 Traveling Screen Capital Costs
 - 2.1.2 Downtime Requirements
 - 2.1.3 O&M Cost Development
 - 2.1.4 Double Entry-Single Exit (Dual-Flow) Traveling Screens
- 2.2 New Larger Intake Structure for Decreasing Intake Velocities [pg 54]

Reference [pg 59]

Tables 2-8 to 2-13 and 2-21 to 2-26 [pg 60 to 65]

Figures 2-1 to 2-6 and 2-7 to 2-12 [pg 66 to 78]

- 3.0 Existing Submerged Offshore Intakes - Add Velocity Caps [pg 79]
- 3.1 Capital Costs
- 3.2 O&M Costs
- 3.3 Application

References

Tables 3-1 to 3-2

Figures 3-1 to 3-2

- 4.0 Fish Barrier Nets [pg 85]
- 4.1 Capital Cost Development
- 4.2 O&M Costs Development
- 4.3 Nuclear Facilities
- 4.4 Application

References

Figure 4-1 to 4-2

- 5.0 Aquatic Filter Barriers [pg97]
- 5.1 Capital Cost Development
- 5.2 O&M Costs
- 5.3 Application

References

Figure 5-1

- 6.0 Determining Fixed Versus Variable O&M Costs
- 6.1 Overall Approach
- 6.2 Estimating the Fixed/Variable O&M Cost Mix
- 6.3 O&M Fixed Cost Factors

Chapter 2: Costing Methodology for Model Facilities

Introduction

- 1.0 Technology Cost Modules Applied to Model Facilities
- 2.0 Examples of the Application of Technology Cost Modules to Model Facilities
- 3.0 Regional Cost Factors
- 4.0 Repowering Facilities and Model Facility Costs

Chapter 3: Cost-Cost Test

Introduction

- 1.0 Site-Specific Requirements - The Cost to Cost Test
- 2.0 Determining Facility's Costs
- 3.0 Cost to Cost Test
- 4.0 Cost Correction

Chapter 4: Efficacy of Cooling Water Intake Structure Technologies

Introduction

- 1.0 Data Collection Overview
 - 1.1 Scope of Data Collection Efforts
 - 1.2 Technology Database
 - 1.3 Data Limitations
 - 1.4 Conventional Traveling Screens
 - 1.5 Closed-Cycle Wet Cooling System Performance
- 2.0 Alternative Technologies
 - 2.1 Modified Traveling Screens and Fish Handling and Return Systems
 - 2.1.1 Example Studies
 - 2.1.2 Summary
 - 2.2 Cylindrical Wedgewire Screens
 - 2.2.1 Example Studies
 - 2.2.2 Other Facilities
 - 2.2.3 Summary
 - 2.3 Fine-Mesh Screens
 - 2.3.1 Example Facilities
 - 2.3.2 Other Facilities
 - 2.3.3 Summary
 - 2.4 Fish Net Barriers
 - 2.4.1 Example Studies
 - 2.4.2 Summary
 - 2.5 Aquatic Microfiltration Barriers
 - 2.6 Louver Systems
 - 2.7 Angled and Modular Inclined Screens
 - 2.8 Velocity Caps
 - 2.9 Porous Dikes and Leaky Dams
 - 2.10 Behavioral Systems
 - 2.11 Other Technology Alternatives
 - 2.12 Intake Location
- 3.0 Conclusion
