|-----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| 1,4-Dioxane                 | Target       | 67                | U               | ug/kg | 67         | U        | 1.0             | YES        | S4VEM            |
| Benzaldehyde                | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | S4VEM            |
| Phenol                      | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethyl)ether     | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | S4VEM            |
| 2-Chlorophenol              | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylphenol              | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | S4VEM            |

(b) (4)  
Reviewer

**Subject:** Organic Data Validation (S4VEM)  
Norwood Landfill  
49088 COAP6

### **Overview**

This data package consisted of one (1) trip blank and three (3) sediment samples analyzed for volatile target analytes. Additionally, three (3) sediment samples were analyzed for Aroclors, pesticide, semivolatile target analytes and Polynuclear Aromatic Hydrocarbon (PAH) by Selective Ion Monitoring (SIM) analysis.

Analyses were performed by Chemtech Consulting Group (CHM) according to Contract Laboratory Program (CLP) Statement of Work (SOW) SOM02.4.

Data were validated according to the National Functional Guidelines for Organic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Label S4VEM (Stage\_4\_Validation\_Electronic\_Manual).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated October 27, 2020.

### **Summary**

No significant data quality outliers or technical deficiencies were identified that would require rejection of sample results. Less significant data quality outliers were identified resulting in estimation of sample results including but not limited to surrogate recoveries and calibration precision.

### Minor Problems

Percent recovery for pesticide surrogate decachlorobiphenyl (DCB) was outside the lower control limit for sample COAP7. Detected concentrations for pesticides in this sample are estimated and have been qualified "J". Non-detects are estimated and have been qualified "UJ".

The following analytes exceeded calibration range in the diluted analysis of samples listed below; the samples were not reanalyzed at further dilution. Detected results are estimated and have been qualified "J".

| Fraction | Sample | DF | Analyte  |
|----------|--------|----|--|
| PAH      | COAP6  | 5x | Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene<br>Chrysene, Benzo(b)fluoranthene                 |
|          | COAP7  | 5x | Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene<br>Benzo(b)fluoranthene, Benzo(a)pyrene |
|          | COAP8  | 5x | Fluoranthene, Pyrene, Benzo(b)fluoranthene   |

### Notes

Detected concentrations for target analytes less than Contract Required Quantitation Limits (CRQLs) are estimated and have been qualified "J".

Pesticide results for trans-chlordane, cis-chlordane and dieldrin in sample COAP6 and cis-chlordane in sample COAP7 had Percent Differences (%D) between the two (2) analytical columns of > 25.0% and < 200%. In the Aroclor fraction, Aroclor 1254 in sample COAP6 had a D% between the two (2) analytical columns of > 25.0% and < 200%. The results for these analytes are estimated and have been qualified "J". The lower of the two (2) column result is reported. All other reported results base on dual column precision were less than the CRQL.

In the volatile fraction, Method Blank (MB) VBLK79 was free from contamination. MB VBLK27/VBLK28 reported methylene chloride less than the CRQL. Storage blank (SB) VHBLK01 was free from contamination. SB VHBLK02 reported acetone and methylene chloride less than the CRQL. Detected concentrations of methylene chloride less than the CRQL in the associated field samples, have been reported at the CRQL and qualified "U".

Volatile trip blank COAW1 reported acetone less than the CRQL. The associated field sample were non-detect for this analyte. No data were qualified based on this finding.

In the pest/Aroclors/semivolatile/SIM fractions, MBs were free from contaminations.

Percent recoveries for Aroclors/pesticide target analytes in Laboratory Control Sample (LCS) analyses were within control limits on both columns. No data were qualified based on LCS precision or accuracy.

Percent recoveries and Relative Percent Differences (RPDs) for Aroclors/pesticide target analytes in Matrix Spike/Matrix Spike Duplicate (MS/MSD) analysis of sample COAP8 were within control limits on both columns. No data were qualified based on this finding.

Concentrations of the following PAH analytes exceeded the calibration range in the initial analysis of samples listed. These samples were reanalyzed at dilution in order to quantitate these analytes within the calibration range and the analytes were reported from the dilutions. There is no indication that these exceedance issues impacted subsequent sample analyses.

| Sample | DF | Analyte  |
|--------|----|--|
| COAP6  | 5x | Anthracene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene<br>Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene         |
| COAP7  | 5x | Anthracene, Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene<br>Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene                         |
| COAP8  | 5x | Phenanthrene, Benzo(a)anthracene, Chrysene, Benzo(k)fluoranthene<br>Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene |

Surrogate recoveries requirements do not apply to samples that have been diluted.

Sample calculation checks were performed. All calculated results had RPDs less than 5% of the reported results. No sample data were qualified.

Manual integrations were performed and identified by the laboratory. A subset of these was evaluated and found to be accurate and consistent. No action was taken based on manual integrations.

Tentatively Identified Compounds (TICs) are not reviewed. The validation qualifiers are applied by EXES electronic validation based on laboratory qualifiers. By definition, all compounds identified as TICs should be treated as tentative identifications and all reported results should be considered estimated.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation to laboratory quality control samples.

## Glossary of Organic Data Qualifier Codes

| Validation Qualifiers | In order of descending precedence. Only one of these qualifiers may apply to any result.  |
|-----------------------|---|
| R                     | The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.             |
| UJ                    | The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.                                       |
| U                     | The analyte was analyzed for but was not detected above the level of the reported sample quantitation limit.  |
| J                     | The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.  |
| J+                    | The result is an estimated quantity, but the result may be biased high.   |
| J-                    | The result is an estimated quantity, but the result may be biased low.  |
| Additional Qualifiers | Additional qualifiers may be combined with other qualifiers.  |
| N                     | The analyte has been "tentatively identified" or "presumptively" as present.  |
| B                     | The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.   |
| C                     | The target Pesticide or Aroclor analyte identification has been confirmed by Gas Chromatography/Mass Spectrometry (GC/MS). This qualifier may be added to other qualifiers. |
| X                     | The target Pesticide or Aroclor analyte identification was not confirmed when GC/MS analysis was performed. This qualifier may be added to other qualifiers.                |

**Subject:** Organic Data Validation (S4VEM)  
Norwood Landfill  
49088 COAR2

### **Overview**

This data package consisted of two (2) trip blanks and two (2) rinsate blanks analyzed for trace volatile analytes, four (4) trip blanks analyzed for volatile analytes, three (3) surface water and two (2) ground water samples analyzed for trace volatile, semivolatile, semivolatile PAH by SIM, pesticide and Aroclor analytes.

Analyses were performed by Chemtech Consulting Group (CHM) according to Contract Laboratory Program (CLP) Statement of Work (SOW) SOM02.4.

Data were validated according to the National Functional Guidelines for Organic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Label S4VEM (Stage\_4\_Validation\_Electronic\_Manual).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated October 22, 2020.

### **Summary**

A significant data quality outlier regarding a Deuterated Monitoring Compound (DMC) in semivolatile fraction was identified that resulted in rejection of results. Less significant data quality outliers were identified that resulted in estimation of sample results including but not limited to DMCs in trace volatile fraction as detailed below.

### **Major Problem**

Recovery for DMC 4-Nitrophenol-<sub>d4</sub> was <10% in semivolatile sample COAR6. No positive results were reported for analytes associated with this DMC in this sample. Quantitation limits for analytes associated with this DMC have been rejected and qualified "R".

**Minor Problems**

Recovery for DMC 1,1-Dichloroethene- $d_2$  was outside the lower control limit in trace volatile sample COAR2. No positive results were reported for analytes associated with this DMC. Quantitation limits for analytes associated with this DMC in this sample have been qualified "UJ".

**Notes**

Detected concentrations for target analytes less than Contract Required Quantitation Limit (CRQL) are estimated and have been qualified "J".

Laboratory blanks reported methylene chloride and chloroform <CRQL in trace volatile blanks VBLK19 and VBLK21 and methylene chloride <CRQL in trace volatile blanks VBLK22 and VHBLK02. Only chloroform was detected in associated samples (COAT3). The positive result <CRQL in this sample has been reported at CRQL and qualified "U". All other laboratory blanks were free from contamination.

Two trip blanks and two rinsate blanks were analyzed using the trace volatile method. These blanks reported chloromethane, acetone, benzene and/or toluene <CRQL or acetone >CRQL. Benzene was not detected in the field samples. Concentrations of chloromethane, acetone and toluene <CRQL in the associated field samples have been reported at CRQL and qualified "U". Concentration of acetone in sample COAR5 >CRQL but <2X the blank value has been reported and qualified "U".

Four trip blanks were analyzed using the volatile method. These trip blanks reported chloromethane, acetone and/or toluene < CRQL or acetone >CRQL. No field samples were associated with these blanks in this SDG. No data were qualified based on trip blanks in volatile fraction.

Pesticide results with %D >25% and < 200% between the two analytical columns have been qualified "J".

Laboratory Control Samples (LCS) analyzed in pesticide and Aroclor fractions reported acceptable results.

Matrix Spike/Matrix Spike Duplicate (MS/MSD) analyses of pesticide sample COAR6 reported recovery outside the upper control limit for endrin in both MS/MSD analysis on one column. No positive result was reported for endrin in the parent sample. All other criteria were met for the MS/MSD. No data were qualified based on this outlier.

MS/MSD analyses for Aroclor sample COAR6 reported acceptable results.

The original COCs listed the collection method as composite instead of grab for all soil samples. This was revised in subsequent COCs. No data were qualified due to this issue.

Tentatively Identified Compounds (TICs) are not reviewed by the data validators. The validation qualifiers are applied by EXES electronic validation based on laboratory qualifiers. By definition, all compounds identified as TICs should be treated as tentative identifications and all reported results should be considered estimated.

Sample calculation checks were performed. All calculated results had RPDs less than 5% of the reported results. No sample data were qualified.

Manual integrations were performed and identified by the laboratory. A subset of these was evaluated and were found to be accurate and consistent. No action was taken based on manual integrations.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation to laboratory quality control samples.

### **Glossary of Organic Data Qualifier Codes**

|                       |   |
|-----------------------|---|
| Validation Qualifiers | In order of descending precedence. Only one of these qualifiers may apply to any result.  |
| R                     | The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.             |
| UJ                    | The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.                                      |
| U                     | The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit  |
| J                     | The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.  |
| J+                    | The result is an estimated quantity, but the result may be biased high.   |
| J-                    | The result is an estimated quantity, but the result may be biased low.  |
| Additional Qualifiers | Additional qualifiers may be combined with other qualifiers.  |
| N                     | The analyte has been "tentatively identified" or "presumptively" as present.  |
| B                     | The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.   |
| C                     | The target Pesticide or Aroclor analyte identification has been confirmed by Gas Chromatography/Mass Spectrometry (GC/MS). This qualifier may be added to other qualifiers. |
| X                     | The target Pesticide or Aroclor analyte identification was not confirmed when GC/MS analysis was performed. This qualifier may be added to other qualifiers.                |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49088/EPW14030/C0AR2

Lab Name: Chemtech Consulting Group

Sample Number: C0AR1

Method: Aroclors

Matrix: Water

MA Number:

Sample Location: NL-2020-SW-17

pH: 6

Sample Date: 10/01/2020

Sample Time: 07:25:00

% Moisture:

% Solids: 0

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49088/EPW14030/C0AR2

Lab Name: Chemtech Consulting Group

Sample Number: C0AR2

Method: Aroclors

Matrix: Water

MA Number:

Sample Location: NL-2020-SW-18

pH: 6

Sample Date: 09/28/2020

Sample Time: 15:00:00

% Moisture:

% Solids: 0

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49088/EPW14030/C0AR2

Lab Name: Chemtech Consulting Group

Sample Number: C0AR5

Method: Aroclors

Matrix: Water

MA Number:

Sample Location: NL-2020-GW-03

pH: 6

Sample Date: 10/01/2020

Sample Time: 14:05:00

% Moisture:

% Solids: 0

**Subject:** Organic Data Validation (S4VEM)  
Norwood Landfill  
49088 COAR3

### **Overview**

This data package consisted of two (2) trip blanks and two (2) ambient blanks analyzed for trace volatile analytes, four (4) surface water samples including one (1) field duplicate pair and three (3) ground water samples including one (1) field duplicate pair analyzed for trace volatile, semivolatile, semivolatile PAH by SIM, pesticide and Aroclor analytes.

Analyses were performed by Chemtech Consulting Group (CHM) according to Contract Laboratory Program (CLP) Statement of Work (SOW) SOM02.4.

Data were validated according to the National Functional Guidelines for Organic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Label S4VEM (Stage\_4\_Validation\_Electronic\_Manual).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated October 27, 2020.

### **Summary**

No significant data quality outliers were identified that would require rejection of sample results. Less significant data quality outliers were identified resulting in estimation of sample results, including but not limited to, Deuterated Monitoring Compound (DMC) and blank contamination in trace volatile fraction.

### **Minor Problem**

Recoveries of DMC 1,1-Dichloroethene-<sub>d2</sub> were outside the lower control limit in trace volatile samples CAR8 and COAT8. No positive results were detected for analytes associated with this DMC. Quantitation limits for analytes associated with this DMC have been qualified "UJ".

## Notes

Detected concentrations for target analytes less than Contract Required Quantitation Limits (CRQL) are estimated and have been qualified "J".

Laboratory blanks were free of contamination in all fractions with the exception of methylene chloride >CRQL in VBLK81 and <CRQL in VHBLK01. Methylene chloride was not detected in field samples. No data were impacted based on this laboratory contamination.

Trip blanks, samples COAT7 and COAW0 and ambient blanks, samples COAT8 and COAT9 reported concentrations of chloromethane, acetone and/or toluene >CRQL or <CRQL. In addition, sample COAT7 and COAT8 reported 1,2,4-trichlorobenzene and styrene <CRQL, respectively. 1,2,4-trichlorobenzene and styrene were not detected in field samples. Positive results for these analytes <CRQL have been reported at CRQL and qualified "U". Positive results >CRQL but < the associated blank concentration (<2X the blank for acetone) have been reported and qualified "U". The positive result for chloromethane in sample COAR8 >CRQL and slightly > the blank value has been reported and qualified "J+" for high bias due to likely impact at this level from contamination.

Laboratory Control Samples (LCS) analyzed in pesticide and Aroclor fractions reported acceptable results.

Matrix Spike/Matrix Spike Duplicate (MS/MSD) analyses of pesticide samples COAQ9 reported recoveries outside the upper control limits for gamma-BHC, aldrin, dieldrin, endrin and/or 4,4'-DDT on one or both analytical columns. The only analyte detected in the parent sample is dieldrin <CRQL and already qualified "J". No additional data were qualified based on these outliers.

MS/MSD analyses of Aroclor sample COAQ9 reported acceptable results with the exception of recoveries for Aroclors 1016 and 1260 outside the upper control limit on one analytical column in the MS analysis. No positive results were reported for Aroclors in the parent sample COAQ9 and no data were qualified based on these outliers.

Results for the field duplicate pairs, samples COAR8/COAT4 and COAQ7/COAW2, were within  $\pm$  CRQL, 20% RPD for all analytes.

Tentatively Identified Compounds (TICs) are not reviewed by the data validators. The validation qualifiers are applied by EXES electronic validation based on laboratory qualifiers. By definition, all compounds identified as TICs should be treated as tentative identifications and all reported results should be considered estimated.

Sample calculation checks were performed. All calculated results had RPDs less than 5% of the reported results. No sample data were qualified.

Manual integrations were performed and identified by the laboratory. A subset of these was evaluated and were found to be accurate and consistent. No action was taken based on manual integrations.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation to laboratory quality control samples.

#### **Glossary of Organic Data Qualifier Codes**

|                       |   |
|-----------------------|---|
| Validation Qualifiers | In order of descending precedence. Only one of these qualifiers may apply to any result.  |
| R                     | The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.             |
| UJ                    | The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.                                       |
| U                     | The analyte was analyzed for but was not detected above the level of the reported sample quantitation limit   |
| J                     | The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.  |
| J+                    | The result is an estimated quantity, but the result may be biased high.   |
| J-                    | The result is an estimated quantity, but the result may be biased low.  |
| Additional Qualifiers | Additional qualifiers may be combined with other qualifiers.  |
| N                     | The analyte has been "tentatively identified" or "presumptively" as present.  |
| B                     | The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.   |
| C                     | The target Pesticide or Aroclor analyte identification has been confirmed by Gas Chromatography/Mass Spectrometry (GC/MS). This qualifier may be added to other qualifiers. |
| X                     | The target Pesticide or Aroclor analyte identification was not confirmed when GC/MS analysis was performed. This qualifier may be added to other qualifiers.                |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49088/EPW14030/C0AR3

Lab Name: Chemtech Consulting Group

Sample Number: C0AQ8

Method: Aroclors

Matrix: Water

MA Number:

Sample Location: NL-2020-SW-14

pH: 6

Sample Date: 10/06/2020

Sample Time: 08:15:00

% Moisture:

% Solids: 0

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49088/EPW14030/C0AR3

Lab Name: Chemtech Consulting Group

|                                |                       |                         |                       |
|--------------------------------|-----------------------|-------------------------|-----------------------|
| Sample Number: C0AQ8           | Method: Semivolatiles | Matrix: Water           | MA Number:            |
| Sample Location: NL-2020-SW-14 | pH: 6                 | Sample Date: 10/06/2020 | Sample Time: 08:15:00 |
| % Moisture:                    |                       | % Solids: 0             |                       |

| Analyte Name                | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|-----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| 1,4-Dioxane                 | Target       | 2.0               | U               | ug/L  | 2.0        | U        | 1.0             | YES        | S4VEM            |
| Benzaldehyde                | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Phenol                      | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethyl)ether     | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 2-Chlorophenol              | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylphenol              | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 1.9               | J               | ug/L  | 1.9        | J        | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49088/EPW14030/C0AR3

Lab Name: Chemtech Consulting Group

Sample Number: C0AQ9MS

Method: Aroclors

Matrix: Water

MA Number:

Sample Location:

pH: 6

Sample Date: 10/06/2020

Sample Time: 07:40:00

% Moisture:

% Solids: 0

| Analyte Name | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |

| 2,2-oxybis(1-Chloropropane) | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 1.6               | J               | ug/L  | 1.6        | J        | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Carbazole                   | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate         | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49088/EPW14030/C0AR3

Lab Name: Chemtech Consulting Group

| Analyte Name                    | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|---------------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Fluoranthene                    | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Pyrene                          | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Butylbenzylphthalate            | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 3,3-Dichlorobenzidine           | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)anthracene              | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Chrysene                        | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-ethylhexyl)phthalate      | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Di-n-octyl phthalate            | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Benzo(b)fluoranthene            | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Benzo(k)fluoranthene            | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |

|-----------------------------------|-----------------------|-------------------------|-----------------------|
| Sample Number: C0AW2              | Method: Semivolatiles | Matrix: Water           | MA Number:            |
| Sample Location: NL-2020-SW-13-01 | pH: 6                 | Sample Date: 10/06/2020 | Sample Time: 12:00:00 |
| % Moisture:                       |                       | % Solids: 0             |                       |

| Analyte Name                | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|-----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| 1,4-Dioxane                 | Target       | 2.0               | U               | ug/L  | 2.0        | U        | 1.0             | YES        | S4VEM            |
| Benzaldehyde                | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Phenol                      | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethyl)ether     | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 2-Chlorophenol              | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylphenol              | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 5.0               | U               | ug/L  | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 10                | U               | ug/L  | 10         | U        | 1.0             | YES        | S4VEM            |

**Subject:** Inorganic Data Validation (S4VEM)  
Norwood Landfill  
49088 MCOAJ6

### **Overview**

This data package consisted of eighteen (18) soil samples, including a field duplicate pair, analyzed for metals by ICP-AES and ICP-MS and for mercury (Hg) by cold vapor atomic absorption technique and one (1) surface water sample analyzed for total metals by ICP-MS and for Hg.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4. Metals aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) are analyzed by ICP-AES with the remaining standard target analyte list (TAL) metals analyzed by ICP-MS for the soil matrix.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated October 14, 2020.

### **Summary**

No significant data quality outliers or technical deficiencies were identified that would require rejection of sample results. Serial dilution, Internal standard relative intensities, and blank contamination issues required estimation of sample data.

### **Minor Problems**

Percent differences (%Ds) in the ICP-MS serial dilution analyses were outside the control limit (>10%) for nickel (Ni) in soil sample MCOAJ6 and for manganese (Mn) in water sample MCOAR2. Detected concentrations for these analytes are estimated in these samples and have been qualified "J".

Percent relative intensities for the internal standards listed below were outside the upper control limit (>125%) in the initial analyses of the samples shown. These sample were reanalyzed at two-fold (2X) dilutions with similar results. Associated analytes were reported from the initial analyses. Reported concentrations and quantitation limits are estimated and have been qualified "J" and "UJ", respectively.

| Internal Standard | Associated Analyte(s)                         | Sample(s)  |
|-------------------|---|--|
| Scandium          | beryllium (Be), cobalt (Co), Ni, vanadium (V) | MCOAJ6, MCOAJ7, MCOAK0, MCOAK6, MCOAL2, MCOAL5, MCOAL6, MCOAM1, MCOAM2, MCOAM5, MCOAN1, MCOAN7, MCOAPO, MCOAP1, MCOAP2 |
| Terbium           | barium (Ba), chromium (Cr)                    | MCOAM1   |
| Holmium           | antimony (Sb)                                 | MCOAM1   |
| Bismuth           | lead (Pb), thallium (Tl)                      | MCOAK6   |

Laboratory instrumentation reported negative values for Hg greater than the absolute value of the Method Detection Limit (MDL) in blank analyses associated with the soil samples. Detected concentrations which were less than the Contract Required Quantitation Limit (CRQL) were reported at the CRQL and qualified "UJ". Quantitation limits are estimated and qualified "UJ".

### **Notes**

Detected concentrations for target analytes less than the CRQLs are estimated and have been qualified "J".

Target analytes Sb, arsenic (As), selenium (Se), and Tl have been detected in laboratory blanks associated with the samples in this SDG. Detected concentrations for these analytes less than the CRQL in associated samples have been reported at the CRQL and qualified "U".

Matrix spike, laboratory duplicate, and Laboratory Control Sample analyses were within control limits.

Concentrations for the following target analytes exceeded the calibration range in the initial analysis for the samples listed below. These samples were reanalyzed at dilution in order to quantitate these analytes within the calibration range. Results were reported from the dilutions.

| Sample(s)                                      | Analyte(s) | Dilution |
|--|------------|----------|
| MCOAK6, MCOAM2, MCOAPO, MCOAP1, MCOAP2, MCOAS2 | Fe         | 2X       |
| MCOAL6, MCOAP2, MCOAS2                         | Lead (Pb)  | 2X       |
| MCOAL7, MCOAP1                                 | Zinc (Zn)  | 2X       |
| MCOAL5, MCOAL6, MCOAL7, MCOAP2, MCOAQ1, MCOAS2 | Mn         | 2X       |
| MCOAN7, MCOAP1                                 | Mn         | 5X       |
| MCOAPO   | Mn         | 25X      |

Percent relative intensities (%RIs) for the internal standards listed below were outside the upper control limit (>125%) in the initial analyses of the samples shown. These sample were reanalyzed at two-fold (2X) dilutions with %RIs within control limits for these standards. Associated analytes shown were reported from the diluted analyses without qualification.

| Internal Standard | Associated Analyte(s) | Sample(s)      |
|-------------------|-----------------------|----------------|
| Scandium          | Be, Co, Ni, V         | MCOAQ1, MCOAS2 |
| Bismuth           | Pb                    | MCOAP1         |

Sample C0AQ1 reported percent solids less than 50% but greater than 30%. No data were qualified based on this finding.

Several samples were received without sample tags as noted by the laboratory. No data were qualified based on this finding.

Results reported for field duplicate pair MCOAP2/MCOAS2 were comparable (within control limits of 25 Relative Percent Difference (RPD) or  $\pm$  CRQL) for all analytes except cadmium (Cd), copper (Cu), and Mg. No data were qualified based on field duplicate precision.

Sample calculation checks were performed on samples MCOAJ6 and MCOAR2. All calculated results had RPDs less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation in addition to laboratory quality control samples.

**Glossary of Inorganic Data Qualifier Codes**

---

Validation    In order of descending precedence. Only one of these qualifiers may apply to any  
Qualifiers    result.

---

- R            The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.
- UJ           The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
- U            The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit
- B            The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.
- J            The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+           The result is an estimated quantity, but the result may be biased high.
- J-           The result is an estimated quantity, but the result may be biased low.

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49088/EPW15007/MC0AJ6

Lab Name: CHEMTEX

Sample Number: MC0AR2D

Method: Mercury by Cold Vapor

Matrix: Water

MA Number:

Sample Location:

pH: 2.

Sample Date: 09/28/2020

Sample Time: 15:00:00

% Moisture:

% Solids:

| Analyte Name | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|--------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Mercury      | Target       | 0.73              |                 | mg/L  | 0.73       |          | 1               | YES        | NV               |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49088/EPW15007/MC0AJ6

Lab Name: CHEMTEX

Sample Number: MC0AR2S

Method: Mercury by Cold Vapor

Matrix: Water

MA Number:

Sample Location:

pH: 2.

Sample Date: 09/28/2020

Sample Time: 15:00:00

% Moisture:

% Solids:

| Analyte Name | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|--------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Mercury      | Spike        | 1.6               |                 | mg/L  | 1.6        |          | 1               | YES        | NV               |

**Subject:** Inorganic Data Validation (S4VEM)  
Norwood Landfill  
49088 MCOAJ8

### **Overview**

This data package consisted of twelve (12) soil samples, including two (2) field duplicate pairs, analyzed for metals by ICP-AES and ICP-MS and for mercury (Hg) by cold vapor atomic absorption technique.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4. Metals aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) are analyzed by ICP-AES with the remaining standard target analyte list (TAL) metals analyzed by ICP-MS.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated October 20, 2020.

### **Summary**

No significant data quality outliers or technical deficiencies were identified that would require rejection of sample results. A serial dilution issue and blank contamination required qualification of results.

### **Minor Problem**

The percent difference (%D) in the ICP-MS serial dilution analysis was outside the control limit (>10%) for vanadium (V) in sample MCOAJ8. The detected concentration for V is estimated in this sample and has been qualified "J".

**Notes**

Detected concentrations for target analytes less than the Contract Required Quantitation Limits (CRQLs) are estimated and have been qualified "J".

Antimony (Sb) and cadmium (Cd) have been detected in laboratory blanks associated with the samples in this SDG. Target analyte Hg has been detected in laboratory blanks associated with the samples in this SDG. Detected concentrations for these analytes less than or equal to the CRQL in associated samples have been reported at the CRQL and qualified "U".

Matrix spike, laboratory duplicate, and Laboratory Control Sample analyses were within control limits.

Concentrations for the following target analytes exceeded the calibration range in the initial analysis for the samples listed below. These samples were reanalyzed at dilution in order to quantitate these analytes within the calibration range. Results were reported from the dilutions.

| Sample(s)                      | Analyte        | Dilution |
|--------------------------------|----------------|----------|
| MCOAL1, MCOAM3, MCOAM8, MCOAN5 | Fe             | 2X       |
| MCOAK3, MCOAL1, MCOAN6         | manganese (Mn) | 2X       |

The percent relative intensity (%RI) for internal standard bismuth was outside the upper control limit (>125%) in the initial analyses of sample MCOAL0. This sample was reanalyzed at a two-fold (2X) dilution with the %RI within control limits for this standard. Associated analyte lead was reported from the diluted analysis without qualification. Associated analyte thallium was reported from the diluted analysis and qualified as estimated as it was below the elevated CRQL.

The %RIs for internal standard scandium were outside the upper control limit (>125%) in the initial analyses of all samples. These sample were reanalyzed at two-fold (2X) dilutions with similar results for samples MCOAJ8, MCOAK3, MCOAM3, MCOAM8, MCOAN5, MCOAN6 and MCOAS9 and %RIs within control limits for samples MCOAK8, MCOAL0, MCOAL1, MCOAN3 and MCOAS8. No reported target analytes were associated with this internal standard. No data were qualified.

Results reported for field duplicate pair MCOAS8/MCOAN3 were comparable (within control limits of 25 Relative Percent Difference (RPD) or  $\pm$  CRQL) for all analytes except barium (Ba), chromium (Cr), cobalt (Co), copper (Cu), Fe, Mn, nickel (Ni) and zinc (Zn). No data were qualified based on field duplicate precision.

Results reported for field duplicate pair MCOAS9/MCOAK8 were comparable (within control limits of 25 Relative Percent Difference (RPD) or  $\pm$  CRQL) for all analytes. No data were qualified based on field duplicate precision.

Sample calculation checks were performed on sample MCOAJ8. All calculated results had RPDs less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation in addition to laboratory quality control samples.

**Glossary of Inorganic Data Qualifier Codes**

---

Validation    In order of descending precedence. Only one of these qualifiers may apply to any  
Qualifiers    result.

---

- R            The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.
- UJ           The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
- U            The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit
- B            The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.
- J            The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+           The result is an estimated quantity, but the result may be biased high.
- J-           The result is an estimated quantity, but the result may be biased low.

### Overview

This data package consisted of fourteen (14) soil samples and two (2) sediment samples analyzed for metals by ICP-AES and ICP-MS and for mercury (Hg) by cold vapor atomic absorption technique.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4. Metals aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) are analyzed by ICP-AES with the remaining standard target analyte list (TAL) metals analyzed by ICP-MS.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated October 20, 2020.

### Summary

No significant data quality outliers or technical deficiencies were identified that would require rejection of sample results. Internal standard relative intensity and serial dilution issues required estimation of sample data.

### Minor Problems

Percent relative intensities (%RIs) for internal standard bismuth were outside the upper control limit (>125%) in the initial analyses of sample MCOAP4 and MCOAQ5. These sample were reanalyzed at two-fold (2X) dilutions with %RIs within control limits for these standards. The case narrative incorrectly states the %RIs were outside control limits for these dilutions. Associated analyte antimony (Sb) was reported from the initial analysis. Results for the diluted analysis were not available for reporting. The detected concentration for Sb in sample MCOAP4 and the quantitation limit for Sb in sample MCOAQ5 are estimated and have been qualified "J" and "UJ", respectively.

The percent difference (%D) in the ICP-MS serial dilution analysis was outside the control limit (>10%) for manganese (Mn) and vanadium (V) in sample MC0AJ9. Detected concentrations for Mn and V are estimated in this sample and have been qualified "J".

### Notes

Detected concentrations for target analytes less than the Contract Required Quantitation Limits (CRQLs) are estimated and have been qualified "J".

Target analyte Sb has been detected in laboratory blanks associated with the samples in this SDG. Target analyte Hg has been detected in laboratory blanks associated with the samples in this SDG. Detected concentrations for these analytes less than or equal to the CRQL in associated samples have been reported at the CRQL and qualified "U".

Target analyte Hg matrix spike, laboratory duplicate and Laboratory Control Sample analyses were within control limits.

The matrix spike recovery was low (<75%) for lead (Pb) in sample MC0AJ9. The initial concentration of Pb was greater than four times (>4X) the amount of the spike added. No data were qualified.

Concentrations for the following target analytes exceeded the calibration range in the initial analysis for the samples listed below. These samples were reanalyzed at dilution in order to quantitate these analytes within the calibration range. Results were reported from the dilutions.

| Sample(s)                      | Analyte   | Dilution |
|--------------------------------|-----------|----------|
| MC0AL8, MC0AL9, MC0AP3, MC0AP4 | Fe        | 5X       |
| MC0AQ5                         | Al, Fe    | 2X       |
| MC0AL8                         | Pb        | 2X       |
| MC0AL9, MC0AP3                 |           | 5X       |
| MC0AP4                         |           | 10X      |
| MC0AL9                         | Mn        | 2X       |
| MC0AP3, MC0AQ5, MC0AQ6         |           | 5X       |
| MC0AL9, MC0AQ5                 | zinc (Zn) | 2X       |
| MC0AP3                         |           | 5X       |
| MC0AP4                         | Hg        | 5X       |

The %RIs for the internal standards listed below were outside the upper control limit (>125%) in the initial analyses of the samples shown. These samples were reanalyzed at two-fold (2X) dilutions with %RIs within control limits for these standards. The case narrative incorrectly states the %RIs were outside control limits for the dilutions. Associated analytes shown were reported from the diluted analyses without qualification.

| Internal Standard | Associated Analyte(s) | Sample(s)  |
|-------------------|-----------------------|--|
| Scandium          | Mn                    | MC0AJ9, MC0AK9, MC0AL3, MC0AL9, MC0AM4, MC0AN4, MC0AN8, MC0AN9, MC0AP4, MC0AS3, MC0AS4 |
| Terbium           | Barium (Ba)           | MC0AQ5   |
| Bismuth           | Pb, thallium (Tl)     | MC0AQ5   |
|                   | Tl                    | MC0AP4   |

The %RI for internal standard holmium was outside the upper control limit (>125%) in the initial analysis of sample MC0AQ5. This sample was reanalyzed with the %RI within control limits. No reported target analytes were associated with this internal standard.

Sediment samples MC0AQ5 and MC0AQ6 contained less than thirty percent (<30%) solids. These samples were re-digested at higher sample weights. No data were qualified.

Sample calculation checks were performed on sample MC0AJ9. All calculated results had RPDs less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation in addition to laboratory quality control samples.

**Glossary of Inorganic Data Qualifier Codes**

---

Validation    In order of descending precedence. Only one of these qualifiers may apply to any  
Qualifiers    result.

---

- R            The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.
- UJ           The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
- U            The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit
- B            The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.
- J            The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+           The result is an estimated quantity, but the result may be biased high.
- J-           The result is an estimated quantity, but the result may be biased low.

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49088/EPW15007/MC0AJ9

Lab Name: CHEMTEX

Sample Number: MC0AL3

Method: Mercury by Cold Vapor

Matrix: Soil

MA Number:

Sample Location: NL-2020-SS-38

pH:

Sample Date: 09/29/2020

Sample Time: 14:00:00

% Moisture:

% Solids: 83.4

| Analyte Name | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |

### Overview

This data package consisted of six (6) soil samples and four (4) sediment samples analyzed for metals by ICP-AES, ICP-MS and mercury (Hg) by cold vapor atomic absorption technique and two (2) surface water samples and two (2) ground water samples analyzed for metals by ICP-MS.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4. For soil samples, the metals aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) are analyzed by ICP-AES with the remaining standard target analyte list (TAL) metals analyzed by ICP-MS. All TAL metals were analyzed by ICP-MS for the water matrices.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated October 23, 2020.

### Summary

No significant data quality outliers or technical deficiencies were identified that would require rejection of sample results. Matrix spike, internal standard relative intensity, and serial dilution issues required estimation of sample data.

### Minor Problems

The ICP-MS matrix spike recovery was low (<75%) for silver (Ag) in water sample MCOAR6. The post-digestion spike recovery was within control limits. The quantitation limit for Ag is estimated in this sample and has been qualified "UJ".

Percent relative intensities for internal standard scandium were outside the upper control limit (>125%) in the initial analyses of samples MCOAK4, MCOAK5, MCOAK7, MCOAM9, MCOAN0, MCOAN2, MCOAP9 and MCOAQ0. These sample were reanalyzed at two-fold (2X) dilutions with similar results for samples MCOAM9 and MCOAN0. Percent relative intensities for the dilutions were within control limits for the remaining samples. Detected concentrations for associated analyte chromium (Cr) are estimated in samples MCOAM9 and MCOAN0 and have been qualified "J". Detected concentrations for Cr in the remaining samples have been reported from the diluted analyses without qualification.

Percent relative intensities for internal standard bismuth were outside the upper control limit (>125%) in the initial analyses of samples MCOAK4, MCOAK5, MCOAQ2 and MCOAQ3. These sample were reanalyzed at two-fold (2X) dilutions with similar results for samples MCOAQ2 and MCOAQ3. Percent relative intensities for the dilutions were within control limits for samples MCOAK4 and MCOAK5. Detected concentrations for associated analyte lead (Pb) are estimated in samples MCOAQ2 and MCOAQ3 and have been qualified "J". Quantitation limits for associated analyte thallium (Tl) are estimated in samples MCOAQ2 and MCOAQ3 and have been qualified "UJ". Detected concentrations for Pb in samples MCOAK4 and MCOAK5 have been reported from the diluted analyses without qualification.

Percent differences (%Ds) in the ICP-MS serial dilution analysis were outside the control limit (>10%) for Pb, Ag, and vanadium (V) in soil sample MCOAK4. Detected concentrations for these analytes are estimated in this sample and have been qualified "J".

Percent differences (%Ds) in the ICP-MS serial dilution analysis were outside the control limit (>10%) for Mg, K, and Na in water sample MCOAR6. Detected concentrations for these analytes are estimated in this sample and have been qualified "J".

### **Notes**

Detected concentrations for target analytes less than the Contract Required Quantitation Limits (CRQLs) are estimated and have been qualified "J".

Antimony (Sb), arsenic (As), barium (Ba), beryllium (Be), Cr, cobalt (Co), selenium (Se), Tl, and V have been detected in laboratory blanks associated with the samples in this SDG. Target analyte Hg has been detected in laboratory blanks associated with the samples in this SDG. Detected concentrations for these analytes less than or equal to the CRQL in associated samples have been reported at the CRQL and qualified "U".

Target analyte Hg matrix spike, laboratory duplicate, and Laboratory Control Sample analyses were within control limits.

The matrix spike recovery was outside control limits for Pb in soil sample MCOAK4. The initial concentration of Pb was greater than four times (>4X) the amount of the spike added. No data were qualified.

Sediment samples MCOAQ2 and MCOAQ3 contained less than thirty percent (<30%) solids. These samples were digested with higher sample weights. No data were qualified.

Concentrations for the following target analytes exceeded the calibration range in the initial analysis for the samples listed below. These samples were reanalyzed at dilution in order to quantitate these analytes within the calibration range. Results were reported from the dilutions.

| Sample(s)              | Analyte(s)     | Dilution |
|------------------------|----------------|----------|
| MCOAK5, MCOAM9, MCOANO | Fe             | 2X       |
| MCOAK7                 | Pb             | 2X       |
| MCOAN2, MCOAQ3         | Manganese (Mn) | 2X       |
| MCOAR6                 | Ca, Mn         | 5X       |
| MCOAQ2                 | Mn             | 5X       |
| MCOAQ3                 | Cr             | 2X       |
| MCOAQ3                 | Ni, Zn         | 5X       |

Sample calculation checks were performed on soil sample MCOAK4 and water sample MCOARO. All calculated results had RPDs less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation in addition to laboratory quality control samples.

### **Glossary of Inorganic Data Qualifier Codes**

---

Validation Qualifiers In order of descending precedence. Only one of these qualifiers may apply to any result.

---

- R The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.
- UJ The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
- U The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit
- B The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.
- J The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+ The result is an estimated quantity, but the result may be biased high.
- J- The result is an estimated quantity, but the result may be biased low.

### Overview

This data package consisted of five (5) sediment samples, including a field duplicate pair, analyzed for metals by ICP-AES and ICP-MS and for mercury (Hg) by cold vapor atomic absorption technique. In addition, four (4) surface water samples, including a field duplicate pair, and three (3) ground water samples, including a field duplicate pair, were analyzed for total metals by ICP-MS.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4. Metals aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) are analyzed by ICP-AES with the remaining standard target analyte list (TAL) metals analyzed by ICP-MS for the soil matrix. All TAL metals were analyzed by ICP-MS for the water matrices.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated October 28, 2020 and additional information dated November 2, 2020 and November 12, 2020.

### Summary

No significant data quality outliers or technical deficiencies were identified that would require rejection of sample results. Laboratory duplicate, serial dilution, and blank contaminant issues required qualification of sample data.

### Minor Problems

The Relative Percent Difference (RPD) in the laboratory duplicate analysis was outside control limits of twenty (20) RPD or  $\pm$  Contract Required Quantitation Limit (CRQL) if results are less than 5X the CRQL for nickel (Ni) in water sample MCOAQ9. The detected concentration for Ni is estimated in this sample and has been qualified "J".

The percent difference (%D) in the ICP-MS serial dilution analysis was outside the control limit (>10%) for lead (Pb) in sediment sample MCOAP8. The detected concentration for Pb is estimated in this sample and has been qualified "J".

Percent differences (%Ds) in the ICP-MS serial dilution analysis were outside the control limit (>10%) for Mg, manganese (Mn) and Na in water sample MCOAQ9. Detected concentrations for these analytes are estimated in this sample and have been qualified "J".

### **Notes**

Detected concentrations for target analytes less than the CRQLs are estimated and have been qualified "J".

Aluminum (Al), antimony (Sb), arsenic (As), beryllium (Be), cadmium (Cd) chromium (Cr), cobalt (Co), Fe, Pb, selenium (Se), and vanadium (V) have been detected in laboratory blanks associated with the samples in this SDG. Target analyte Hg has been detected in laboratory blanks associated with the samples in this SDG. Detected concentrations for these analytes less than or equal to the CRQL in associated samples have been reported at the CRQL and qualified "U".

Target analyte Hg matrix spike, ICP-AES and ICP-MS laboratory duplicate for the sediment matrix, Hg laboratory duplicate and Laboratory Control Sample analyses were within control limits.

The matrix spike recovery was outside control limits for Pb in soil sample MCOAP8. The initial concentration of Pb was greater than four times (>4X) the amount of the spike added. No data were qualified.

The percent relative intensity (%RI) for internal standard scandium was outside the upper control limit (>125%) in the initial analyses of sample MCOAP8. This sample was reanalyzed at a two-fold (2X) dilution with the %RI within control limits for this standard. Associated analyte V was reported from the diluted analysis without qualification.

Concentrations for the following target analytes exceeded the calibration range in the initial analysis for the samples listed below. These samples were reanalyzed at dilution in order to quantitate these analytes within the calibration range. Results were reported from the dilutions.

| Sample(s) | Analyte(s) | Dilution |
|-----------|------------|----------|
| MCOAP8    | Mn         | 2X       |
| MCOAR3    | Mn, Na     | 5X       |

Sediment samples MCOAP8, MCOAQ4 and MCOAT5 contained less than fifty percent (<50%) solids but greater than thirty percent (>30%) solids. No data were qualified based on this finding.

Results reported for ground water field duplicate pair MCOAR8/MCOAT4 were comparable (within control limits of 25 RPD or  $\pm$  CRQL) for all analytes except Al and Fe. No data were qualified based on field duplicate precision.

Results reported for surface water field duplicate pair MCOAQ7/MCOAW2 were comparable (within control limits of RPD or  $\pm$  CRQL) for all analytes except Hg. No data were qualified based on field duplicate precision.

Results reported for sediment field duplicate pair MCOAQ4/MCOAT5 were comparable (within control limits of 25 RPD or  $\pm$  CRQL) for all analytes. No data were qualified based on field duplicate precision.

Sample calculation checks were performed on sediment sample MCOAP6 and water sample MCOAQ7. All calculated results had RPDs less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation in addition to laboratory quality control samples.

### **Glossary of Inorganic Data Qualifier Codes**

---

|                       |  |
|-----------------------|--|
| Validation Qualifiers | In order of descending precedence. Only one of these qualifiers may apply to any result. |
|-----------------------|--|

---

- |    |   |
|----|---|
| R  | The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample. |
| UJ | The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.                          |
| U  | The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit  |
| B  | The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.   |
| J  | The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.                              |
| J+ | The result is an estimated quantity, but the result may be biased high.   |
| J- | The result is an estimated quantity, but the result may be biased low.  |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49088/EPW15007/MC0AP6

Lab Name: CHEMTEX

Sample Number: MC0AP6

Method: Mercury by Cold Vapor

Matrix: Soil

MA Number:

Sample Location: NL-2020-SD-13

pH:

Sample Date: 10/06/2020

Sample Time: 09:10:00

% Moisture:

% Solids: 61.7

| Analyte Name | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |

Norwood Landfill  
49088 PC0AL1

### Overview

This data package consisted of three (3) soil samples for analysis of tetra through octa chlorinated dibenzo-p-dioxins (CDDs) and chlorinated dibenzofurans (CDFs) by High Resolution Gas Chromatography/High Resolution Mass Spectrometry (HRGC/HRMS). The sample set included one (1) field duplicate pair.

Analyses were performed by Analytical Resources, Inc. (ARI) through the Contract Laboratory Program (CLP) according to Statement of Work (SOW) HRSM01.2.

Data were validated according to the National Functional Guidelines for High Resolution Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated November 11, 2020.

### Summary

No significant data quality outliers or technical deficiencies were identified that would require rejection of sample results. Less significant data quality outlier requiring estimation of sample result was identified including, but not limited to, ion abundance ratio outside control limit and results exceeding the upper calibration limit.

**Minor Problem**

The laboratory reported ion abundance ratios outside the theoretical criteria (within  $\pm 15\%$ ) for the following analytes in the samples listed below. Reported results for these target analytes are the Estimated Maximum Possible Concentration (EMPC) and have been qualified "Z" by the validator. These values are not included in the Toxicity Equivalent (TEQ) results.

| Sample | Analyte  |
|--------|--|
| PC0AL1 | 2,3,7,8-TCDD, 1,2,3,7,8-PeCDF, 1,2,3,7,8,9-HxCDF, 2,3,4,6,7,8-HxCDF                      |
| PC0AS4 | 2,3,7,8-TCDD, 2,3,4,7,8-PeCDF, 1,2,3,7,8,9-HxCDF, 2,3,4,6,7,8-HxCDF, 1,2,3,4,7,8,9-HpCDF |
| PC0AS5 | 2,3,7,8-TCDD, 2,3,4,7,8-PeCDF, 1,2,3,6,7,8-HxCDF, 1,2,3,4,7,8,9-HpCDF                    |

Detected results for the OCDD in samples PC0AL1, PC0AS4, and PC0AS5 exceeded the upper limit of the calibration range. Further dilution for OCDD/OCDF is not required according to HRSM01.2. The result for these analytes in these samples are estimated and have been qualified "J".

**Notes**

Target analyte detected concentrations below Contract Required Quantitation Limits (CRQLs) are estimated and have been qualified "J".

All derived total homologue values are considered estimated and have been qualified "J" or "UJ".

TEQ and total homologue results reported by the laboratory are derived using sample data prior to evaluation for blank contamination and according to the HRSM01.2 Statement of Work requirements. Totals and TEQs have not been recalculated by the validator. No action was taken by the validator based on this finding.

The laboratory identified some analytes with an Estimated Detection Limit (EDL) less than the sample adjusted Method Detection Limit (MDL), qualified by laboratory as "UM". Values for these target analytes were reported at the sample adjusted MDL per HRSM01.2. No data were qualified based on this finding.

No second column confirmation was required for 2,3,7,8-TCDF as the [RTX-Dioxin2] analytical column used by the laboratory provides sufficient resolution. Documentation supporting this laboratory determination is provided within the data package.

The method blank was free from contamination except for OCDD reported at  $< 3 \times$  CRQL. Sample results for OCDD were  $>$  CRQL and  $>$  blank result. No data were qualified due to method blank contamination.

Accuracy and precision criteria were met by the laboratory in the initial and continuing calibration verification standard analyses associated with the samples in this SDG.

Percent recoveries and Relative Percent Differences (RPDs) in Laboratory Control Sample/Laboratory Control Sample Duplicate (LCS/LCSD) analysis were within control limits. No data were qualified based on LCS/LCSD precision or accuracy.

Recoveries of all labeled and cleanup standards were within the control limits for all analyses.

Results reported for field duplicate pair PCOAS4/PCOAS5 were comparable except 2,3,7,8-TCDF. No data were qualified based on field duplicate precision.

The laboratory noted that samples PCOAL1, PCOAS4, and PCOAS5 contained clay and clumps, making them difficult to homogenize.

Manual integrations were performed and identified by the laboratory. A subset of these was evaluated and had been found to be accurate and consistent. No action was taken based on manual integrations.

Sample calculation checks were performed on sample PCOAL1. All calculated results had Relative Percent Differences (RPDs) less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation to laboratory quality control samples.

#### **Glossary of Data Qualifier Codes**

|    |   |
|----|---|
| U  | The analyte was analyzed for but was not detected above the level of the reported sample quantitation limit.  |
| J  | The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.  |
| J+ | The result is an estimated quantity, but the result may be biased high.   |
| J- | The result is an estimated quantity, but the result may be biased low.  |
| B  | The result is presumed a blank contaminant. This qualifier is used only for drinking water samples.   |
| UJ | The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.   |
| R  | The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.   |
| Z  | The isomer was identified with an ion ratio outside the 15% theoretical ion abundance ratio; the associated numerical value is reported as the Estimated Maximum Possible Concentration (EMPC) and is considered estimated. |

### Overview

This data package consisted of nineteen (19) soil samples analyzed for semivolatile, Polycyclic Aromatic Hydrocarbons (PAHs) by Selected Ion Monitoring (SIM), pesticides, and Aroclors and thirteen (13) soil samples and one (1) trip blank analyzed for low volatiles.

Analyses were performed by Chemtech Consulting Group (CHM) through the Contract Laboratory Program (CLP) according to Statement of Work (SOW) SOM02.4.

Data were validated according to the National Functional Guidelines for Organic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Label S4VEM (Stage\_4\_Validation\_Electronic\_Manual).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated December 2, 2020.

### Summary

Significant dual column precision outliers were identified that resulted in rejection of sample results. Surrogate recovery, internal standard response, and concentration exceeding calibration range required qualification of results.

**Major Problem**

The following analytes had results > CRQL with Percent Difference (%D) > 200% between the dual column analyses. The large %D between the two results may indicate interferences impacting the analyte. Reported results for these analytes in samples listed below have been rejected and qualified "R".

| Fraction  | Samples | Analytes                                    |
|-----------|---------|---|
| Pesticide | COAW5   | cis-Chlordane, trans-Chlordane              |
|           | COAW7   | Heptachlor Epoxide, Endosulfan II           |
|           | COAY3   | Heptachlor Epoxide, 4,4'-DDE, Endosulfan II |
|           | COB35   | Endosulfan II                               |
|           | COB45   | trans-Chlordane                             |
|           | COBE9   | Endosulfan II                               |
|           | COBF0   | Endosulfan II                               |

**Minor Problem**

Percent recoveries for pesticide surrogate decachlorobiphenyl were outside the lower control limit for samples COAW4, COAW7, COAW8, and COB32. Detected results >CRQL for pesticides are estimated and have been qualified "J-". Quantitation limits are estimated and have been qualified "UJ".

Area responses for volatile internal standard 1,2-dichlorobenzene-d4 were outside the lower control limit for samples COAW4, COAW7, COAW8, COAY5, and COBF0. Results for samples COAY5 and COBF0 were reported from the reanalysis and results for other samples were reported from the initial analysis. The associated analytes were not detected in these samples. Quantitation limits are estimated and have been qualified "UJ".

The following analytes exceeded calibration range in the analysis of samples listed below; the samples were not reanalyzed at further dilution. Detected results are estimated and have been qualified "J".

| Fraction | Sample | DF | Analyte  |
|----------|--------|----|--|
| PAH      | COAW8  | 5x | Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Benzo(g,h,i)perylene   |
|          | COAX2  | 5x | Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene |
|          | COB35  | 5x | Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene               |
|          | COB40  | 5x | Phenanthrene, Fluoranthene, Pyrene, Benzo(b)fluoranthene   |
|          | COB45  | 5x | Fluoranthene, Pyrene, Benzo(b)fluoranthene   |
|          | COBE9  | 5x | Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene   |

**Notes**

Target analytes detected at concentrations below Contract Required Quantitation Limits (CRQLs) are estimated and have been qualified "J".

Pesticide results with Percent Difference (%D) between the two (2) analytical columns of > 25.0% and < 200% are estimated and have been qualified "J". The lower of the two (2) column result is reported.

For the volatile fraction, method blanks VBLK62 and VBLK79 and storage blank VHBLK02 were free from contamination. Method blanks VBLK03 and VBLK31 reported detected concentrations of methylene chloride and 4-methyl-2-pentanone less than the CRQL; method blanks VBLK05 and VBLK30 and storage blank VHBLK01 reported detected concentrations of methylene chloride less than the CRQL. Detected concentrations of methylene chloride less than the CRQL in the associated samples have been reported at CRQL and qualified "U". 4-Methyl-2-pentanone was not detected in the associated samples.

Method blanks were free from contamination for other fractions.

Trip blank COBF1 reported detected concentration of 2-hexanone less than the CRQL. 2-Hexanone was not detected in the associated samples.

Laboratory Control Samples (LCSs) reported recoveries of spiked analytes within control limits. No data were qualified based on LCS accuracy.

Matrix Spikes/Matrix Spike Duplicates (MSs/MSDs) reported recoveries and Relative Percent Differences (RPDs) of spiked analytes within control limits except for recoveries of Aroclor-1016 and Aroclor-1260. No data were qualified based on MS/MSD accuracy and precision.

Percent recoveries for the following DMC/surrogate were outside the upper control limit for samples listed below. The associated analytes were not detected in these samples. Quantitation limits are not qualified.

| <b>Fraction</b> | <b>DMC/Surrogate</b>   | <b>Affected Samples</b> |
|-----------------|------------------------|-------------------------|
| Volatile        | 1,2-Dichloropropane-d6 | C0AW4, C0AW7, C0AW8     |
| Aroclor         | Decachlorobiphenyl     | C0B35                   |

Concentrations of the following analytes exceeded the calibration range in the initial analysis of samples listed. These samples were reanalyzed at dilution in order to quantitate these analytes within the calibration range and the analytes were reported from the dilutions. There is no indication that these exceedance issues impacted subsequent sample analyses.

| Fraction  | Sample | DF   | Analyte  |
|-----------|--------|------|--|
| PAH       | COAW4  | 2x   | Fluoranthene, Benzo(b)fluoranthene   |
|           | COAW5  | 5x   | Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene |
|           | COAW8  | 5x   | Anthracene, Benzo(k)Fluoranthene, , Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene   |
|           | COAX2  | 5x   | Acenaphthene, Anthracene, Dibenzo(a,h)anthracene   |
|           | COAY3  | 5x   | Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene   |
|           | COAY7  | 5x   | Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene   |
|           | COB32  | 2x   | Fluoranthene, Pyrene, Benzo(b)fluoranthene   |
|           | COB35  | 5x   | Phenanthrene, Dibenzo(a,h)anthracene   |
|           | COB40  | 5x   | Benzo(a)anthracene, Chrysene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene             |
|           | COB44  | 2x   | Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene   |
|           | COB45  | 5x   | Phenanthrene, Benzo(a)anthracene, Chrysene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene                       |
|           | COBE9  | 5x   | Phenanthrene, Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene   |
| Pesticide | COAW7  | 2x   | Heptachlor Epoxide   |
|           |        | 20x  | cis-Chlordane, trans-Chlordane   |
|           | COAY3  | 10x  | Heptachlor, Heptachlor Epoxide   |
|           |        | 100x | cis-Chlordane, trans-Chlordane   |
|           | COB35  | 2x   | cis-Chlordane, trans-Chlordane   |
|           | COB45  | 5x   | Dieldrin   |
|           | COBE9  | 5x   | cis-Chlordane, trans-Chlordane   |
|           | COBF0  | 10x  | cis-Chlordane, trans-Chlordane   |

Chain of Custody Records (COCs) list samples COBE9 and COBF0 as field duplicate; however, COCs did not include reference regarding the identification of the corresponding samples. Therefore, no comparison was made by the validator.

Manual integrations were performed and identified by the laboratory. A subset of these was evaluated and found to be accurate and consistent. No action was taken based on manual integrations.

Tentatively Identified Compounds (TICs) are not reviewed by data validators. The validation qualifiers are applied by EXES electronic validation based on laboratory qualifiers. By definition, all compounds identified as TICs should be treated as tentative identifications and all reported results should be considered estimated.

Sample calculation checks were performed on sample COAW4. All calculated results had Relative Percent Differences (RPDs) less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation to laboratory quality control samples.

#### Glossary of Organic Data Qualifier Codes

| Validation Qualifiers | In order of descending precedence. Only one of these qualifiers may apply to any result.  |
|-----------------------|---|
| R                     | The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.             |
| UJ                    | The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.                                      |
| U                     | The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.   |
| J                     | The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.  |
| J+                    | The result is an estimated quantity, but the result may be biased high.   |
| J-                    | The result is an estimated quantity, but the result may be biased low.  |
| Additional Qualifiers | Additional qualifiers may be combined with other qualifiers.  |
| N                     | The analyte has been "tentatively identified" or "presumptively" as present.  |
| B                     | The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.   |
| C                     | The target Pesticide or Aroclor analyte identification has been confirmed by Gas Chromatography/Mass Spectrometry (GC/MS). This qualifier may be added to other qualifiers. |
| X                     | The target Pesticide or Aroclor analyte identification was not confirmed when GC/MS analysis was performed. This qualifier may be added to other qualifiers.                |

| Hexachloroethane            | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 300               |                 | ug/kg | 300        |          | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Carbazole                   | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0AW4

Lab Name: Chemtech Consulting Group

| Analyte Name                       | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|------------------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Fluoranthene                       | Target       | 66                | J               | ug/kg | 66         | J        | 1.0             | YES        | S4VEM            |
| Pyrene                             | Target       | 71                | J               | ug/kg | 71         | J        | 1.0             | YES        | S4VEM            |
| Butylbenzylphthalate               | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 3,3-Dichlorobenzidine              | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)anthracene                 | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Chrysene                           | Target       | 55                | J               | ug/kg | 55         | J        | 1.0             | YES        | S4VEM            |
| Bis(2-ethylhexyl)phthalate         | Target       | 66                | J               | ug/kg | 66         | J        | 1.0             | YES        | S4VEM            |
| Di-n-octyl phthalate               | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Benzo(b)fluoranthene               | Target       | 75                | J               | ug/kg | 75         | J        | 1.0             | YES        | S4VEM            |
| Benzo(k)fluoranthene               | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)pyrene                     | Target       | 53                | J               | ug/kg | 53         | J        | 1.0             | YES        | S4VEM            |
| Indeno(1,2,3-cd)pyrene             | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Dibenzo(a,h)anthracene             | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Benzo(g,h,i)perylene               | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |

| 1,4-Dioxane                 | Target       | 88                | U               | ug/kg | 88         | U        | 1.0             | YES        | S4VEM            |
| Benzaldehyde                | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Phenol                      | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethyl)ether     | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| 2-Chlorophenol              | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylphenol              | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 310               |                 | ug/kg | 310        |          | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 110               | J               | ug/kg | 110        | J        | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0AW4

Lab Name: Chemtech Consulting Group

| Analyte Name               | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Carbazole                  | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate        | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Fluoranthene               | Target       | 210               | J               | ug/kg | 210        | J        | 1.0             | YES        | S4VEM            |
| Pyrene                     | Target       | 190               | J               | ug/kg | 190        | J        | 1.0             | YES        | S4VEM            |
| Butylbenzylphthalate       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 3,3-Dichlorobenzidine      | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)anthracene         | Target       | 100               | J               | ug/kg | 100        | J        | 1.0             | YES        | S4VEM            |
| Chrysene                   | Target       | 120               | J               | ug/kg | 120        | J        | 1.0             | YES        | S4VEM            |
| Bis(2-ethylhexyl)phthalate | Target       | 1400              |                 | ug/kg | 1400       |          | 1.0             | YES        | S4VEM            |
| Di-n-octyl phthalate       | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0AW4

Lab Name: Chemtech Consulting Group

Sample Number: C0AW7

Method: Aroclors

Matrix: Soil

MA Number:

Sample Location: NLR-SS-104

pH:

Sample Date: 11/10/2020

Sample Time: 10:10:00

% Moisture:

% Solids: 69.5

| Dieldrin            | Target       | 5.0               | UJ              | ug/kg | 5.0        | U        | 1.0             | YES        | S4VEM            |
| 4,4-DDE             | Target       | 1.9               | J               | ug/kg | 1.9        | JP       | 1.0             | YES        | S4VEM            |
| Endrin              | Target       | 5.0               | UJ              | ug/kg | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Endosulfan II       | Target       | 1.5               | J               | ug/kg | 1.5        | JP       | 1.0             | YES        | S4VEM            |
| 4,4-DDD             | Target       | 5.0               | UJ              | ug/kg | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Endosulfan Sulfate  | Target       | 1.1               | J               | ug/kg | 1.1        | JP       | 1.0             | YES        | S4VEM            |
| 4,4-DDT             | Target       | 1.2               | J               | ug/kg | 1.2        | J        | 1.0             | YES        | S4VEM            |
| Methoxychlor        | Target       | 26                | UJ              | ug/kg | 26         | U        | 1.0             | YES        | S4VEM            |
| Endrin ketone       | Target       | 5.0               | UJ              | ug/kg | 5.0        | U        | 1.0             | YES        | S4VEM            |
| Endrin Aldehyde     | Target       | 5.0               | UJ              | ug/kg | 5.0        | U        | 1.0             | YES        | S4VEM            |
| cis-Chlordane       | Target       | 16                | J               | ug/kg | 16         | P        | 1.0             | YES        | S4VEM            |
| trans-Chlordane     | Target       | 13                | J               | ug/kg | 13         | P        | 1.0             | YES        | S4VEM            |
| Toxaphene           | Target       | 260               | UJ              | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0AW4

Lab Name: Chemtech Consulting Group

|                             |                       |                         |                       |
|-----------------------------|-----------------------|-------------------------|-----------------------|
| Sample Number: C0AW8        | Method: Semivolatiles | Matrix: Soil            | MA Number:            |
| Sample Location: NLR-SS-105 | pH:                   | Sample Date: 11/10/2020 | Sample Time: 11:20:00 |
| % Moisture:                 |                       | % Solids: 66.0          |                       |

| Analyte Name                | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|-----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| 1,4-Dioxane                 | Target       | 100               | U               | ug/kg | 100        | U        | 1.0             | YES        | S4VEM            |
| Benzaldehyde                | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| Phenol                      | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethyl)ether     | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| 2-Chlorophenol              | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylphenol              | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 460               |                 | ug/kg | 460        |          | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 67                | J               | ug/kg | 67         | J        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 500               | U               | ug/kg | 500        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 260               | U               | ug/kg | 260        | U        | 1.0             | YES        | S4VEM            |

| 2-Methylphenol              | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 250               |                 | ug/kg | 250        |          | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 67                | J               | ug/kg | 67         | J        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 55                | J               | ug/kg | 55         | J        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 1200              |                 | ug/kg | 1200       |          | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 140               | J               | ug/kg | 140        | J        | 1.0             | YES        | S4VEM            |
| Carbazole                   | Target       | 130               | J               | ug/kg | 130        | J        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0AW4

Lab Name: Chemtech Consulting Group

| Analyte Name                    | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|---------------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Fluoranthene                    | Target       | 2100              |                 | ug/kg | 2100       |          | 1.0             | YES        | S4VEM            |
| Pyrene                          | Target       | 1800              |                 | ug/kg | 1800       |          | 1.0             | YES        | S4VEM            |
| Butylbenzylphthalate            | Target       | 160               | J               | ug/kg | 160        | J        | 1.0             | YES        | S4VEM            |
| 3,3-Dichlorobenzidine           | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)anthracene              | Target       | 800               |                 | ug/kg | 800        |          | 1.0             | YES        | S4VEM            |
| Chrysene                        | Target       | 920               |                 | ug/kg | 920        |          | 1.0             | YES        | S4VEM            |
| Bis(2-ethylhexyl)phthalate      | Target       | 200               | J               | ug/kg | 200        | J        | 1.0             | YES        | S4VEM            |
| Di-n-octyl phthalate            | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Benzo(b)fluoranthene            | Target       | 1200              |                 | ug/kg | 1200       |          | 1.0             | YES        | S4VEM            |
| Benzo(k)fluoranthene            | Target       | 470               |                 | ug/kg | 470        |          | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0AW4

Lab Name: Chemtech Consulting Group

|                             |                       |                         |                       |
|-----------------------------|-----------------------|-------------------------|-----------------------|
| Sample Number: C0AX6        | Method: Semivolatiles | Matrix: Soil            | MA Number:            |
| Sample Location: NLR-SS-113 | pH:                   | Sample Date: 11/10/2020 | Sample Time: 13:50:00 |
| % Moisture:                 |                       | % Solids: 79.1          |                       |

| Analyte Name                | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|-----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| 1,4-Dioxane                 | Target       | 85                | U               | ug/kg | 85         | U        | 1.0             | YES        | S4VEM            |
| Benzaldehyde                | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Phenol                      | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethyl)ether     | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| 2-Chlorophenol              | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylphenol              | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 340               |                 | ug/kg | 340        |          | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |

| Naphthalene                 | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 350               |                 | ug/kg | 350        |          | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 49                | J               | ug/kg | 49         | J        | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Carbazole                   | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate         | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0AW4

Lab Name: Chemtech Consulting Group

| Analyte Name                       | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|------------------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Fluoranthene                       | Target       | 120               | J               | ug/kg | 120        | J        | 1.0             | YES        | S4VEM            |
| Pyrene                             | Target       | 100               | J               | ug/kg | 100        | J        | 1.0             | YES        | S4VEM            |
| Butylbenzylphthalate               | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 3,3-Dichlorobenzidine              | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)anthracene                 | Target       | 61                | J               | ug/kg | 61         | J        | 1.0             | YES        | S4VEM            |
| Chrysene                           | Target       | 61                | J               | ug/kg | 61         | J        | 1.0             | YES        | S4VEM            |
| Bis(2-ethylhexyl)phthalate         | Target       | 72                | J               | ug/kg | 72         | J        | 1.0             | YES        | S4VEM            |
| Di-n-octyl phthalate               | Target       | 400               | U               | ug/kg | 400        | U        | 1.0             | YES        | S4VEM            |
| Benzo(b)fluoranthene               | Target       | 65                | J               | ug/kg | 65         | J        | 1.0             | YES        | S4VEM            |
| Benzo(k)fluoranthene               | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)pyrene                     | Target       | 54                | J               | ug/kg | 54         | J        | 1.0             | YES        | S4VEM            |
| Indeno(1,2,3-cd)pyrene             | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Dibenzo(a,h)anthracene             | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| Benzo(g,h,i)perylene               | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |
| 2,3,4,6-Tetrachlorophenol          | Target       | 210               | U               | ug/kg | 210        | U        | 1.0             | YES        | S4VEM            |

| 2,2-oxybis(1-Chloropropane) | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 400               |                 | ug/kg | 400        |          | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0AW4

Lab Name: Chemtech Consulting Group

| Analyte Name               | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Carbazole                  | Target       | 520               | U               | ug/kg | 520        | U        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate        | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |
| Fluoranthene               | Target       | 68                | J               | ug/kg | 68         | J        | 1.0             | YES        | S4VEM            |
| Pyrene                     | Target       | 68                | J               | ug/kg | 68         | J        | 1.0             | YES        | S4VEM            |
| Butylbenzylphthalate       | Target       | 270               | U               | ug/kg | 270        | U        | 1.0             | YES        | S4VEM            |

| Endosulfan II       | Target       | 0.60              | J               | ug/kg | 0.60       | JP       | 1.0             | YES        | S4VEM            |
| 4,4-DDD             | Target       | 3.9               | U               | ug/kg | 3.9        | U        | 1.0             | YES        | S4VEM            |
| Endosulfan Sulfate  | Target       | 3.9               | U               | ug/kg | 3.9        | U        | 1.0             | YES        | S4VEM            |
| 4,4-DDT             | Target       | 4.6               |                 | ug/kg | 4.6        |          | 1.0             | YES        | S4VEM            |
| Methoxychlor        | Target       | 20                | U               | ug/kg | 20         | U        | 1.0             | YES        | S4VEM            |
| Endrin ketone       | Target       | 3.9               | U               | ug/kg | 3.9        | U        | 1.0             | YES        | S4VEM            |
| Endrin Aldehyde     | Target       | 3.9               | U               | ug/kg | 3.9        | U        | 1.0             | YES        | S4VEM            |
| cis-Chlordane       | Target       | 4.3               | J               | ug/kg | 4.3        | P        | 1.0             | YES        | S4VEM            |
| trans-Chlordane     | Target       | 2.2               | J               | ug/kg | 2.2        | P        | 1.0             | YES        | S4VEM            |
| Toxaphene           | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0AW4

Lab Name: Chemtech Consulting Group

|                             |                       |                         |                       |
|-----------------------------|-----------------------|-------------------------|-----------------------|
| Sample Number: C0AY7        | Method: Semivolatiles | Matrix: Soil            | MA Number:            |
| Sample Location: NLR-SS-124 | pH:                   | Sample Date: 11/11/2020 | Sample Time: 10:40:00 |
| % Moisture:                 |                       | % Solids: 84.3          |                       |

| Analyte Name                | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|-----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| 1,4-Dioxane                 | Target       | 79                | U               | ug/kg | 79         | U        | 1.0             | YES        | S4VEM            |
| Benzaldehyde                | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Phenol                      | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethyl)ether     | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 2-Chlorophenol              | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylphenol              | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 260               |                 | ug/kg | 260        |          | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
