| 1,4-Dioxane                 | Target       | 79                | U               | ug/kg | 79         | U        | 1.0             | YES        | S4VEM            |
| Benzaldehyde                | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Phenol                      | Target       | 97                | J               | ug/kg | 97         | J        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethyl)ether     | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 2-Chlorophenol              | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylphenol              | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 200               | UJ              | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 220               |                 | ug/kg | 220        |          | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Carbazole                   | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate         | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B74

Lab Name: Chemtech Consulting Group

| Analyte Name                       | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|------------------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Fluoranthene                       | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Pyrene                             | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Butylbenzylphthalate               | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| 3,3-Dichlorobenzidine              | Target       | 390               | U               | ug/kg | 390        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)anthracene                 | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Chrysene                           | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-ethylhexyl)phthalate         | Target       | 200               | U               | ug/kg | 200        | U        | 1.0             | YES        | S4VEM            |

**Subject:** Organic Data Validation (S4VEM)  
Norwood Landfill  
49167 C0B79

### Overview

This data package consisted of nineteen (19) soil samples analyzed for semivolatile, Polycyclic Aromatic Hydrocarbons (PAHs) by Selected Ion Monitoring (SIM), pesticides, and Aroclors. In addition, eight (8) of the soil samples were analyzed for low volatiles.

Analyses were performed by Chemtech Consulting Group (CHM) through the Contract Laboratory Program (CLP) according to Statement of Work (SOW) SOM02.4.

Data were validated according to the National Functional Guidelines for Organic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Label S4VEM (Stage\_4\_Validation\_Electronic\_Manual).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated December 8, 2020. Trip blanks C0BF5 (from SDG C0B36) and C0BF8 (from SDG C0B11) are associated with samples in this SDG and used in the evaluation of this data.

### Summary

No significant data quality outliers or technical deficiencies were identified that would require rejection of sample results. Deuterated Monitoring Compound (DMC)/surrogate recovery, continuing calibration verification, blanks, and concentration exceeding calibration range required qualification of data.

**Minor Problems**

Percent recoveries for the following DMC/surrogate were outside the lower control limit for the samples listed below. Detected results >CRQL for analytes in these sample are estimated and have been qualified "J-". Quantitation limits are estimated and have been qualified "UJ".

| Fraction     | DMC / Surrogate    | Affected Samples   |
|--------------|--------------------|--|
| Semivolatile | 1,4-Dioxane-d8     | COB85  |
| Pesticide    | Decachlorobiphenyl | COAY2, COB80, COB81, COB82, COB83, COB84, COB85, COB86, COBG0, COBG2 |

The following analytes failed Percent Difference (%D) criteria in continuing calibration verification analysis. Detected results for the analytes in associated samples are estimated and have been qualified "J". Quantitation limits are estimated and have been qualified "UJ".

| Fraction  | Standard ID             | Affected Analytes                | Associated Samples   |
|-----------|-------------------------|----------------------------------|--|
| PAH       | SSTD0.412,<br>SSTD0.413 | Benzo(a)anthracene<br>, Chrysene | COAW3, COAX0, COAX1, COAX4, COAX5, COAY2,<br>COAY6, COB83, COBF9, COBG0, COBG2 |
| Pesticide | INDA324,<br>INDA327     | 4,4' DDT                         | COB79  |
|           | INDA327                 | Methoxychlor                     | COB79  |

The following analytes exceeded calibration range in the analysis of samples listed below; the samples were not reanalyzed at further dilution. Detected results are estimated and have been qualified "J".

| Fraction | Sample          | DF | Analyte  |
|----------|-----------------|----|--|
| PAH      | COB79           | 5x | Phenanthrene, Fluoranthene, Pyrene, Benzo(b)fluoranthene   |
|          | COB80,<br>COB82 | 5x | Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene   |
|          | COB84           | 5x | Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene,<br>Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene,<br>Benzo(g,h,i)perylene                       |
|          | COB85           | 5x | Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene,<br>Benzo(b)fluoranthene, Benzo(a)pyrene  |
|          | COB90           | 5x | Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene,<br>Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene,<br>Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene |

**Notes**

Target analytes detected at concentrations below Contract Required Quantitation Limits (CRQLs) are estimated and have been qualified "J".

For the volatile fraction, method blanks VBLK05, VBLK06, and VBLK07 and storage blank VHBLK01 reported detected concentrations of methylene chloride less than the CRQL; method blank VBLK08 reported detected concentrations of carbon disulfide and methylene chloride less than the CRQL. Detected concentrations of methylene chloride less than the CRQL in the associated samples have been reported at CRQL and qualified "U". Carbon disulfide was not detected in the associated samples.

Method blanks were free from contamination for other fractions.

Trip blanks COBF5 and COBF8 were free from contamination.

Pesticide results with Percent Difference (%D) between the two (2) analytical columns of > 25.0% and < 200% are estimated and have been qualified "J". The lower of the two (2) column result is reported.

Laboratory Control Samples (LCSs) reported recoveries of spiked analytes within control limits. No data were qualified based on LCS accuracy.

Matrix Spikes/Matrix Spike Duplicates (MSs/MSDs) reported recoveries and Relative Percent Differences (RPDs) of spiked analytes within control limits. No data were qualified based on MS/MSD accuracy and precision.

Concentrations of the following analytes exceeded the calibration range in the initial analysis of samples listed. These samples were reanalyzed at dilution in order to quantitate these analytes within the calibration range and the analytes were reported from the dilutions. There is no indication that these exceedance issues impacted subsequent sample analyses.

| Fraction | Sample       | DF  | Analyte  |
|----------|--------------|-----|--|
| PAH      | COAW3        | 2x  | Fluoranthene, Pyrene, Benzo(b)fluoranthene   |
|          | COB79        | 5x  | Anthracene, Benzo(a)anthracene, Chrysene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene   |
|          | COB80, COB82 | 5x  | Phenanthrene, Benzo(a)anthracene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene   |
|          | COB81        | 10x | Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene |
|          | COB84        | 5x  | Anthracene, Benzo(k)fluoranthene, Dibenzo(a,h)anthracene   |
|          | COB85        | 5x  | Phenanthrene, Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene   |
|          | COB86        | 5x  | Phenanthrene, Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene   |
|          | COB90        | 5x  | Fluorene, Anthracene, Dibenzo(a,h)anthracene   |

Chain of Custody Records (COCs) list samples COBG0 and COBG2 as field duplicate; however, COCs did not include reference regarding the identification of the corresponding samples. Therefore, no comparison was made.

Manual integrations were performed and identified by the laboratory. A subset of these was evaluated and found to be accurate and consistent. No action was taken based on manual integrations.

Tentatively Identified Compounds (TICs) are not reviewed by data validators. The validation qualifiers are applied by EXES electronic validation based on laboratory qualifiers. By definition, all compounds identified as TICs should be treated as tentative identifications and all reported results should be considered estimated.

Sample calculation checks were performed on sample COAW3. All calculated results had Relative Percent Differences (RPDs) less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation to laboratory quality control samples.

#### Glossary of Organic Data Qualifier Codes

|                       |   |
|-----------------------|---|
| Validation Qualifiers | In order of descending precedence. Only one of these qualifiers may apply to any result.  |
| R                     | The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.             |
| UJ                    | The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.                                      |
| U                     | The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit.   |
| J                     | The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.  |
| J+                    | The result is an estimated quantity, but the result may be biased high.   |
| J-                    | The result is an estimated quantity, but the result may be biased low.  |
| Additional Qualifiers | Additional qualifiers may be combined with other qualifiers.  |
| N                     | The analyte has been "tentatively identified" or "presumptively" as present.  |
| B                     | The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.   |
| C                     | The target Pesticide or Aroclor analyte identification has been confirmed by Gas Chromatography/Mass Spectrometry (GC/MS). This qualifier may be added to other qualifiers. |
| X                     | The target Pesticide or Aroclor analyte identification was not confirmed when GC/MS analysis was performed. This qualifier may be added to other qualifiers.                |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

|                             |                       |                         |                       |
|-----------------------------|-----------------------|-------------------------|-----------------------|
| Sample Number: C0AW3        | Method: Semivolatiles | Matrix: Soil            | MA Number:            |
| Sample Location: NLR-SS-100 | pH:                   | Sample Date: 11/17/2020 | Sample Time: 08:10:00 |
| % Moisture:                 |                       | % Solids: 74.0          |                       |

| Analyte Name                | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|-----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| 1,4-Dioxane                 | Target       | 90                | U               | ug/kg | 90         | U        | 1.0             | YES        | S4VEM            |
| Benzaldehyde                | Target       | 440               | U               | ug/kg | 440        | U        | 1.0             | YES        | S4VEM            |
| Phenol                      | Target       | 440               | U               | ug/kg | 440        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethyl)ether     | Target       | 440               | U               | ug/kg | 440        | U        | 1.0             | YES        | S4VEM            |
| 2-Chlorophenol              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylphenol              | Target       | 440               | U               | ug/kg | 440        | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 440               | U               | ug/kg | 440        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 440               | U               | ug/kg | 440        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 440               | U               | ug/kg | 440        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 440               | U               | ug/kg | 440        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 440               | U               | ug/kg | 440        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 440               | U               | ug/kg | 440        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 330               |                 | ug/kg | 330        |          | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 440               | U               | ug/kg | 440        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 440               | U               | ug/kg | 440        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 440               | U               | ug/kg | 440        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |

| 2,2-oxybis(1-Chloropropane) | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 310               |                 | ug/kg | 310        |          | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

| Analyte Name               | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Carbazole                  | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate        | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Fluoranthene               | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Pyrene                     | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Butylbenzylphthalate       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 3,3-Dichlorobenzidine      | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)anthracene         | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Chrysene                   | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-ethylhexyl)phthalate | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Di-n-octyl phthalate       | Target       | 430               | U               | ug/kg | 430        | U        | 1.0             | YES        | S4VEM            |
| Benzo(b)fluoranthene       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Benzo(k)fluoranthene       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)pyrene             | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Indeno(1,2,3-cd)pyrene     | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Dibenzo(a,h)anthracene     | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Benzo(g,h,i)perylene       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,3,4,6-Tetrachlorophenol  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |

| Bis(2-Chloroethoxy)methane  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 350               |                 | ug/kg | 350        |          | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

| Analyte Name               | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Carbazole                  | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate        | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Fluoranthene               | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Pyrene                     | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Butylbenzylphthalate       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 3,3-Dichlorobenzidine      | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)anthracene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Chrysene                   | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-ethylhexyl)phthalate | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Di-n-octyl phthalate       | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Benzo(b)fluoranthene       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |

| trans-Chlordane     | Target       | 0.35              | J               | ug/kg | 0.35       | JP       | 1.0             | YES        | S4VEM            |
| Toxaphene           | Target       | 230               | UJ              | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

|                             |                       |                         |                       |
|-----------------------------|-----------------------|-------------------------|-----------------------|
| Sample Number: C0AY2        | Method: Semivolatiles | Matrix: Soil            | MA Number:            |
| Sample Location: NLR-SS-118 | pH:                   | Sample Date: 11/17/2020 | Sample Time: 13:45:00 |
| % Moisture:                 |                       | % Solids: 72.7          |                       |

| Analyte Name                | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|-----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| 1,4-Dioxane                 | Target       | 92                | U               | ug/kg | 92         | U        | 1.0             | YES        | S4VEM            |
| Benzaldehyde                | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Phenol                      | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethyl)ether     | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 2-Chlorophenol              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylphenol              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Carbazole                   | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

Sample Number: C0B79

Method: Aroclors

Matrix: Soil

MA Number:

Sample Location: NLR-CS-148

pH:

Sample Date: 11/12/2020

Sample Time: 13:15:00

% Moisture:

% Solids: 79.1

| Analyte Name | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |

| Naphthalene                 | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 120               | J               | ug/kg | 120        | J        | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 170               | J               | ug/kg | 170        | J        | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

| Analyte Name               | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Carbazole                  | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate        | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Fluoranthene               | Target       | 360               | J               | ug/kg | 360        | J        | 1.0             | YES        | S4VEM            |
| Pyrene                     | Target       | 290               |                 | ug/kg | 290        |          | 1.0             | YES        | S4VEM            |
| Butylbenzylphthalate       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 3,3-Dichlorobenzidine      | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)anthracene         | Target       | 150               | J               | ug/kg | 150        | J        | 1.0             | YES        | S4VEM            |
| Chrysene                   | Target       | 170               | J               | ug/kg | 170        | J        | 1.0             | YES        | S4VEM            |
| Bis(2-ethylhexyl)phthalate | Target       | 83                | J               | ug/kg | 83         | J        | 1.0             | YES        | S4VEM            |

| cis-Chlordane       | Target       | 23                | J               | ug/kg | 23         | P        | 1.0             | YES        | S4VEM            |
| trans-Chlordane     | Target       | 34                | J               | ug/kg | 34         | P        | 1.0             | YES        | S4VEM            |
| Toxaphene           | Target       | 230               | UJ              | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

|                             |                       |                         |                       |
|-----------------------------|-----------------------|-------------------------|-----------------------|
| Sample Number: C0B82        | Method: Semivolatiles | Matrix: Soil            | MA Number:            |
| Sample Location: NLR-CS-151 | pH:                   | Sample Date: 11/16/2020 | Sample Time: 10:30:00 |
| % Moisture:                 |                       | % Solids: 73.7          |                       |

| Analyte Name                | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|-----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| 1,4-Dioxane                 | Target       | 91                | U               | ug/kg | 91         | U        | 1.0             | YES        | S4VEM            |
| Benzaldehyde                | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Phenol                      | Target       | 120               | J               | ug/kg | 120        | J        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethyl)ether     | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 2-Chlorophenol              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylphenol              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 130               | J               | ug/kg | 130        | J        | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 380               |                 | ug/kg | 380        |          | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 52                | J               | ug/kg | 52         | J        | 1.0             | YES        | S4VEM            |
| Carbazole                   | Target       | 49                | J               | ug/kg | 49         | J        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

| 4,4-DDD             | Target       | 4.5               | UJ              | ug/kg | 4.5        | U        | 1.0             | YES        | S4VEM            |
| Endosulfan Sulfate  | Target       | 4.5               | UJ              | ug/kg | 4.5        | U        | 1.0             | YES        | S4VEM            |
| 4,4-DDT             | Target       | 4.5               | UJ              | ug/kg | 4.5        | U        | 1.0             | YES        | S4VEM            |
| Methoxychlor        | Target       | 23                | UJ              | ug/kg | 23         | U        | 1.0             | YES        | S4VEM            |
| Endrin ketone       | Target       | 4.5               | UJ              | ug/kg | 4.5        | U        | 1.0             | YES        | S4VEM            |
| Endrin Aldehyde     | Target       | 4.5               | UJ              | ug/kg | 4.5        | U        | 1.0             | YES        | S4VEM            |
| cis-Chlordane       | Target       | 2.3               | UJ              | ug/kg | 2.3        | U        | 1.0             | YES        | S4VEM            |
| trans-Chlordane     | Target       | 2.3               | UJ              | ug/kg | 2.3        | U        | 1.0             | YES        | S4VEM            |
| Toxaphene           | Target       | 230               | UJ              | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

|                             |                       |                         |                       |
|-----------------------------|-----------------------|-------------------------|-----------------------|
| Sample Number: C0B83        | Method: Semivolatiles | Matrix: Soil            | MA Number:            |
| Sample Location: NLR-CS-152 | pH:                   | Sample Date: 11/16/2020 | Sample Time: 12:00:00 |
| % Moisture:                 |                       | % Solids: 72.6          |                       |

| Analyte Name                | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|-----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| 1,4-Dioxane                 | Target       | 92                | U               | ug/kg | 92         | U        | 1.0             | YES        | S4VEM            |
| Benzaldehyde                | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Phenol                      | Target       | 88                | J               | ug/kg | 88         | J        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethyl)ether     | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 2-Chlorophenol              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylphenol              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 110               | J               | ug/kg | 110        | J        | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 450               | U               | ug/kg | 450        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 230               | U               | ug/kg | 230        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

|                             |                       |                         |                       |
|-----------------------------|-----------------------|-------------------------|-----------------------|
| Sample Number: C0B84        | Method: Semivolatiles | Matrix: Soil            | MA Number:            |
| Sample Location: NLR-CS-153 | pH:                   | Sample Date: 11/16/2020 | Sample Time: 12:35:00 |
| % Moisture:                 |                       | % Solids: 70.0          |                       |

| Analyte Name                | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|-----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| 1,4-Dioxane                 | Target       | 96                | U               | ug/kg | 96         | U        | 1.0             | YES        | S4VEM            |
| Benzaldehyde                | Target       | 470               | U               | ug/kg | 470        | U        | 1.0             | YES        | S4VEM            |
| Phenol                      | Target       | 88                | J               | ug/kg | 88         | J        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethyl)ether     | Target       | 470               | U               | ug/kg | 470        | U        | 1.0             | YES        | S4VEM            |
| 2-Chlorophenol              | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylphenol              | Target       | 470               | U               | ug/kg | 470        | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 470               | U               | ug/kg | 470        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 470               | U               | ug/kg | 470        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 470               | U               | ug/kg | 470        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 470               | U               | ug/kg | 470        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 470               | U               | ug/kg | 470        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 470               | U               | ug/kg | 470        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 130               | J               | ug/kg | 130        | J        | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 470               | U               | ug/kg | 470        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 470               | U               | ug/kg | 470        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 470               | U               | ug/kg | 470        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |

| 2-Methylphenol              | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| 2,2-oxybis(1-Chloropropane) | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| Acetophenone                | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 170               | J               | ug/kg | 170        | J        | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 66                | J               | ug/kg | 66         | J        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 74                | J               | ug/kg | 74         | J        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 1800              |                 | ug/kg | 1800       |          | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 200               | J               | ug/kg | 200        | J        | 1.0             | YES        | S4VEM            |
| Carbazole                   | Target       | 200               | J               | ug/kg | 200        | J        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate         | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

| Analyte Name                        | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|-------------------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Fluoranthene                        | Target       | 3400              |                 | ug/kg | 3400       |          | 1.0             | YES        | S4VEM            |
| Pyrene                              | Target       | 3000              |                 | ug/kg | 3000       |          | 1.0             | YES        | S4VEM            |
| Butylbenzylphthalate                | Target       | 240               | U               | ug/kg | 240        | U        | 1.0             | YES        | S4VEM            |
| 3,3-Dichlorobenzidine               | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)anthracene                  | Target       | 1700              |                 | ug/kg | 1700       |          | 1.0             | YES        | S4VEM            |
| Chrysene                            | Target       | 1900              |                 | ug/kg | 1900       |          | 1.0             | YES        | S4VEM            |
| Bis(2-ethylhexyl)phthalate          | Target       | 83                | J               | ug/kg | 83         | J        | 1.0             | YES        | S4VEM            |
| Di-n-octyl phthalate                | Target       | 460               | U               | ug/kg | 460        | U        | 1.0             | YES        | S4VEM            |
| Benzo(b)fluoranthene                | Target       | 2200              |                 | ug/kg | 2200       |          | 1.0             | YES        | S4VEM            |

| Acetophenone                | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| 4-Methylphenol              | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| N-Nitroso-di-n-propylamine  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Hexachloroethane            | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Nitrobenzene                | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Isophorone                  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitrophenol               | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dimethylphenol          | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-Chloroethoxy)methane  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dichlorophenol          | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Naphthalene                 | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloroaniline             | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobutadiene         | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Caprolactam                 | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| 4-Chloro-3-methylphenol     | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2-Methylnaphthalene         | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorocyclopentadiene   | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| 2,4,6-Trichlorophenol       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4,5-Trichlorophenol       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 1,1-Biphenyl                | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2-Chloronaphthalene         | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2-Nitroaniline              | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Dimethylphthalate           | Target       | 85                | J               | ug/kg | 85         | J        | 1.0             | YES        | S4VEM            |
| 2,6-Dinitrotoluene          | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthylene              | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 3-Nitroaniline              | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Acenaphthene                | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrophenol           | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitrophenol               | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Dibenzofuran                | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 2,4-Dinitrotoluene          | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Diethylphthalate            | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Fluorene                    | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 4-Chlorophenyl-phenylether  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 4-Nitroaniline              | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| 4,6-Dinitro-2-methylphenol  | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| N-Nitrosodiphenylamine      | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 4-Bromophenyl-phenylether   | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Hexachlorobenzene           | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Atrazine                    | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Pentachlorophenol           | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Phenanthrene                | Target       | 74                | J               | ug/kg | 74         | J        | 1.0             | YES        | S4VEM            |
| Anthracene                  | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

| Analyte Name               | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Carbazole                  | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Di-n-butylphthalate        | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Fluoranthene               | Target       | 78                | J               | ug/kg | 78         | J        | 1.0             | YES        | S4VEM            |
| Pyrene                     | Target       | 68                | J               | ug/kg | 68         | J        | 1.0             | YES        | S4VEM            |
| Butylbenzylphthalate       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| 3,3-Dichlorobenzidine      | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)anthracene         | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Chrysene                   | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Bis(2-ethylhexyl)phthalate | Target       | 110               | J               | ug/kg | 110        | J        | 1.0             | YES        | S4VEM            |
| Di-n-octyl phthalate       | Target       | 420               | U               | ug/kg | 420        | U        | 1.0             | YES        | S4VEM            |
| Benzo(b)fluoranthene       | Target       | 48                | J               | ug/kg | 48         | J        | 1.0             | YES        | S4VEM            |
| Benzo(k)fluoranthene       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Benzo(a)pyrene             | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Indeno(1,2,3-cd)pyrene     | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Dibenzo(a,h)anthracene     | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |
| Benzo(g,h,i)perylene       | Target       | 220               | U               | ug/kg | 220        | U        | 1.0             | YES        | S4VEM            |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW14030/C0B79

Lab Name: Chemtech Consulting Group

|                       |                       |               |              |
|-----------------------|-----------------------|---------------|--------------|
| Sample Number: SBLK73 | Method: Semivolatiles | Matrix: Soil  | MA Number:   |
| Sample Location:      | pH:                   | Sample Date:  | Sample Time: |
| % Moisture:           |                       | % Solids: 100 |              |

| Analyte Name                | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|-----------------------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| 1,4-Dioxane                 | Target       | 67                | U               | ug/kg | 67         | U        | 1.0             | YES        | NV               |
| Benzaldehyde                | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| Phenol                      | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| Bis(2-Chloroethyl)ether     | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| 2-Chlorophenol              | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 2-Methylphenol              | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| 2,2-oxybis(1-Chloropropane) | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| Acetophenone                | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| 4-Methylphenol              | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| N-Nitroso-di-n-propylamine  | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| Hexachloroethane            | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| Nitrobenzene                | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| Isophorone                  | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 2-Nitrophenol               | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 2,4-Dimethylphenol          | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| Bis(2-Chloroethoxy)methane  | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 2,4-Dichlorophenol          | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| Naphthalene                 | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 4-Chloroaniline             | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| Hexachlorobutadiene         | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| Caprolactam                 | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| 4-Chloro-3-methylphenol     | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 2-Methylnaphthalene         | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| Hexachlorocyclopentadiene   | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| 2,4,6-Trichlorophenol       | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 2,4,5-Trichlorophenol       | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 1,1-Biphenyl                | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 2-Chloronaphthalene         | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 2-Nitroaniline              | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| Dimethylphthalate           | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 2,6-Dinitrotoluene          | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| Acenaphthylene              | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 3-Nitroaniline              | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| Acenaphthene                | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 2,4-Dinitrophenol           | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| 4-Nitrophenol               | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| Dibenzofuran                | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 2,4-Dinitrotoluene          | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| Diethylphthalate            | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| Fluorene                    | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 4-Chlorophenyl-phenylether  | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 4-Nitroaniline              | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| 4,6-Dinitro-2-methylphenol  | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |
| N-Nitrosodiphenylamine      | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 1,2,4,5-Tetrachlorobenzene  | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| 4-Bromophenyl-phenylether   | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| Hexachlorobenzene           | Target       | 170               | U               | ug/kg | 170        | U        | 1.0             | YES        | NV               |
| Atrazine                    | Target       | 330               | U               | ug/kg | 330        | U        | 1.0             | YES        | NV               |

### Overview

This data package consisted of nineteen (19) soil samples analyzed for metals by ICP-AES and ICP-MS and for mercury (Hg) by cold vapor atomic absorption technique.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4. Metals aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) are analyzed by ICP-AES with the remaining standard target analyte list (TAL) metals analyzed by ICP-MS.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated December 7, 2020.

Rinsate blank MCOBG3 (from SDG MCOB84) was associated with samples in this SDG and used in the evaluation of this data.

### Summary

No significant data quality outliers or technical deficiencies were identified that would require rejection of sample results. Matrix spike, serial dilution and blank contamination issues required qualification of sample data.

### Minor Problems

The ICP-MS matrix spike recovery was low (<75%) for silver (Ag) in sample MCOAY0. The post-digestion spike recovery was greater than 75%. The detected concentration for Ag is estimated in this sample and has been qualified "J".

The percent difference (%D) in the ICP-AES serial dilution analysis was outside the control limit (>10%) for Fe in sample MCOAY0. The detected concentration for Fe is estimated in this sample and has been qualified "J".

Laboratory instrumentation reported a negative value for selenium (Se) greater than the absolute value of the Method Detection Limit (MDL) in a blank analysis. Quantitation limits for Se are estimated and have been qualified "UJ".

### **Notes**

Detected concentrations for target analytes less than the Contract Required Quantitation Limits (CRQLs) are estimated and have been qualified "J".

Antimony (Sb) has been detected in laboratory blanks associated with the samples in this SDG. Target analyte Hg has been detected in laboratory blanks associated with the samples in this SDG. Detected concentrations for these analytes less than the CRQL in associated samples have been reported at the CRQL and qualified "U".

Rinsate blank MCOBG3 reported concentrations for manganese (Mn) and zinc (Zn) less than the CRQLs. Detected concentrations for these analytes in associated field samples were greater than the CRQLs and not qualified based on these findings.

Target analyte Hg matrix spike, laboratory duplicate, ICP-MS serial dilution, and Laboratory Control Sample analyses were within control limits.

Concentrations for the following target analytes exceeded the calibration range in the initial analysis for the samples listed below. These samples were reanalyzed at two-fold (2X) dilution in order to quantitate these analytes within the calibration range. Results were reported from the dilutions.

| Sample(s)                                 | Analyte(s)     |
|---|----------------|
| MCOB31                                    | Lead (Pb)      |
| MCOAX4, MCOAX5, MCOAY0,<br>MCOB42, MCOBA2 | Manganese (Mn) |

Sample calculation checks were performed on sample MCOAW3. All calculated results had RPDs less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation in addition to laboratory quality control samples.

**Glossary of Inorganic Data Qualifier Codes**

---

Validation    In order of descending precedence. Only one of these qualifiers may apply to any  
Qualifiers    result.

---

- R            The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.
- UJ           The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
- U            The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit
- B            The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.
- J            The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+           The result is an estimated quantity, but the result may be biased high.
- J-           The result is an estimated quantity, but the result may be biased low.

### Overview

This data package consisted of thirteen (13) soil samples, including two (2) field duplicate samples, analyzed for metals by ICP-AES and ICP-MS and for mercury (Hg) by cold vapor atomic absorption technique.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4. Metals aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) are analyzed by ICP-AES with the remaining standard target analyte list (TAL) metals analyzed by ICP-MS.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated November 25, 2020.

### Summary

No significant data quality outliers or technical deficiencies were identified that would require rejection of sample results. Internal standard, blank contamination and serial dilution issues required qualification of sample data.

### Minor Problems

The percent relative intensity (%RI) for internal standard scandium was outside the upper control limit (>125%) in the initial analyses of samples MCOAW8, MCOAX2, MCOAX6, MCOAX7, MCOB40 and MCOB44. These samples were reanalyzed at two-fold (2X) dilutions with similar results. Associated analyte vanadium (V) was reported from the initial analyses, is estimated and has been qualified "J" in affected samples.

The percent difference (%D) in the ICP-MS serial dilution analysis was outside the control limit (>10%) for barium (Ba) in sample MCOAW8. The detected concentration for Ba is estimated in this sample and has been qualified "J".

### **Notes**

Detected concentrations for target analytes less than the Contract Required Quantitation Limits (CRQLs) are estimated and have been qualified "J".

Antimony (Sb), beryllium (Be), cadmium (Cd), and silver (Ag) have been detected in laboratory blanks associated with the samples in this SDG. Detected concentrations for these analytes less than the CRQL in associated samples have been reported at the CRQL and qualified "U".

Matrix spike, laboratory duplicate, ICP-AES serial dilution, and Laboratory Control Sample analyses were within control limits.

Concentrations for the following target analytes exceeded the calibration range in the initial analysis for the samples listed below. These samples were reanalyzed at dilution in order to quantitate these analytes within the calibration range. Results were reported from the dilutions.

| Sample(s)  | Analyte(s)     | Dilution |
|--|----------------|----------|
| MCOBE9   | Copper (Cu)    | 2X       |
| MCOAW7, MCOAW8, MCOAX2,<br>MCOB35, MCOB40, MCOBE9,<br>MCOBF0 | Manganese (Mn) | 2X       |

Results reported for field duplicate pair MCOB35/MCOBE9 were comparable (within control limits of 25 Relative Percent Difference (RPD) or  $\pm$  CRQL) for all analytes except Ca, Cu, lead (Pb), Mg, and zinc (Zn). No data were qualified based on field duplicate precision.

Results reported for field duplicate pair MCOAW7/MCOBF0 were comparable (within control limits of RPD or  $\pm$  CRQL) for all analytes except Pb. No data were qualified based on field duplicate precision.

Sample calculation checks were performed on sample MCOAW4. All calculated results had RPDs less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation in addition to laboratory quality control samples.

**Glossary of Inorganic Data Qualifier Codes**

---

Validation    In order of descending precedence. Only one of these qualifiers may apply to any  
Qualifiers    result.

---

- R            The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.
- UJ           The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
- U            The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit
- B            The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.
- J            The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+           The result is an estimated quantity, but the result may be biased high.
- J-           The result is an estimated quantity, but the result may be biased low.

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW15007/MC0AW4

Lab Name: CHEMTEX

Sample Number: MC0AX7

Method: Mercury by Cold Vapor

Matrix: Soil

MA Number:

Sample Location: NLR-SS-114

pH:

Sample Date: 11/10/2020

Sample Time: 14:15:00

% Moisture:

% Solids: 79.6

| Analyte Name | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|--------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Mercury      | Target       | 0.050             | J               | mg/kg | 0.050      | J        | 1               | YES        | S4VEM            |

### Overview

This data package consisted of nineteen (19) soil samples analyzed for metals by ICP-AES and ICP-MS and for mercury (Hg) by cold vapor atomic absorption technique.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4. Metals aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) are analyzed by ICP-AES with the remaining standard target analyte list (TAL) metals analyzed by ICP-MS.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated December 28, 2020.

Rinsate blank MC0BH8 (from SDG MC0B89) were associated with samples in this SDG and used in the evaluation of this data.

### Summary

Internal standard issues required rejection and estimation of sample data. Serial dilution and blank contamination issues required estimation of sample data.

**Major Problem**

Percent relative intensities (RI) for internal standards terbium and holmium were outside the upper control limit (>125%) in the initial analysis of samples as noted below. These samples were reanalyzed at two-fold (2X) dilutions with %RI within control limits for all internal standards for all samples. However, results were reported from the initial analysis in these samples. The initial results are unusable and have been qualified "R" for the target analytes in these samples.

| Internal Standard | Associated Samples     | Associated Target Analytes |
|-------------------|------------------------|----------------------------|
| Terbium, Holmium  | MCOB28, MCOB60, MCOB78 | Thallium, Barium           |
| Terbium           | MCOB41                 | Thallium                   |
| Holmium           | MCOB57                 | Barium                     |

**Minor Problems**

Percent relative intensities for internal standards terbium and holmium were outside the upper control limit (>125%) in the initial analysis of sample MCOB30. This sample was reanalyzed at a two-fold (2X) dilution with similar results. Results were reported from the initial analysis in these samples. The detected concentration for associated analyte Ba is estimated and has been qualified "J". The quantitation limit for associated analyte thallium (Tl) is estimated and has been qualified "UJ".

| Internal Standard | Associated Sample | Associated Target Analytes |
|-------------------|-------------------|----------------------------|
| Terbium, Holmium  | MCOB30            | Thallium, Barium           |

The percent difference (%D) in the ICP-AES serial dilution analysis was outside the control limit (>10%) for Fe in sample MCOAW6. The detected concentration for Fe is estimated in this sample and has been qualified "J".

Laboratory instrumentation reported negative values for selenium (Se) and silver (Ag) greater than the absolute values of the Method Detection Limits (MDLs) in blank analyses. Laboratory instrumentation reported negative values for Hg greater than the absolute value of the MDL in blank analyses. Detected concentrations for these analytes less than the Contract Required Quantitation Limit (CRQL) were reported at the CRQL and qualified "UJ". Quantitation limits for Se and Ag are estimated and qualified "UJ".

**Notes**

Detected concentrations for target analytes less than the CRQLs are estimated and have been qualified "J".

Antimony (Sb) has been detected in a laboratory blank associated with the samples in this SDG. Detected concentration for Sb less than the CRQL have been reported at the CRQL and qualified "U".

Rinsate blank MCOBH8 was free from contamination.

Target analyte Hg matrix spike, laboratory duplicate, ICP-MS serial dilution, and Laboratory Control Sample analyses were within control limits.

The matrix spike recovery was outside control limits for lead (Pb) in sample MCOAW6. The initial concentration of Pb was greater than four times (>4X) the amount of the spike added. No data were qualified.

Concentrations for manganese (Mn) exceeded the calibration range in the initial analysis for samples MCOAX3, MCOAX8, MCOAY4, MCOAY9, MCOB21, MCOB28, MCOB30, MCOB41, MCOB46, MCOB52, MCOB57 and MCOB78. These samples were reanalyzed at two-fold (2X) dilutions in order to quantitate Mn within the calibration range. Results were reported from the dilutions.

Sample calculation checks were performed on sample MCOAW6. All calculated results had Relative Percent Differences (RPDs) less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation in addition to laboratory quality control samples.

### **Glossary of Inorganic Data Qualifier Codes**

---

Validation In order of descending precedence. Only one of these qualifiers may apply to any  
 Qualifiers result.

---

- R The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.
- UJ The analyte was analyzed for but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
- U The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit
- B The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.
- J The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+ The result is an estimated quantity, but the result may be biased high.
- J- The result is an estimated quantity, but the result may be biased low.

**Subject:** Inorganic Data Validation (S4VEM)  
Norwood Landfill  
49167 MCOAW9

### **Overview**

This data package consisted of sixteen (16) soil samples including two field duplicate samples analyzed for metals by ICP-AES and ICP-MS and for mercury (Hg) by cold vapor atomic absorption technique.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4. Metals aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) are analyzed by ICP-AES with the remaining standard target analyte list (TAL) metals analyzed by ICP-MS.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated November 30, 2020 and additional information dated December 2, 2020.

### **Summary**

No data quality outliers or technical deficiencies were identified that would require rejection of sample results. Less significant data quality outliers were identified that resulted in estimation of sample results including but not limited to serial dilution as detailed below.

### **Minor Problems**

The percent difference (%D) for the ICP serial dilution analysis performed on sample MCOB11 was outside the control limit (%D >10) for iron (Fe) in ICP-AES analysis and for copper (Cu) in ICP-MS analysis. Detected concentrations for these analytes are estimated in this sample and have been qualified "J".

**Notes**

Detected concentrations for target analytes less than Contract Required Quantitation Limits (CRQLs) are estimated and have been qualified "J".

Antimony (Sb), beryllium (Be), cadmium (Cd), silver (Ag) and thallium (Tl) have been detected in laboratory blanks associated with samples in this SDG. Detected results for these analytes less than the CRQL have been reported at the CRQL and qualified "U".

Matrix spike, laboratory duplicate and Laboratory Control Sample (LCS) analyses were within control limits.

The Percent Relative Intensity (%RI) was outside the lower control limit for internal standard Rhodium in the initial analysis of ICP-MS sample MC0B73. The sample was reanalyzed at a 2x dilution and the internal standard %RI was within the control limit. Results for analytes associated with this internal standard in this sample have been reported from the dilution analysis. CRQLs are elevated for these analytes in this sample. No data were qualified based on this finding.

Manganese (Mn) in sample MC0BF6 exceeded the calibration range in the initial analysis. This sample was reanalyzed at a 2X dilution in order to quantitate this analyte within the calibration range. The result for this analyte is reported from the dilution.

Samples MC0BF6 and MC0BF7 are reported as field duplicate samples on the chain of custody (COC) record. However, field duplicate pairs to these samples are not identified. Comparison of results could not be made.

Sample calculation checks were performed. All calculated results had RPDs less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation in addition to laboratory quality control samples.

**Glossary of Inorganic Data Qualifier Codes**

---

Validation    In order of descending precedence. Only one of these qualifiers may apply to any  
Qualifiers    result.

---

- R            The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.
- UJ           The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
- U            The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit
- B            The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.
- J            The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+           The result is an estimated quantity, but the result may be biased high.
- J-           The result is an estimated quantity, but the result may be biased low.

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW15007/MC0AW9

Lab Name: CHEMTEX

Sample Number: LCS704

Method: Metals by ICP-AES

Matrix: Soil

MA Number:

Sample Location:

pH:

Sample Date:

Sample Time:

% Moisture:

% Solids: 100

| Analyte Name | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |
|--------------|--------------|-------------------|-----------------|-------|------------|----------|-----------------|------------|------------------|
| Aluminum     | Spike        | 41.6              |                 | mg/kg | 41.6       |          | 1               | YES        | NV               |

# Sample Summary Report

Project Name: NORWOOD LANDFILL Project

GroupID: 49167/EPW15007/MC0AW9

Lab Name: CHEMTEX

Sample Number: MC0B79

Method: Mercury by Cold Vapor

Matrix: Soil

MA Number:

Sample Location: NLR-CS-148

pH:

Sample Date: 11/12/2020

Sample Time: 13:15:00

% Moisture:

% Solids: 76.3

| Analyte Name | Analyte Type | Validation Result | Validation Flag | Units | Lab Result | Lab Flag | Dilution Factor | Reportable | Validation Level |

### Overview

This data package consisted of eighteen (18) soil samples analyzed for metals by ICP-AES and ICP-MS and for mercury (Hg) by cold vapor atomic absorption technique.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4. Metals aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) are analyzed by ICP-AES with the remaining standard target analyte list (TAL) metals analyzed by ICP-MS.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated December 7, 2020.

### Summary

No significant data quality outliers or technical deficiencies were identified that would require rejection of sample results. Serial dilution and blank contamination issues required qualification of sample data.

### Minor Problems

The percent difference (%D) in the ICP-AES serial dilution analysis was outside the control limit (>10%) for Fe in sample MC0B16. The detected concentration for Fe is estimated in this sample and has been qualified "J".

Laboratory instrumentation reported negative values for Hg in blank analyses greater than the absolute value of the Method Detection Limit (MDL). Detected concentrations for Hg less than the CRQL were reported at the CRQL and qualified "UJ".

**Notes**

Detected concentrations for target analytes less than the Contract Required Quantitation Limits (CRQLs) are estimated and have been qualified "J".

Antimony (Sb) has been detected in laboratory blanks associated with the samples in this SDG. Detected concentrations for Sb less than the CRQL have been reported at the CRQL and qualified "U".

Target analyte Hg matrix spike, laboratory duplicate, ICP-MS serial dilution, and Laboratory Control Sample analyses were within control limits.

The matrix spike recovery was outside control limits for lead (Pb) in sample MCOB16. The initial concentration of Pb was greater than four times (>4X) the amount of the spike added. No data were qualified.

Concentrations for the following target analytes exceeded the calibration range in the initial analysis for the samples listed below. These samples were reanalyzed at two-fold (2X) dilution in order to quantitate these analytes within the calibration range. Results were reported from the dilutions.

| Samples                | Analyte        |
|------------------------|----------------|
| MCOB16, MCOB22, MCOB90 | Pb             |
| MCOB22, MCOB86, MCOB90 | Manganese (Mn) |

Sample calculation checks were performed on sample MCOAX9. All calculated results had RPDs less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation in addition to laboratory quality control samples.

**Glossary of Inorganic Data Qualifier Codes**

---

Validation    In order of descending precedence. Only one of these qualifiers may apply to any  
Qualifiers    result.

---

- R            The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.
- UJ           The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
- U            The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit
- B            The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.
- J            The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+           The result is an estimated quantity, but the result may be biased high.
- J-           The result is an estimated quantity, but the result may be biased low.

### Overview

This data package consisted of two (2) rinsate blanks and thirteen (13) soil samples, including four (4) field duplicate samples, analyzed for metals by ICP-AES and ICP-MS and mercury (Hg) by cold vapor atomic absorption technique.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4. Metals aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) are analyzed by ICP-AES with the remaining standard target analyte list (TAL) metals analyzed by ICP-MS.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated December 22, 2020.

Sample MCOB72 (from SDG MCOAZ9) and samples MCOBC4 and MCOBB1 (from SDG MCOB56) were associated with field duplicates MCOBH4, MCOBH3 and MCOBH5, respectively, and were used in evaluation of this data.

### Summary

No significant data quality outliers or technical deficiencies were identified that would require rejection of sample results. Matrix spike and blank contamination issues required estimation of sample data.

**Minor Problems**

The matrix spike recovery was low (<75%) for silver (Ag) in soil sample MCOB04. The post-digestion spike recovery was greater than 75%. The quantitation limit for Ag is estimated in this sample and has been qualified "UJ".

Laboratory instrumentation reported negative values for manganese (Mn), selenium (Se) and zinc (Zn) greater than absolute values of the Method Detection Limits (MDLs) in blank analyses. Detected concentrations reported for Mn and Zn in rinsate blank MCOBG9 which were less than Contract Required Quantitation Limits (CRQLs) were reported at the CRQL and qualified "UJ". Quantitation limits for Mn in rinsate blank MCOBG9 and for Se in all samples are estimated and qualified "UJ".

**Notes**

Detected concentrations for target analytes less than the CRQLs are estimated and have been qualified "J".

Antimony (Sb) has been detected in laboratory blanks associated with the samples in this SDG. Target analyte Hg has been detected in laboratory blanks associated with the samples in this SDG. Detected concentrations for these analytes less than the CRQL in associated samples have been reported at the CRQL and qualified "U".

Rinsate blank MCOBG9 reported concentrations for arsenic (As) and chromium (Cr) less than the CRQLs. Rinsate blank MCOBH0 reported concentrations for Cr and nickel (Ni) less than the CRQLs and for Zn greater than the CRQL. Detected concentrations for Zn were greater than ten times (>10X) the blank concentration and not qualified based on this finding. Detected concentrations for the remaining analytes were greater than the CRQLs and not qualified based on these findings.

Target analyte Hg matrix spike, laboratory duplicate, serial dilution, and Laboratory Control Sample (LCS) analyses were within control limits.

No matrix spike nor laboratory duplicate analysis were performed on sample MCOBG9, as this is a field quality control sample. No data were qualified based on this finding.

The concentration for Mn exceeded the calibration range in the initial analysis for sample MCOAY8. This sample was reanalyzed at a two-fold (2X) dilution in order to quantitate Mn within the calibration range. The result was reported from the dilution.

Results reported for field duplicate pair MCOBH2/MCOB04 were comparable (within control limits of 25 Relative Percent Difference (RPD) or  $\pm$  CRQL) for all analytes except cobalt (Co) and Mn. No data were qualified based on field duplicate precision.

Results reported for field duplicate pair MCOBH3/MCOBC4 were comparable (within control limits of 25 RPD or  $\pm$  CRQL) for all analytes except arsenic (As). No data were qualified based on field duplicate precision.

Results reported for field duplicate pair MCOBH4/MCOB72 were comparable (within control limits of 25 RPD or  $\pm$  CRQL) for all analytes. No data were qualified based on field duplicate precision.

Results reported for field duplicate pair MCOBH5/MCOBB1 were comparable (within control limits of 25 RPD or  $\pm$  CRQL) for all analytes except Al and lead (Pb). No data were qualified based on field duplicate precision.

Sample calculation checks were performed on samples MCOAY8 and MCOBG9, as well as the ICP-AES aqueous LCS. All calculated results had Relative Percent Differences RPDs less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation in addition to laboratory quality control samples.

### **Glossary of Inorganic Data Qualifier Codes**

---

Validation Qualifiers In order of descending precedence. Only one of these qualifiers may apply to any result.

---

- R The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.
- UJ The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
- U The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit
- B The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.
- J The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+ The result is an estimated quantity, but the result may be biased high.
- J- The result is an estimated quantity, but the result may be biased low.

**Subject:** Inorganic Data Validation (S4VEM)  
Norwood Landfill  
49167 MCOAZ9

### **Overview**

This data package consisted of twenty (20) soil samples, including a field duplicate sample, analyzed for metals by ICP-AES and ICP-MS and for mercury (Hg) by cold vapor atomic absorption technique.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4. Metals aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) are analyzed by ICP-AES with the remaining standard target analyte list (TAL) metals analyzed by ICP-MS.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated December 22, 2020 and additional data dated December 29, 2020.

Rinsate blanks MCOBG9 and MCOBH0 (from SDG MCOAY8) were associated with samples in this SDG and used in the evaluation of this data. Field duplicate MCOBH4 (from SDG MCOAY8) was associated with sample MCOB72 and was used in evaluation of this data.

### **Summary**

No significant data quality outliers or technical deficiencies were identified that would require rejection of sample results. A serial dilution issue required estimation of sample data.

### **Minor Problem**

The percent difference (%D) in the ICP-MS serial dilution analysis was outside the control limit (>10%) for vanadium (V) in sample MCOB72. The detected concentration for V is estimated in this sample and has been qualified "J".

**Notes**

Detected concentrations for target analytes less than the Contract Required Quantitation Limits (CRQLs) are estimated and have been qualified "J".

Antimony (Sb) has been detected in laboratory blanks associated with the samples in this SDG. Target analyte Hg has been detected in laboratory blanks associated with the samples in this SDG. Detected concentrations for these analytes less than the CRQL in associated samples have been reported at the CRQL and qualified "U".

Rinsate blank MCOBG9 reported concentrations for arsenic (As), chromium (Cr), manganese (Mn) and zinc (Zn) less than the CRQLs. Rinsate blank MCOBHO reported concentrations for Cr and nickel (Ni) less than the CRQLs and for Zn greater than the CRQL. The detected concentration for Zn in associated sample MCOB72 was greater than ten times (>10X) the blank concentration and not qualified based on this finding. Detected concentrations for the remaining analytes in associated sample MCOB72 were greater than the CRQLs and not qualified based on these findings.

Matrix spike, Laboratory duplicate, ICP-AES serial dilution, and Laboratory Control Sample analyses were within control limits.

Concentrations for Mn exceeded the calibration range in the initial analysis for the samples listed below. These samples were reanalyzed at dilution in order to quantitate Mn within the calibration range.

Results were reported from the dilutions.

| Sample(s)                      | Dilution |
|--------------------------------|----------|
| MCOB20, MCOB88, MCOBC5, MCOBE1 | 2X       |
| MCOBC1                         | 5X       |

Results reported for field duplicate pair MCOBH4/MCOB72 were comparable (within control limits of 25 Relative Percent Difference (RPD) or  $\pm$  CRQL) for all analytes. No data were qualified based on field duplicate precision.

Sample calculation checks were performed on sample MCOAZ9. All calculated results had RPDs less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation in addition to laboratory quality control samples.

**Glossary of Inorganic Data Qualifier Codes**

---

Validation    In order of descending precedence. Only one of these qualifiers may apply to any  
Qualifiers    result.

---

- R            The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.
- UJ           The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
- U            The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit
- B            The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.
- J            The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+           The result is an estimated quantity, but the result may be biased high.
- J-           The result is an estimated quantity, but the result may be biased low.

**Subject:** Inorganic Data Validation (S4VEM)  
Norwood Landfill  
49167 MCOB24

### **Overview**

This data package consisted of eighteen (18) soil samples analyzed for metals by ICP-AES and ICP-MS and for mercury (Hg) by cold vapor atomic absorption technique.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4. Metals aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) are analyzed by ICP-AES with the remaining standard target analyte list (TAL) metals analyzed by ICP-MS.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated December 24, 2020.

### **Summary**

Internal standard issues required rejection of sample data. Serial dilution and blank contamination issues required estimation of sample data.

### **Major Problem**

Percent relative intensities for internal standards terbium and holmium were outside the upper control limit (>125%) in the initial analysis of sample MCOB26. This sample was reanalyzed at a two-fold (2X) dilution with %RI reported within control limits for all internal standards. The results from the diluted analysis were not reported. Quantitation limits and results reported from the initial analysis are unusable for associated analytes antimony (Sb), arsenic (As), barium (Ba), lead (Pb) and thallium (Tl) and have been qualified "R".

### **Minor Problems**

The percent difference (%D) in the ICP-AES serial dilution analysis was outside the control limit (>10%) for Fe in sample MCOB24. The detected concentration for Fe is estimated in this sample and has been qualified "J".

Laboratory instrumentation reported negative values for selenium (Se) and silver (Ag) greater than the absolute value of the Method Detection Limits (MDLs) in blank analyses. Laboratory instrumentation reported negative values for Hg greater than the absolute value of the MDL in blank analyses. Detected concentrations for these analytes less than Contract Required Quantitation Limits (CRQLs) were reported at the CRQL and qualified "UJ". Quantitation limits for these analytes are estimated and qualified "UJ".

### **Notes**

Detected concentrations for target analytes less than the CRQLs are estimated and have been qualified "J".

Target analyte Sb, cadmium (Cd) and Tl have been detected in laboratory blanks associated with the samples in this SDG. Detected concentrations for these analytes less than the CRQL have been reported at the CRQL and qualified "U".

Target analyte Hg matrix spike, laboratory duplicate, ICP-MS serial dilution, and Laboratory Control Sample analyses were within control limits.

The ICP-MS matrix spike recovery was outside control limits for Pb in sample MCOB24. The initial concentration of Pb was greater than four times (>4X) the amount of the spike added. No data were qualified.

Percent relative intensities for internal standards lithium, terbium, and holmium were outside the upper control limit (>125%) in the initial analysis of sample MCOB24. This sample was reanalyzed at a two-fold (2X) dilution with %RI within control limits for all internal standards. All ICP-MS analytes, regardless of internal standard association, were reported from the diluted analysis without qualification. Quantitation limits were elevated due to the dilution.

Percent relative intensities for internal standards lithium, terbium, and holmium were outside the upper control limit (>125%) in the initial analysis of sample MCOB27. This sample was reanalyzed at a two-fold (2X) dilution with %RI within control limits for all internal standards. Associated analytes Sb, As, Ba, beryllium (Be), Pb and Tl were reported from the diluted analysis, without qualification. Internal standard indium was within control limits in the initial analysis but associated analytes Cd, cobalt (Co), and copper (Cu) were reported from the diluted analysis, without qualification. Quantitation limits were elevated due to the dilution. Internal standard rhodium was within control limits in the initial analysis and associated analytes chromium (Cr), nickel (Ni), Se, Ag, vanadium (V) and zinc (Zn) were reported from the initial analysis.

The percent relative intensity for internal standard lithium was outside the upper control limit (>125%) in the initial analysis of sample MCOBC7. This sample was reanalyzed at a two-fold (2X) dilution with %RI

within control limits for all internal standards. Associated analyte Be was reported from the diluted analysis, without qualification. Internal standards terbium and holmium were within control limits in the initial analysis but associated analytes Sb, As, Ba, Pb and Tl were reported from the diluted analysis, without qualification. Quantitation limits were elevated due to the dilution. Internal standards indium and rhodium were within control limits in the initial analysis and associated analytes Cd, Cr, Co, and Cu, Ni, Se, Ag, V and Zn were reported from the initial analysis.

Percent relative intensities for internal standards lithium and holmium were outside the upper control limit (>125%) in the initial analysis of sample MCOBD0. This sample was reanalyzed at a two-fold (2X) dilution with %RI within control limits for all internal standards. Associated analytes Be, Pb and Tl were reported from the diluted analysis, without qualification. Internal standard terbium was within control limits in the initial analysis but associated analytes Sb, As, and Ba were reported from the diluted analysis, without qualification. Quantitation limits were elevated due to the dilution. Internal standards indium and rhodium were within control limits in the initial analysis and associated analytes Cd, Cr, Co, Cu, Ni, Se, Ag, V and Zn were reported from the initial analysis.

Percent relative intensities for internal standards lithium, terbium, and holmium were outside the upper control limit (>125%) in the initial analysis of sample MCOBD1. This sample was reanalyzed at a two-fold (2X) dilution with %RI within control limits for all internal standards. Associated analytes Sb, As, Ba, Be, Pb and Tl were reported from the diluted analysis, without qualification. Quantitation limits were elevated due to the dilution.

Concentrations for the following target analytes exceeded the calibration range in the initial analysis for the samples listed below. These samples were reanalyzed at dilution in order to quantitate these analytes within the calibration range. Results were reported from the dilutions.

| Sample(s)                                      | Analyte(s)     | Dilution |
|--|----------------|----------|
| MCOB24, MCOB92, MCOB97, MCOBD0, MCOBE3, MCOBE5 | manganese (Mn) | 2X       |
| MCOB27   | Pb, Mn         | 2X       |
| MCOBC7   | Mn             | 10X      |

Sample calculation checks were performed on sample MCOB24. All calculated results had Relative Percent Differences (RPDs) less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation in addition to laboratory quality control samples.

**Glossary of Inorganic Data Qualifier Codes**

---

Validation    In order of descending precedence. Only one of these qualifiers may apply to any  
Qualifiers    result.

---

- R            The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.
- UJ           The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
- U            The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit
- B            The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.
- J            The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+           The result is an estimated quantity, but the result may be biased high.
- J-           The result is an estimated quantity, but the result may be biased low.

**Subject:** Inorganic Data Validation (S4VEM)  
Norwood Landfill  
49167 MCOB36

### **Overview**

This data package consisted of seventeen (17) soil samples analyzed for aluminum (Al), calcium (Ca), iron (Fe), magnesium (Mg), potassium (K), and sodium (Na) by ICP-AES, mercury (Hg) by cold vapor atomic absorption technique, and for all remaining target analytes by ICP-MS.

Analyses were performed by Chemtex (CHX) according to Contract Laboratory Program (CLP) Statement of Work (SOW) ISM02.4.

Data were validated according to the National Functional Guidelines for Inorganic Superfund Methods Data Review and applicable USEPA Region 3 modifications. Electronic validation was performed by the Electronic Data eXchange & Evaluation System (EXES). The validation report has been assigned the Superfund Data Validation Level Stage\_4\_Validation\_Electronic\_Manual (S4VEM).

The following validation narrative is an evaluation of laboratory reported data based on the electronic data package available through the EXES Data Manager dated November 25, 2020.

### **Summary**

No data quality outliers or technical deficiencies were identified that would require rejection of sample results. Serial dilution and blank contamination issues required qualification of sample results.

### **Minor Problem**

Percent differences (%D) in the ICP serial dilution analysis were outside the control limit (>10%) for barium (Ba), chromium (Cr), Fe, and vanadium (V) in sample MCOB36. The detected concentrations for these analytes are estimated in this sample and have been qualified "J".

### **Notes**

Detected concentrations for target analytes less than Contract Required Quantitation Limits (CRQLs) are estimated and have been qualified "J".

Antimony (Sb) and Hg have been detected at concentrations less than the CRQL in laboratory blanks associated with the samples in this SDG. Detected concentrations for these analytes in the associated samples which were less than the CRQL have been reported at the CRQL and qualified "U".

Laboratory Control Sample, Hg matrix spike, and laboratory duplicate analyses were within control limits.

The matrix spike recovery was outside the control limits for lead (Pb) in sample MCOB36. The initial concentration for Pb was greater than four times (>4X) the amount of the spike added. No data were qualified.

Concentrations for manganese exceeded the calibration range in the initial analysis for the samples MCOAY5, MCOB36, and MCOB51. These samples were reanalyzed at a 2-fold dilution in order to quantitate these analytes within the calibration range. Results were reported from the dilutions.

Additional information available through the EXES Data Manager dated December 2, 2020 states an incorrect receipt time of 10:51 is listed on the Electronic Data Deliverables (EDDs) for sample received on November 12, 2020. The correct time of 10:12 is recorded on the Chain of Custody and DC-1. The corrected time was not uploaded as reported and the EDDs show the incorrect time. No data were qualified.

Sample calculation checks were performed for MCOAZ8 and MCOB66. All calculated results had Relative Percent Differences (RPDs) less than 5% of the reported results. No sample data were qualified.

Validation qualifiers are only applied by the validator to field samples. Qualifiers may be applied by EXES electronic validation to laboratory quality control samples.

**Glossary of Inorganic Data Qualifier Codes**

---

Validation Qualifiers In order of descending precedence. Only one of these qualifiers may apply to any result.

---

- R The data are unusable. The sample results are rejected due to serious deficiencies in meeting QC criteria. The analyte may or may not be present in the sample.
- UJ The analyte was analyzed for, but was not detected. The reported quantitation limit is approximate and may be inaccurate or imprecise.
- U The analyte was analyzed for, but was not detected above the level of the reported sample quantitation limit
- B The result is presumed a blank contaminant. This qualifier is used for drinking water samples only.
- J The result is an estimated quantity. The associated numerical value is the approximate concentration of the analyte in the sample.
- J+ The result is an estimated quantity, but the result may be biased high.
- J- The result is an estimated quantity, but the result may be biased low.
