The State of Delaware Report on the Compliance of Government Underground Storage Tanks

In order to meet the requirements of the Energy Policy Act of 2005, Delaware's Department of Natural Resources and Environmental Control, Tank Management Branch is submitting the following information to Region 3 of the United States Environmental Protection Agency.

Delaware has a total of 57 facilities that fit the criteria outlined in the grant guidelines for this report. At the time of this submission four facilities are not in compliance with State and Federal Regulations. This translates to a compliance rate of approximately 93%. Of the four facilities out of compliance, facility number 3-000589 is slated to be removed, facility number 1-000295 is awaiting the installation of a drop tube and facility numbers 3-000575 and 3-002192 are required to submit their last three (3) months of inventory so that they can be evaluated for compliance. These deficiencies are expected to be corrected within the next thirty (30) days.

Facilities starting with the number 1 are located in Kent County, number 3 indicates a facility in New Castle County and the number 5 sites are located in Sussex County.

Delaware's Tank Management has done full compliance inspections at all of these facilities and will be able to accomplish a three year compliance inspection rotation. Of the 57 facilities, 14 were inspected in 2007, 10 were inspected in 2006, 11 were inspected in 2005, 9 were inspected in 2004, 11 were inspected in 2003, 1 was inspected in 2002 and 1 was inspected in 2000.

Although the grant guidance document only requires that Delaware submit the government underground storage tanks that are out of compliance we are submitting the required information on all of the 57 facilities located in Delaware for your review.
