

GSA Administrator

August 14, 2006

The Honorable Stephen L. Johnson
Administrator
Environmental Protection Agency
Washington, DC 20460

Dear Mr. Johnson:

Enclosed is the General Services Administration's (GSA's) Underground Storage Tank (UST) Compliance Report as required by the 2005 Energy Policy Act, Title XV, Subtitle B (the Act). The data reflects information available as of March 31, 2006. GSA owns and operates 87 USTs, none of which have been cited for noncompliance. A total of 87 USTs are owned and/or operated by other Federal agencies on GSA property. We have worked closely with these agencies in order to enhance the accuracy of all UST information provided in our report.

Our next steps include providing awareness training to all relevant GSA personnel regarding the proper management of USTs. The training will be integrated with other aspects of our Environmental Management System. We will also add the information gathered for this report to existing GSA asset management databases. This will improve our ability to regularly track UST compliance and operating procedures across the agency.

As stated in our Environmental Policy Statement, GSA is committed to preventing waste and pollution. We recognize that maintaining accurate UST information and managing them in an environmentally sound manner is an important part of fulfilling this commitment. It also furthers GSA's goal to carry out social, environmental, and other responsibilities as a Federal agency.

If you have any questions or concerns regarding this information, please contact Mr. David L. Winstead, Commissioner, Public Buildings Service at (202) 501-1100. If members of your staff have any questions or concerns, please contact Mr. Glenn S. (Sam) Hunter, Jr., Assistant Commissioner, Public Buildings Service, Office of Applied Science, at (202) 501-0353.

Cordially,

Lurita Doan
Administrator
