

Registration Division Work Plan for the Registration of Conventional Pesticides and Annual Report of Conventional pesticide Registration Decisions

FY2001 Work Plan

EPA is providing the new chemical fiscal year 2001 (FY2001) work plan for the Office of Prevention, Pesticides, and Toxic Substances, Office of Pesticide Programs, Registration Division (RD) in keeping with efforts to improve the transparency and flexibility in the registration program.

This work plan represents our current list and schedules for these important actions; however the Agency has included room for flexibility in this work plan to ensure a quick response should an emerging public health or environmental issue arise.

New Use Candidates
for Already-Registered
Chemicals

The Registration Division's FY2001 Work Plan identifies 11 inert (other) ingredients for decision-making during the fiscal year. Two (2) inert ingredients are actually scheduled for decision-making in early FY2002; therefore, most of the reviews and evaluations will necessarily be conducted in FY2001. Five of these chemicals are carry-overs that could not be completed in FY2000. With the exception of the three (3) safeners, completion of these inert (other) ingredient actions will require sign-off of the inert data requirements that are currently in draft.

Quarter	Chemical	Uses	Comments
1st Quarter	Sucroglycerides	Inert ¹	05/03/2001 tolerance Published
1 st Quarter	Isoxadifen-ethyl	Safener ²	Rice tolerances established 06/21/2001
2 nd Quarter	alpha & beta Pinenes	Inert	Carry over
2 nd Quarter	MON 4660	Safener	Carry over
2 nd Quarter	Agsolex 8 & 12	Inert	Carry over
2 nd Quarter	Surfonic AGM	Inert	Carry over
3 rd Quarter	Geronol	Inert	Carry over
4th Quarter	MON 13900	Safener	Carry over

4 th Quarter	Propylene Carbonate & Butylene Carbonate	Inert	Carry over
4th Quarter	Bronopol	Inert	Carry over
4 th Quarter	Dimethyl Ether	Inert	Carry over
early FY2002	Triethyl Citrate (TEC)	Inert	Carry over
early FY2002	Acetyl Tributyl Citrate (ATBC)	Inert	Carry over
	1	,	,

- 1 Inert = non-pesticidal active component of a pesticide product such as a surfactant or emulsifier.
- 2 Safener = inert ingredient used to protect desired crop from the effects of the active ingredient, typically a herbicide.

New Use Chemical
Candidates for AlreadyRegistered Chemicals

The Registration Division's FY2001 Work Plan identifies 16 new chemical candidates for decision-making during the fiscal year. Seven (7) of these chemicals are for reduced-risk chemicals, including one potential alternative for organophosphate insecticides. From these 16 candidates, the Agency anticipates making 13 registration decisions. The work plan includes more candidates than anticipated actual decisions.

It serves a candidate pool for achieving the registration program's regulatory goals for the fiscal year and has historically included more decision candidates than anticipated completions to ensure that the Agency's regulatory goals are met.
