

Transforming Kampala City through Quality Public Health and Environment Management Services *“Public engagement and participation”*

KCCA: Directorate of Public Health and Environment

Introduction

Directorate Mandate: *“ to improve and maintain a clean, habitable and sustainable city environment and provide high quality health services to the population of Kampala”*

Scope

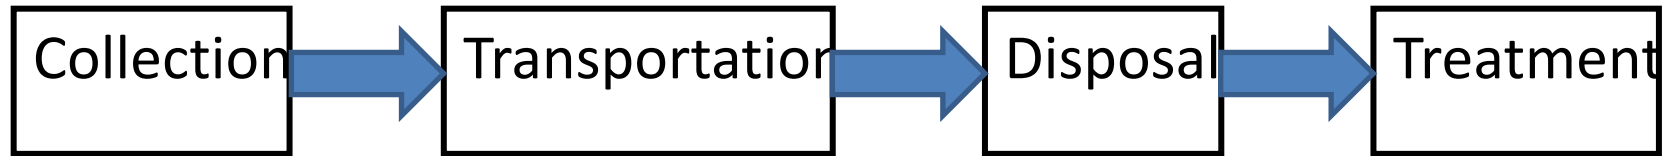

- ✓ Solid waste Management
- ✓ Planning and streamlining interventions for sanitation
- ✓ Health Inspection and Education
- ✓ Environment Management

Solid waste management

The solid waste management chain

- Garbage skips
- Community
- Public premises
- Sweeping
- De-silting

- Garbage trucks
- Private collectors

- Landfill

- Landfill

Public/community participation

SOLID WASTE MANAGEMENT

WASTE

- ❑ Awareness/sensitisation, Mobilisation and advocacy
- ❑ Promoting Kampala city solid waste ordinance (2000)
- ❑ *Key Community activities:* Collection, De-silting drainage channels, Sweeping, recycling

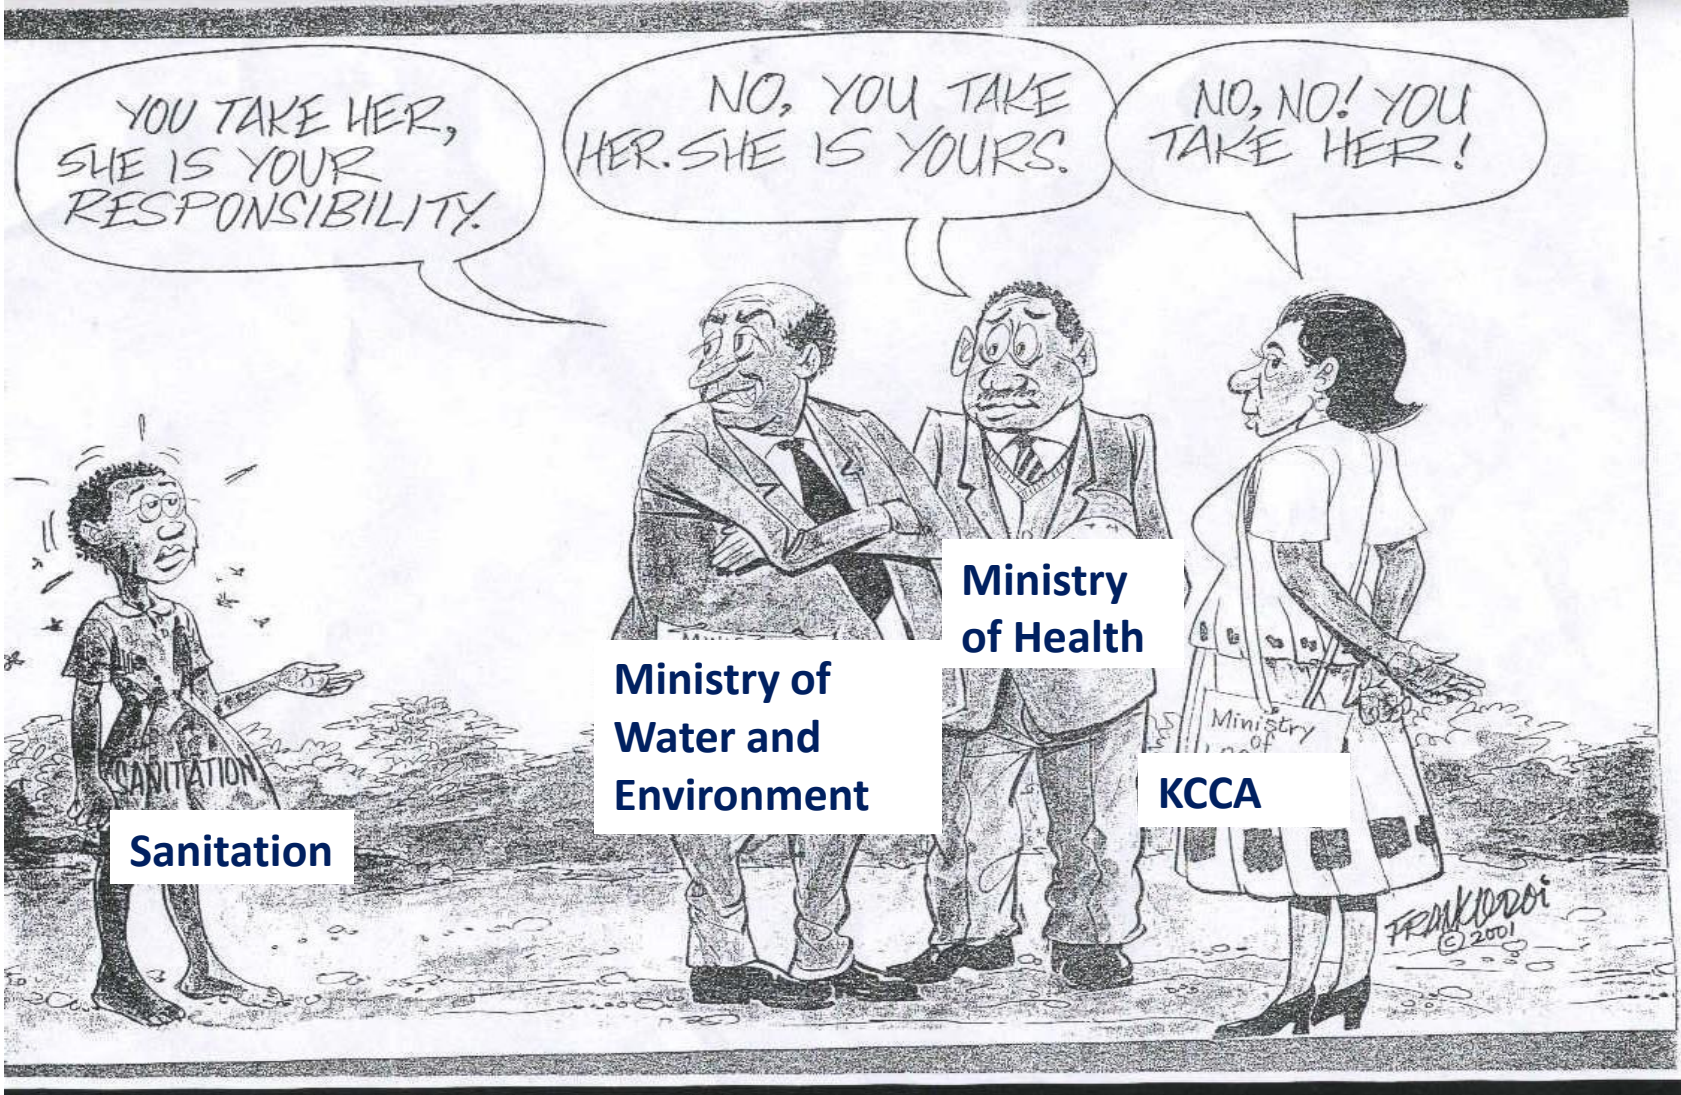

Sanitation: *Whole chain management*

Capture, storage, transportation, disposal **except treatment**

Who should do what on sanitation?

The Sanitation problem – some causes

- Households

- Low willingness to pay (low priority, low income, land tenure, “not my responsibility”).
- Low ability to pay – limited help
- Fear of rent increases
- Physical limitations of some slum areas, increasing population density

- Landlords

- Unwilling to pay for improved sanitation facilities for their properties or to maintain existing facilities

- KCCA

- Inadequate enforcement of existing planning and sanitation regulations – resources and politics.

Stakeholder involvement-to enhance participation

SANITATION

- Hygiene promotion campaigns in collaboration with NGOs, CBOs, local leaders, development partners
- Advocating for total access to sanitation as a human right: *Increasing demand for access by communities*
- Monitoring sanitation projects and compliance to standards with support from local leaders
- Sanitation and water related diseases prevention: *through promotion of access to toilet facilities and hand washing with soap and clean safe water- Especially using education institutions*
