Re: Petition for 3 Years Extension of Exclusive Data Use for Prothioconazole (EPA Reg. No. 264-824)

Dear Mr. Kish:

Bayer CropScience hereby respectfully petitions EPA to extend the period of exclusive data use for Prothioconazole fungicide by 3 years, by applying the provision listed under FIFRA Section 3(c)(1)(F)(ii).

Bayer CropScience believes that Prothioconazole meets the criteria required for this provision based on currently registered uses on minor crops including: watermelon, summer squash, cucumber, cantaloupe, pumpkin, lowbush blueberry, cranberry, currant, gooseberry, loblolly pine, slash pine, longleaf pine, hardwoods, chickpea, crambe, buckwheat, and popcorn thus qualifying for the maximum of 3 additional years of data exclusivity. Justification for how Prothioconazole meets the criteria requirements are detailed in the following petition, enclosed herein:
