

Regulatory Flexibility Act

The Department of the Interior certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal that is the subject of this rule is based on counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

This rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule: (a) Does not have an annual effect on the economy of \$100 million; (b) Will not cause a major increase in costs or prices for consumers, individual industries, geographic regions, or Federal, State or local governmental agencies; and (c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises. This determination is based upon the fact that the State submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation was not considered a major rule.

Unfunded Mandates

This rule will not impose an unfunded mandate on State, local, or tribal governments or the private sector of \$100 million or more in any given year. This determination is based upon the fact that the State submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation did not impose an unfunded mandate.

SUMMARY: On March 28, 2006, the U.S. Army Corps of Engineers (the Corps) and the Environmental Protection Agency (EPA) published a proposed rule to revise regulations governing compensatory mitigation for activities authorized by permits issued by the Department of the Army. The Corps and EPA announce the extension of the public comment period for this proposed rule until June 30, 2006. The 30-day extension of the comment period is a result of requests from a number of entities to allow more time to comment on the proposed rule. SUPPLEMENTARY INFORMATION: In the March 28, 2006, issue of the **Federal Register** (71 FR 15520), the Corps and EPA published a proposed rule revising regulations governing compensatory mitigation for activities authorized by permits issued by the Department of the Army. The proposed regulations are intended to establish performance standards and criteria for the use of permittee-responsible compensatory mitigation and mitigation banks, and to improve the quality and success of compensatory mitigation projects for activities authorized by Department of the Army permits. The proposed regulations are also intended to account for regional variations in aquatic resource types, functions, and values, and apply equivalent standards to each type of compensatory mitigation to the maximum extent practicable. The proposed rule includes a watershed approach to improve the quality and success of compensatory mitigation projects in replacing losses of aquatic resource functions, services, and values resulting from activities authorized by Department of the Army permits.

Several entities have requested an extension of the comment period for the proposed rule. The Corps and EPA find that a 30-day extension of the comment period for this proposed rule is warranted. Therefore, the comment period for this proposed rule is extended until June 30, 2006.

Approval and Promulgation of Air Quality Implementation Plans; Indiana

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA is proposing to approve revisions to the Indiana particulate matter (PM₁₀) State Implementation Plan (SIP). On December 15, 2005, Indiana requested revisions for sources at the ASF Keystone, Inc. (Keystone) coil spring manufacturing facility in Lake County, Indiana. The requested revisions will increase the PM₁₀ emission limit for one unit and reduce the limits for two units. The changes result in a net decrease in the allowable emissions. The emission limits for a fourth unit that has shut down are also being removed. Indiana also requested removing the process weight rate limits and using pounds of PM₁₀ per hour (lb/hr) as the short-term

emission limit. The maximum permissible PM₁₀ emissions will not increase after removing the process weight rate limits because of the net decrease in short-term emission limits.

DATES: Written comments must be received on or before June 22, 2006.

SUPPLEMENTARY INFORMATION: In the Final Rules section of this **Federal Register**, EPA is approving the State's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this rule, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time. Please note that if EPA receives adverse comment on an amendment, paragraph, or section of this rule and if that provision may be severed from the remainder of the rule, EPA may adopt as final those provisions of the rule that are not the subject of an adverse comment.
