

For samples with metal concentrations that were too low to detect, EPA plotted the Method Detection Level (MDL) value onto the trend graph.

The trend graphs do not specify which values are MDLs. Please refer to the data tables to determine the exact values of the sample results.

Aluminum, Dissolved for location SJ4C

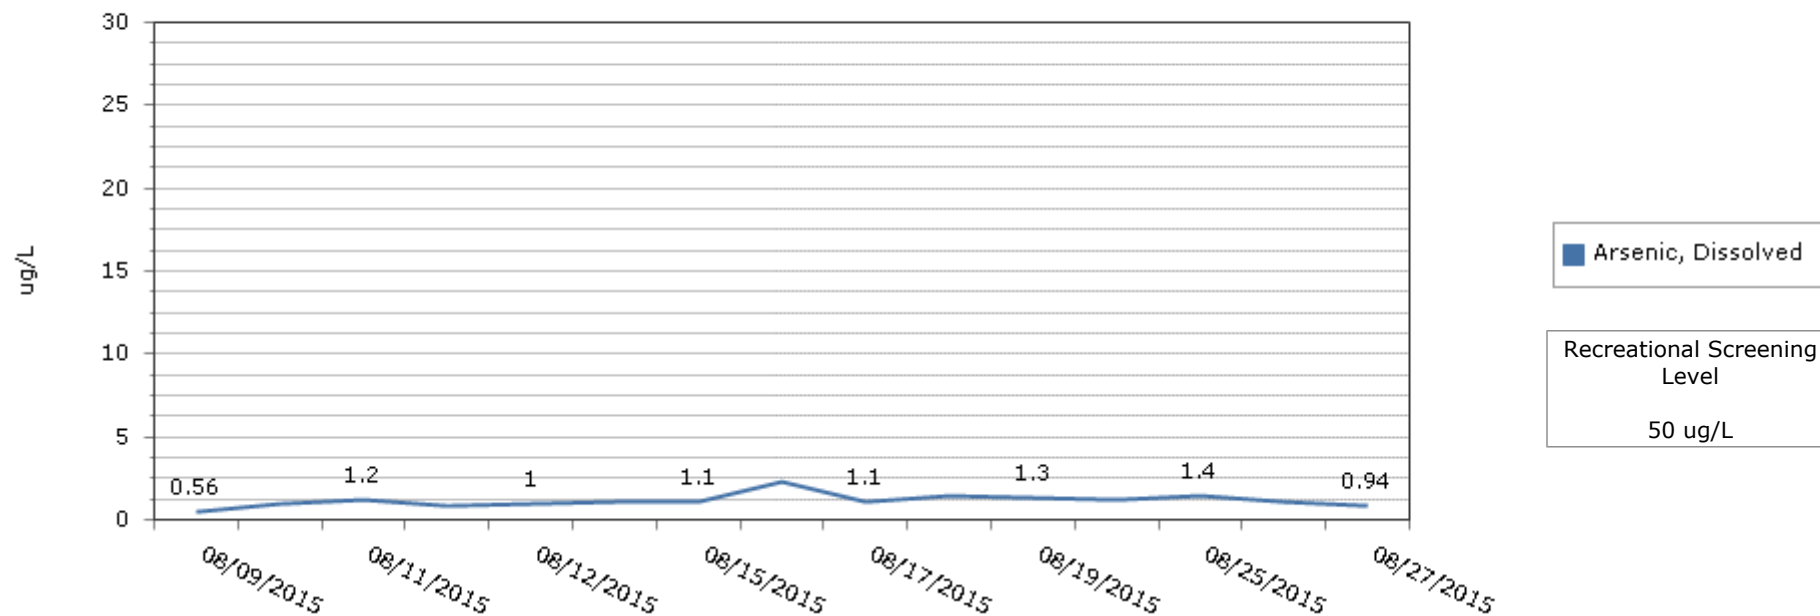

Antimony, Dissolved for location SJ4C

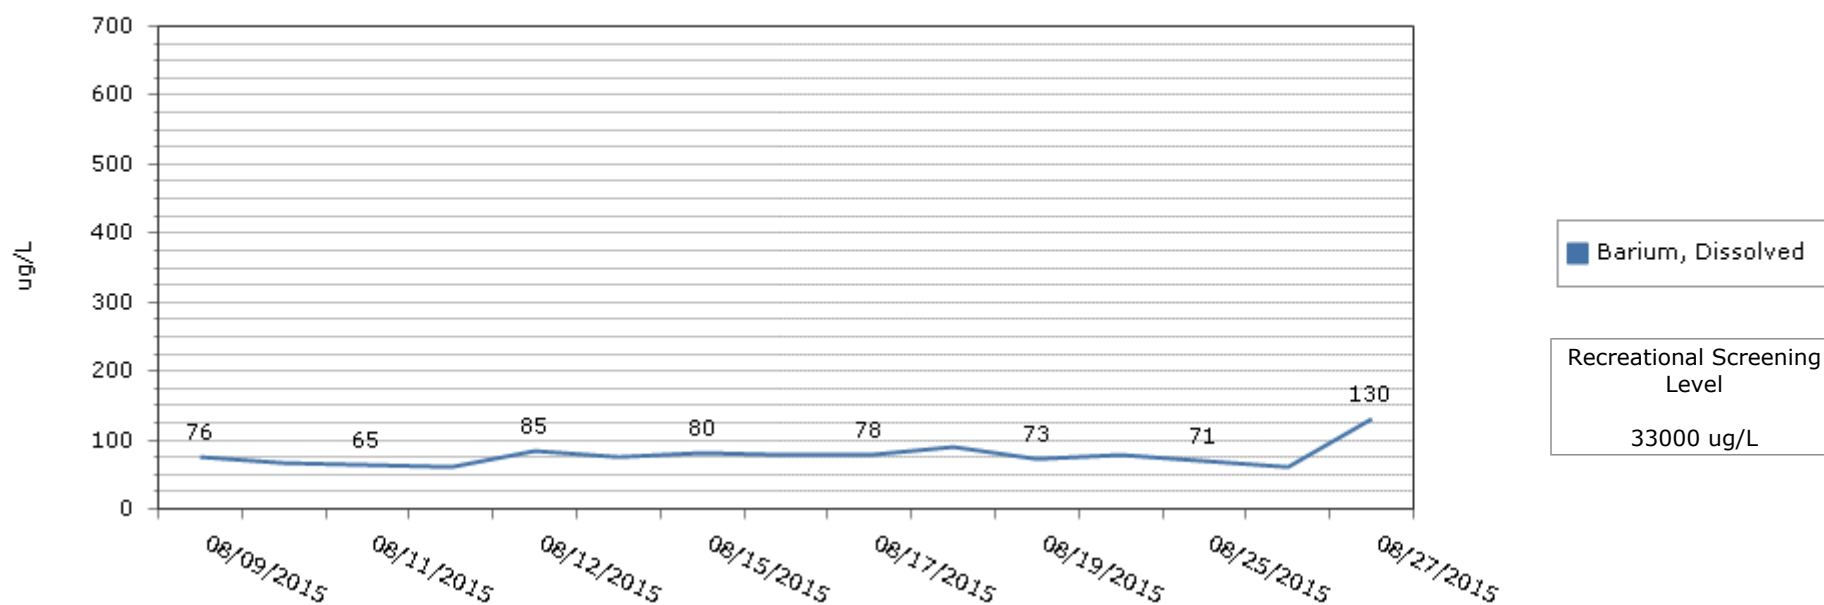

For samples with metal concentrations that were too low to detect, EPA plotted the Method Detection Level (MDL) value onto the trend graph.

The trend graphs do not specify which values are MDLs. Please refer to the data tables to determine the exact values of the sample results.

Arsenic, Dissolved for location SJ4C

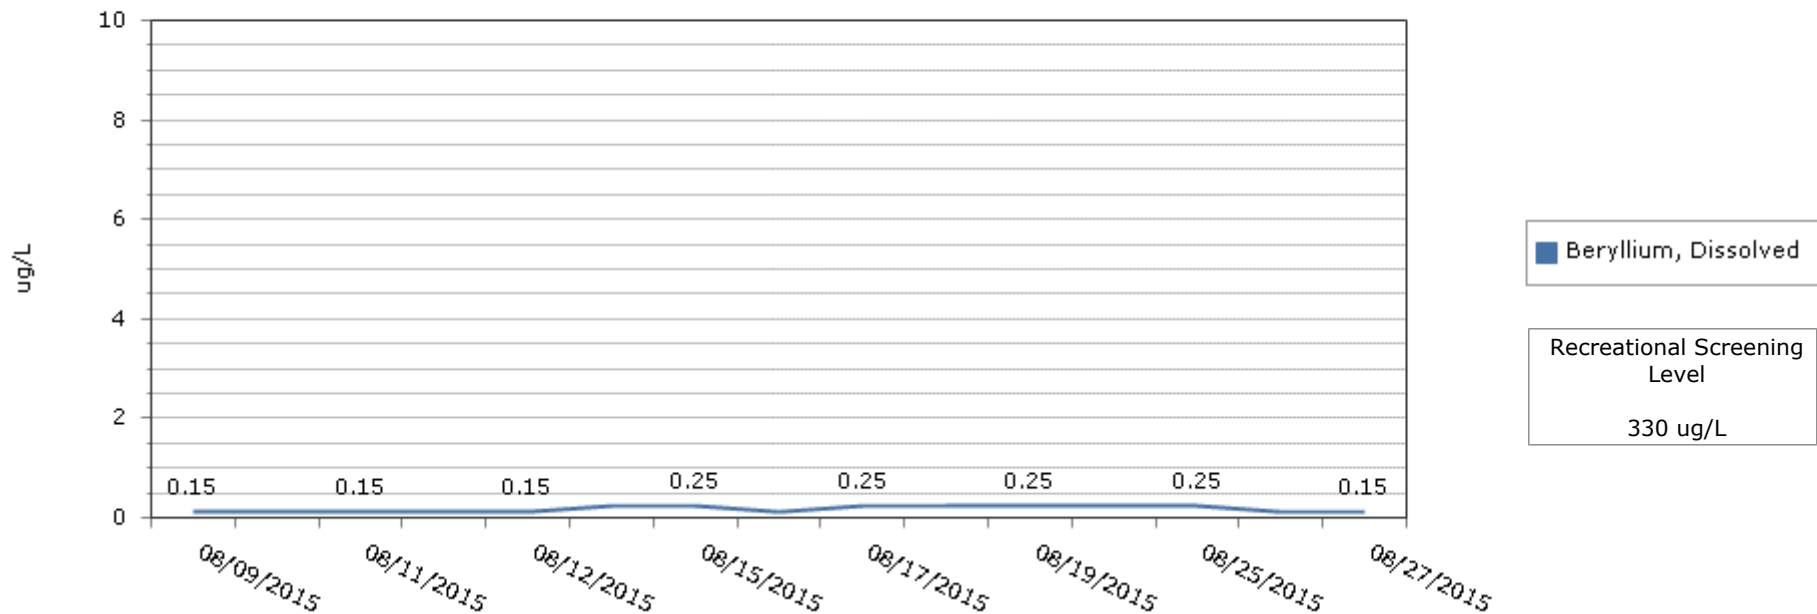

Barium, Dissolved for location SJ4C

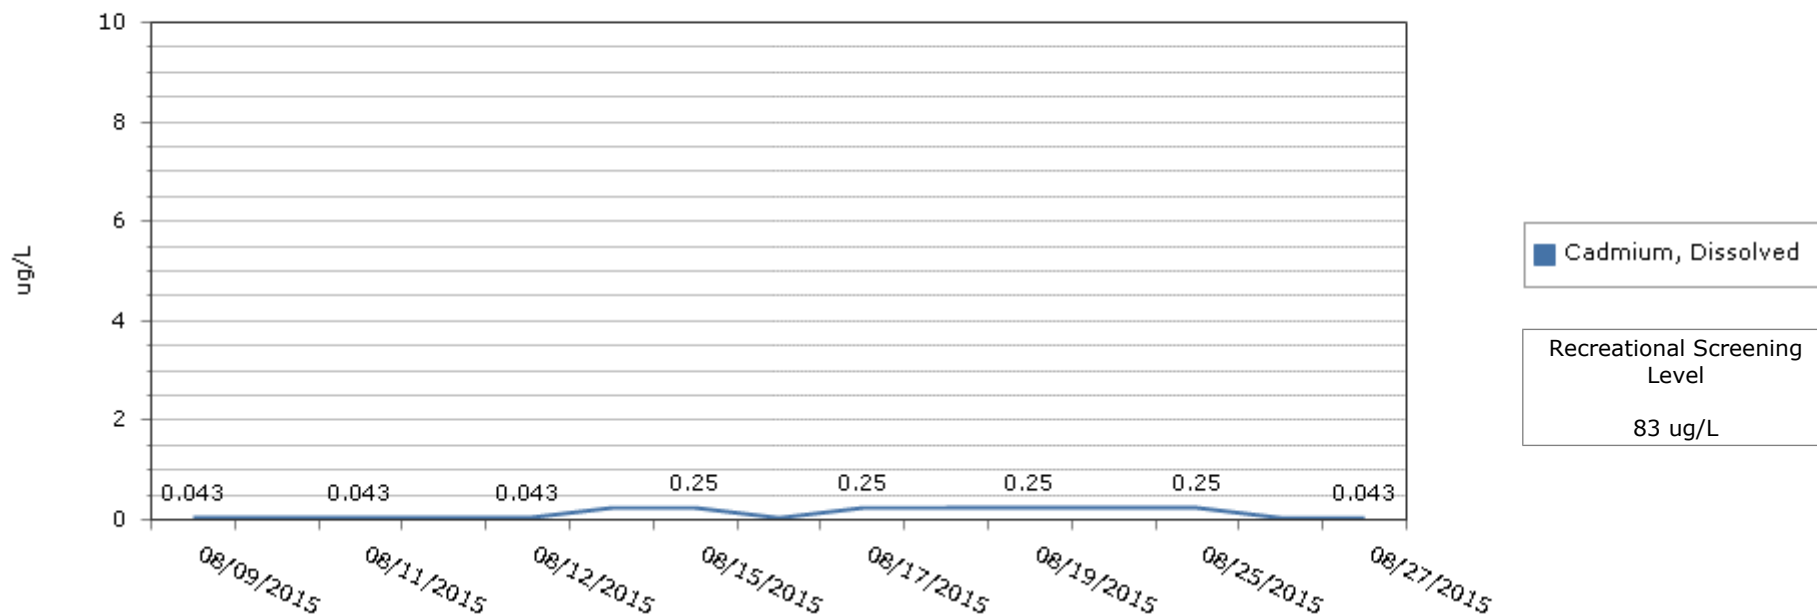

For samples with metal concentrations that were too low to detect, EPA plotted the Method Detection Level (MDL) value onto the trend graph.

The trend graphs do not specify which values are MDLs. Please refer to the data tables to determine the exact values of the sample results.

Beryllium, Dissolved for location SJ4C

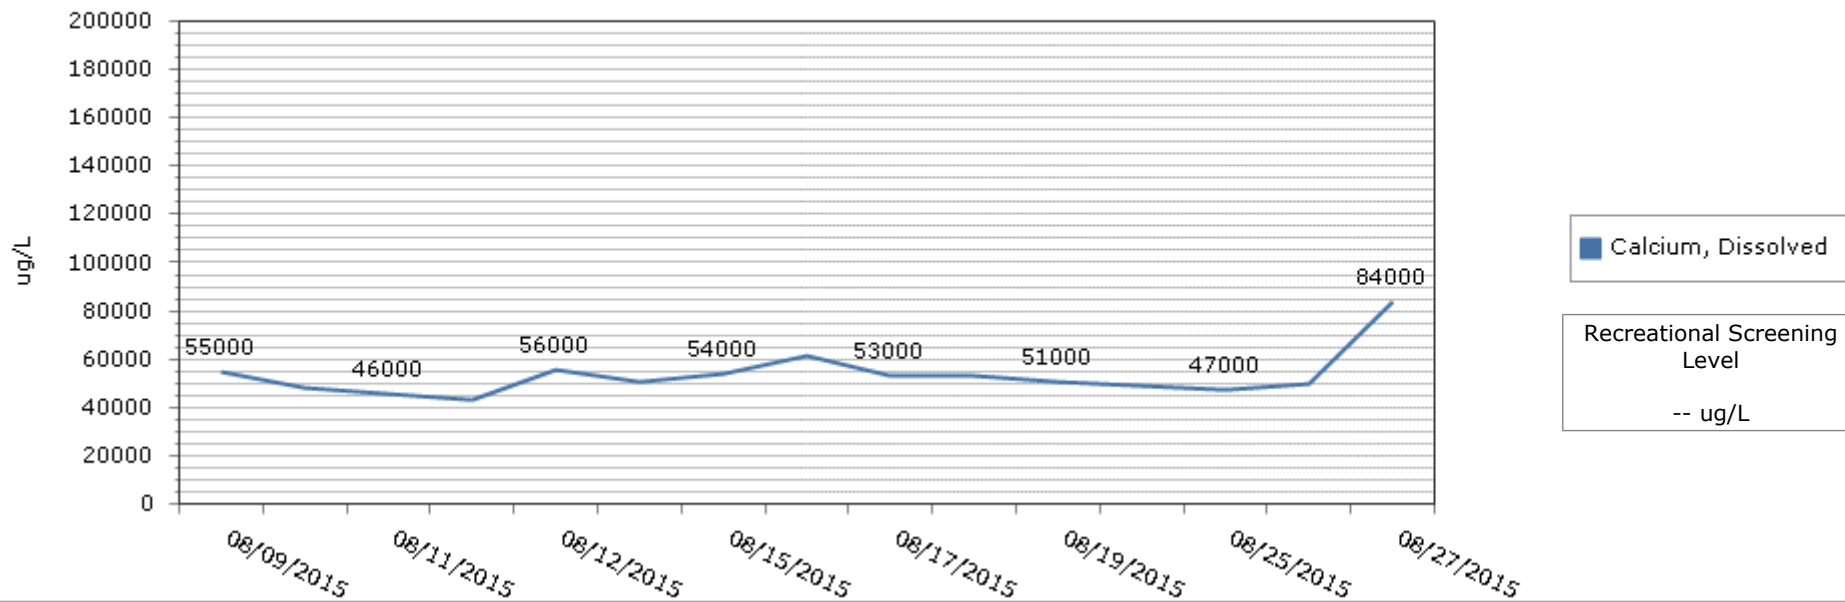

Cadmium, Dissolved for location SJ4C

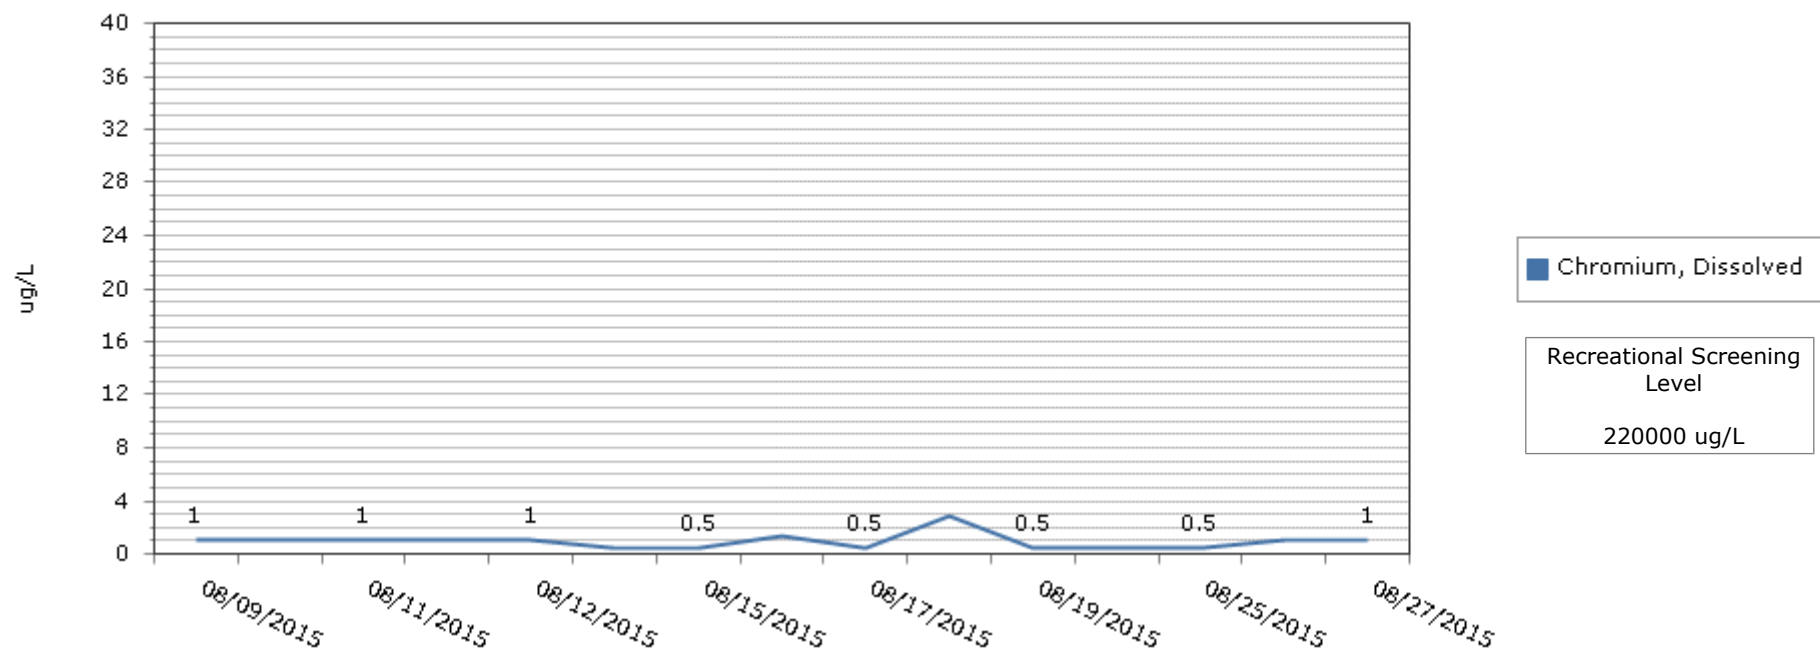

For samples with metal concentrations that were too low to detect, EPA plotted the Method Detection Level (MDL) value onto the trend graph.

The trend graphs do not specify which values are MDLs. Please refer to the data tables to determine the exact values of the sample results.

Calcium, Dissolved for location SJ4C

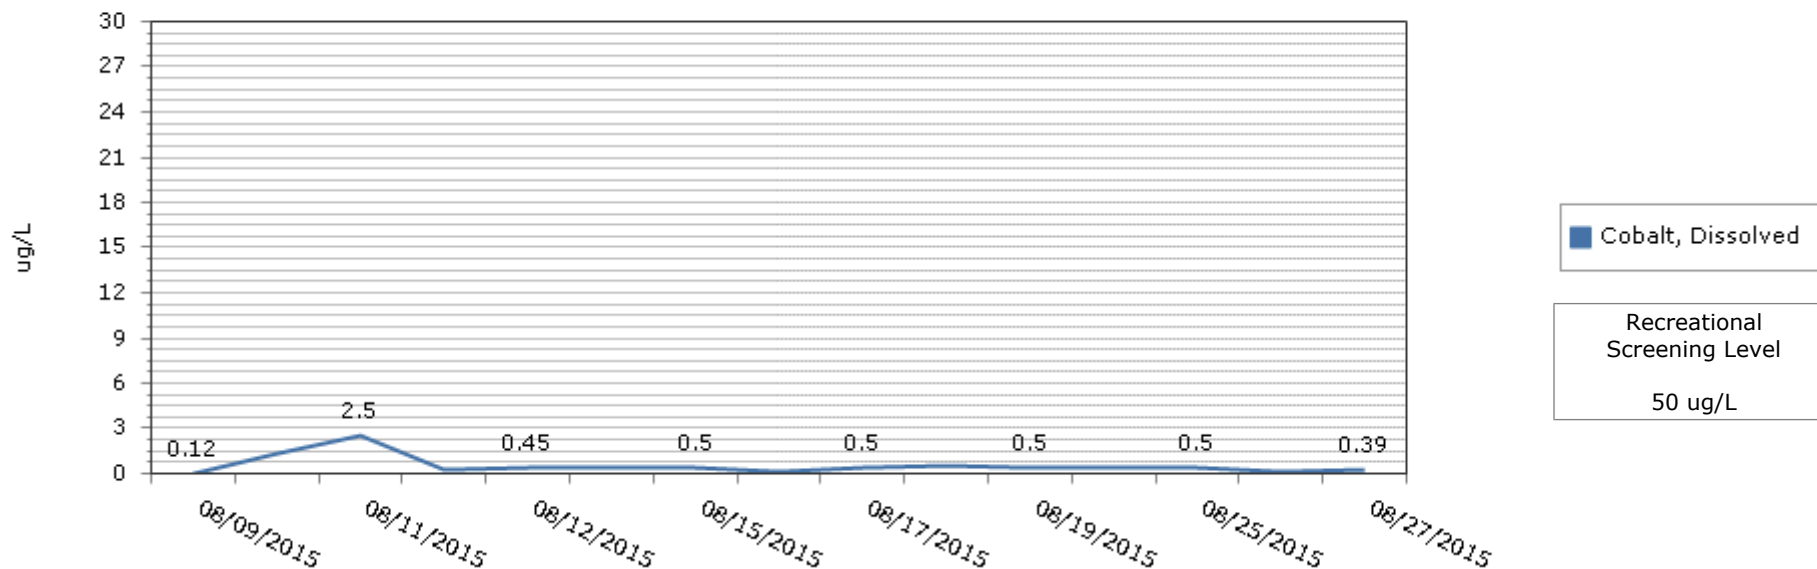

Chromium, Dissolved for location SJ4C

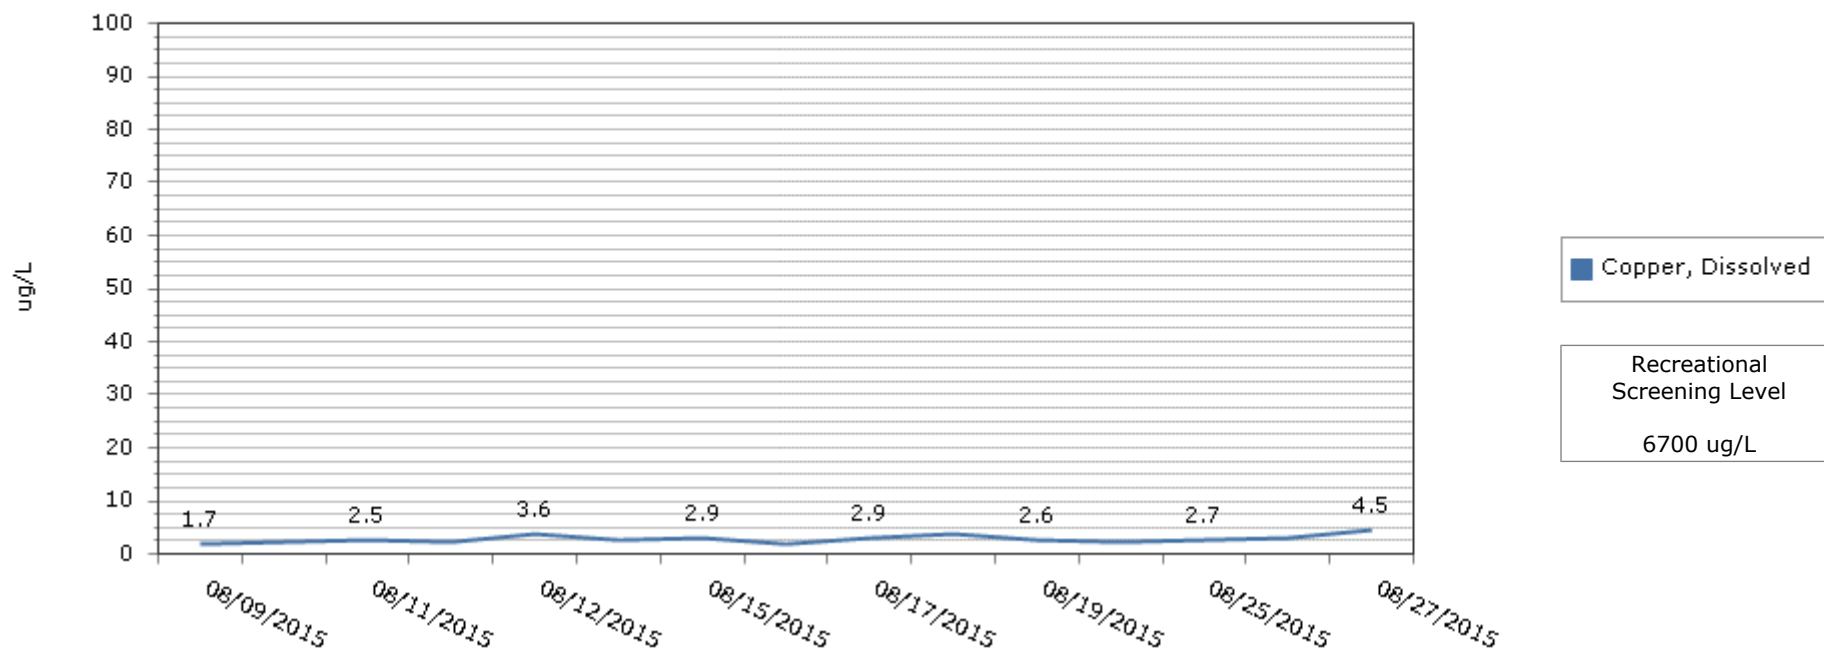

For samples with metal concentrations that were too low to detect, EPA plotted the Method Detection Level (MDL) value onto the trend graph.

The trend graphs do not specify which values are MDLs. Please refer to the data tables to determine the exact values of the sample results.

Cobalt, Dissolved for location SJ4C

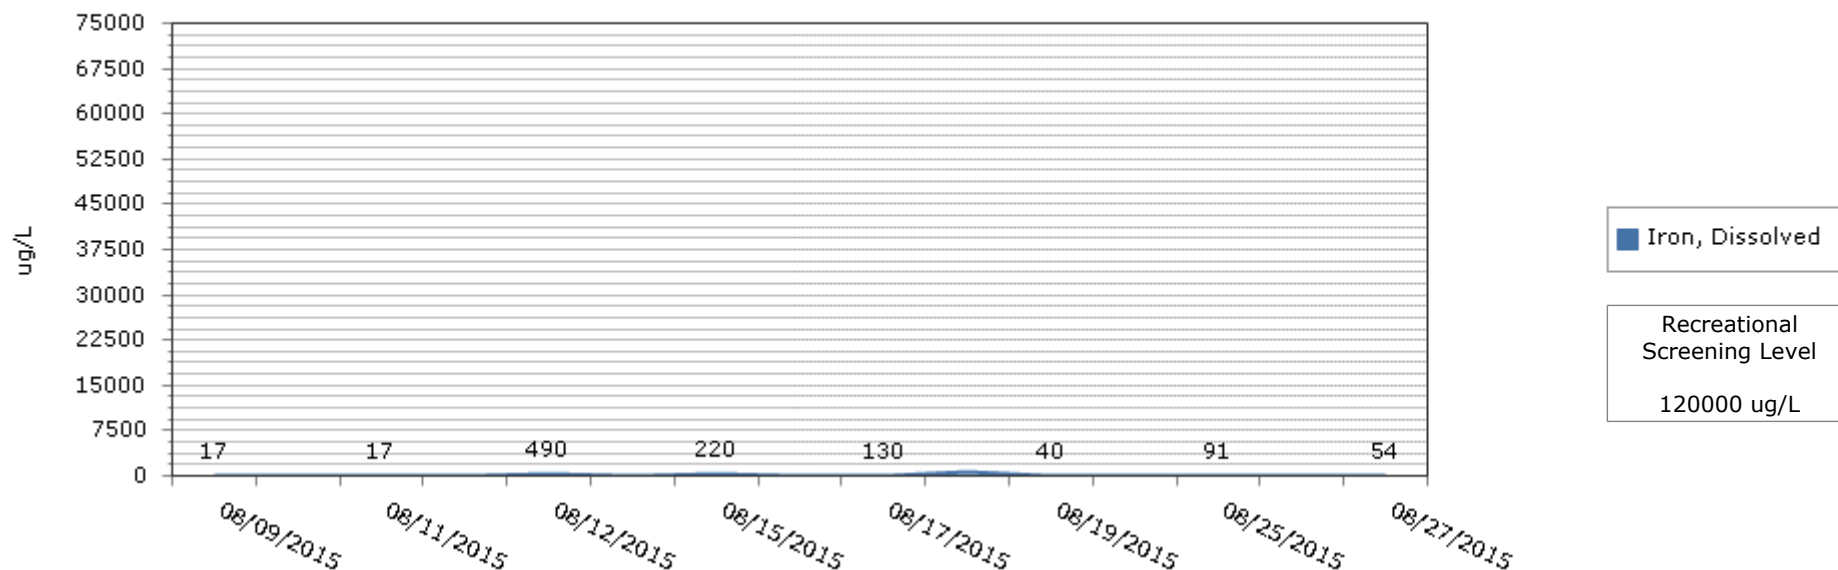

Copper, Dissolved for location SJ4C

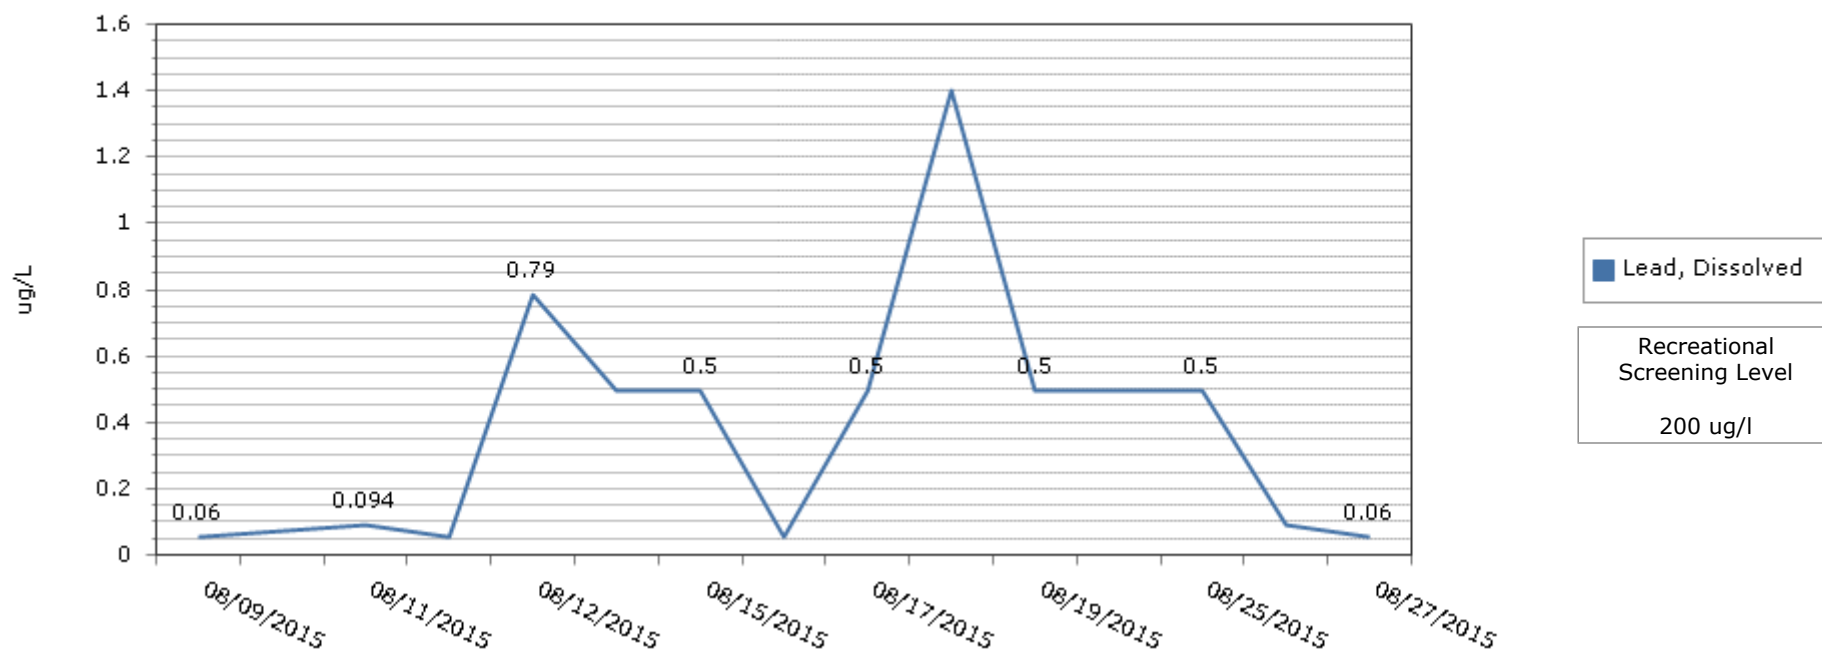

For samples with metal concentrations that were too low to detect, EPA plotted the Method Detection Level (MDL) value onto the trend graph.

The trend graphs do not specify which values are MDLs. Please refer to the data tables to determine the exact values of the sample results.

Iron, Dissolved for location SJ4C

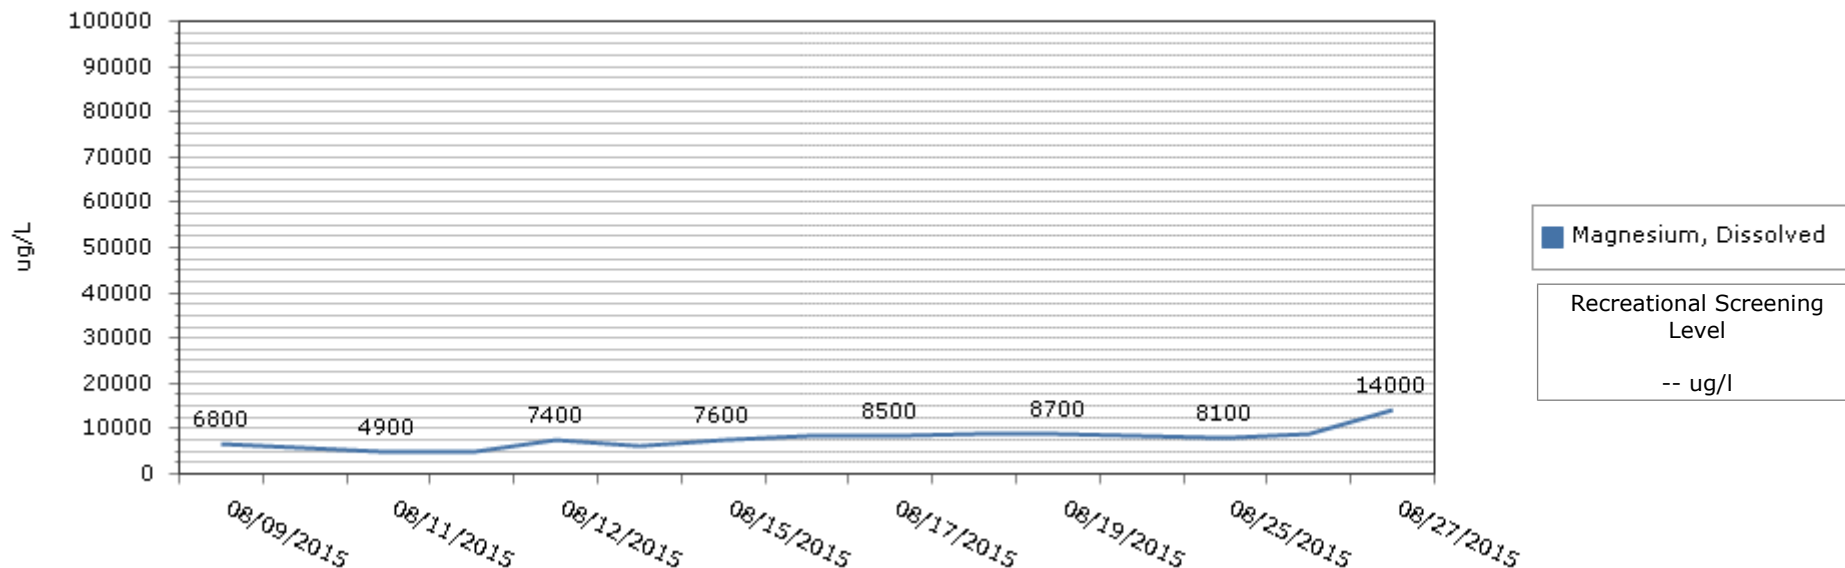

Lead, Dissolved for location SJ4C

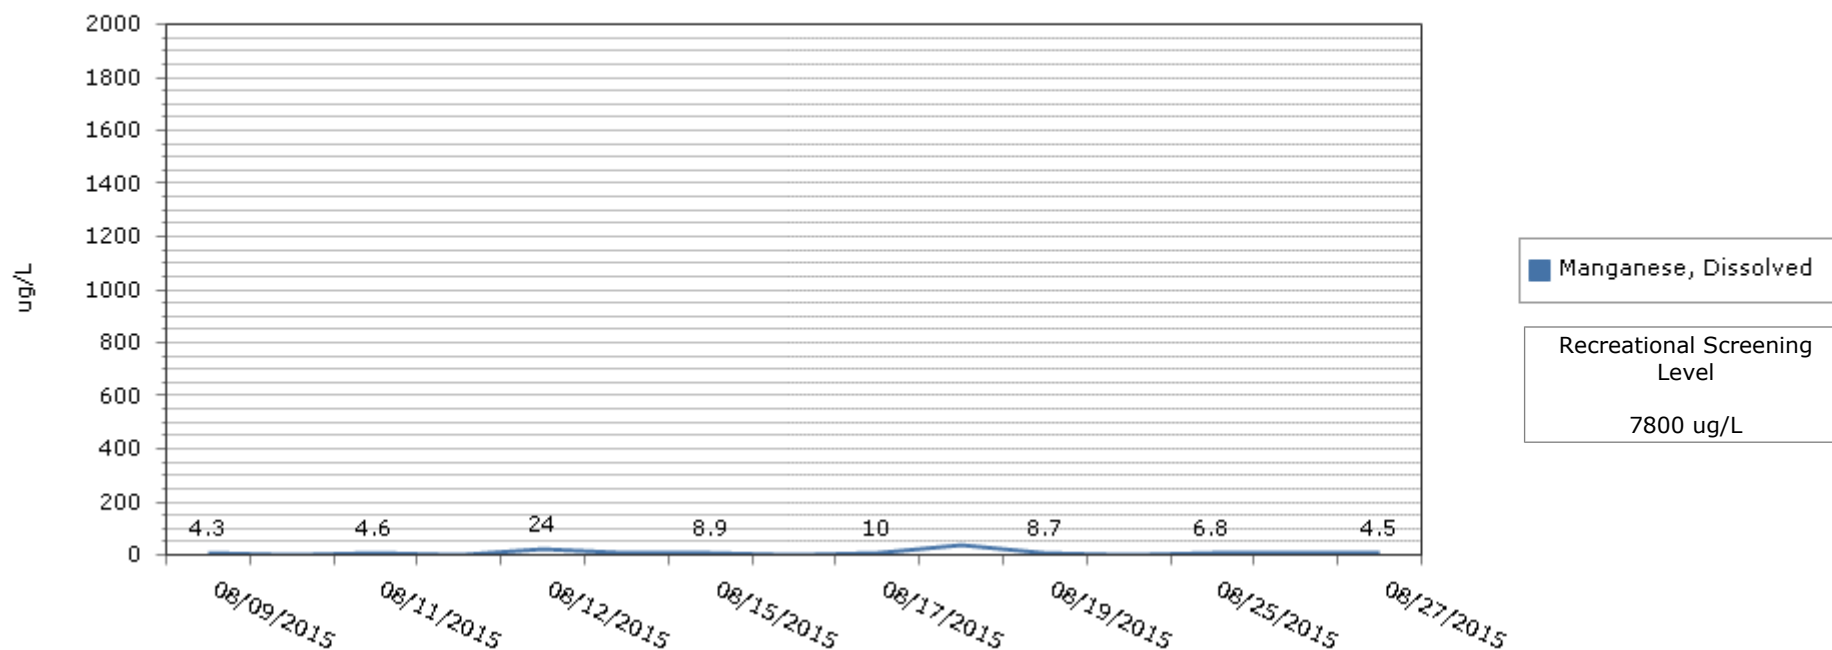

For samples with metal concentrations that were too low to detect, EPA plotted the Method Detection Level (MDL) value onto the trend graph.

The trend graphs do not specify which values are MDLs. Please refer to the data tables to determine the exact values of the sample results.

Magnesium, Dissolved for location SJ4C

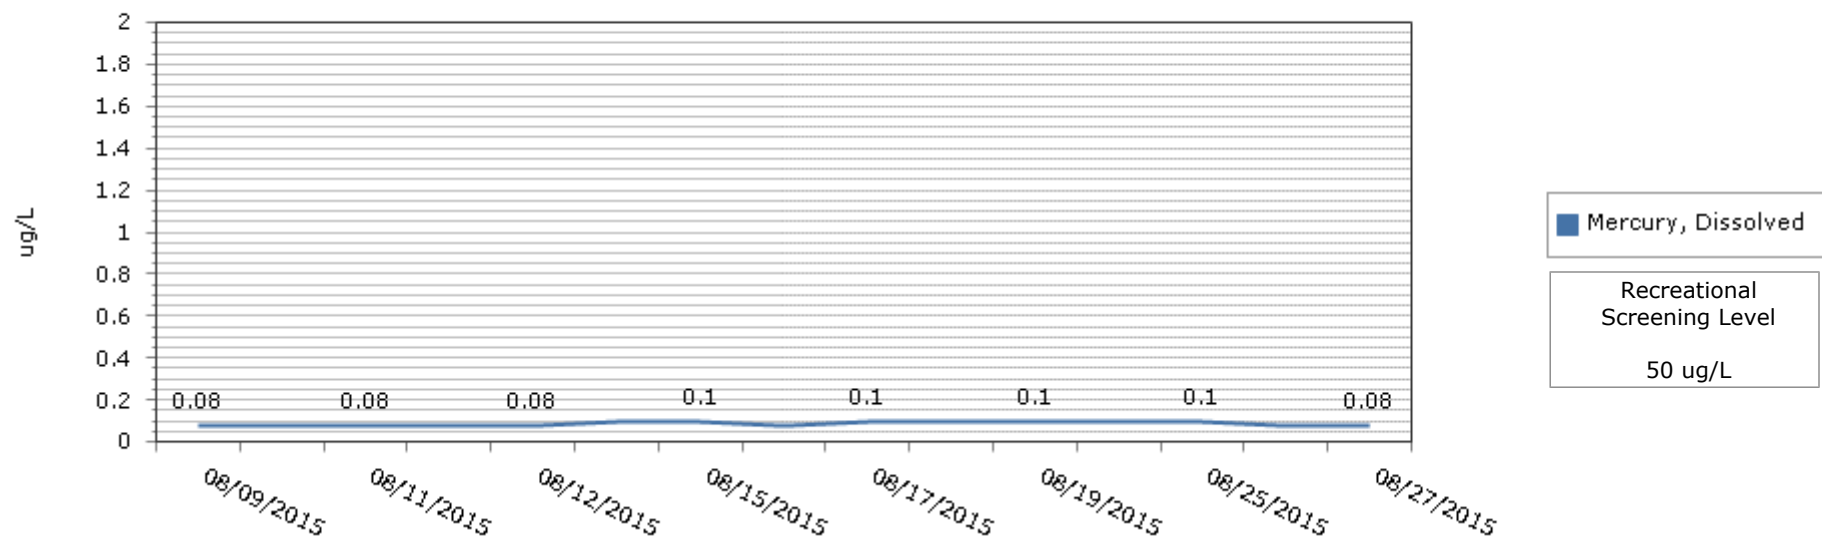

Manganese, Dissolved for location SJ4C

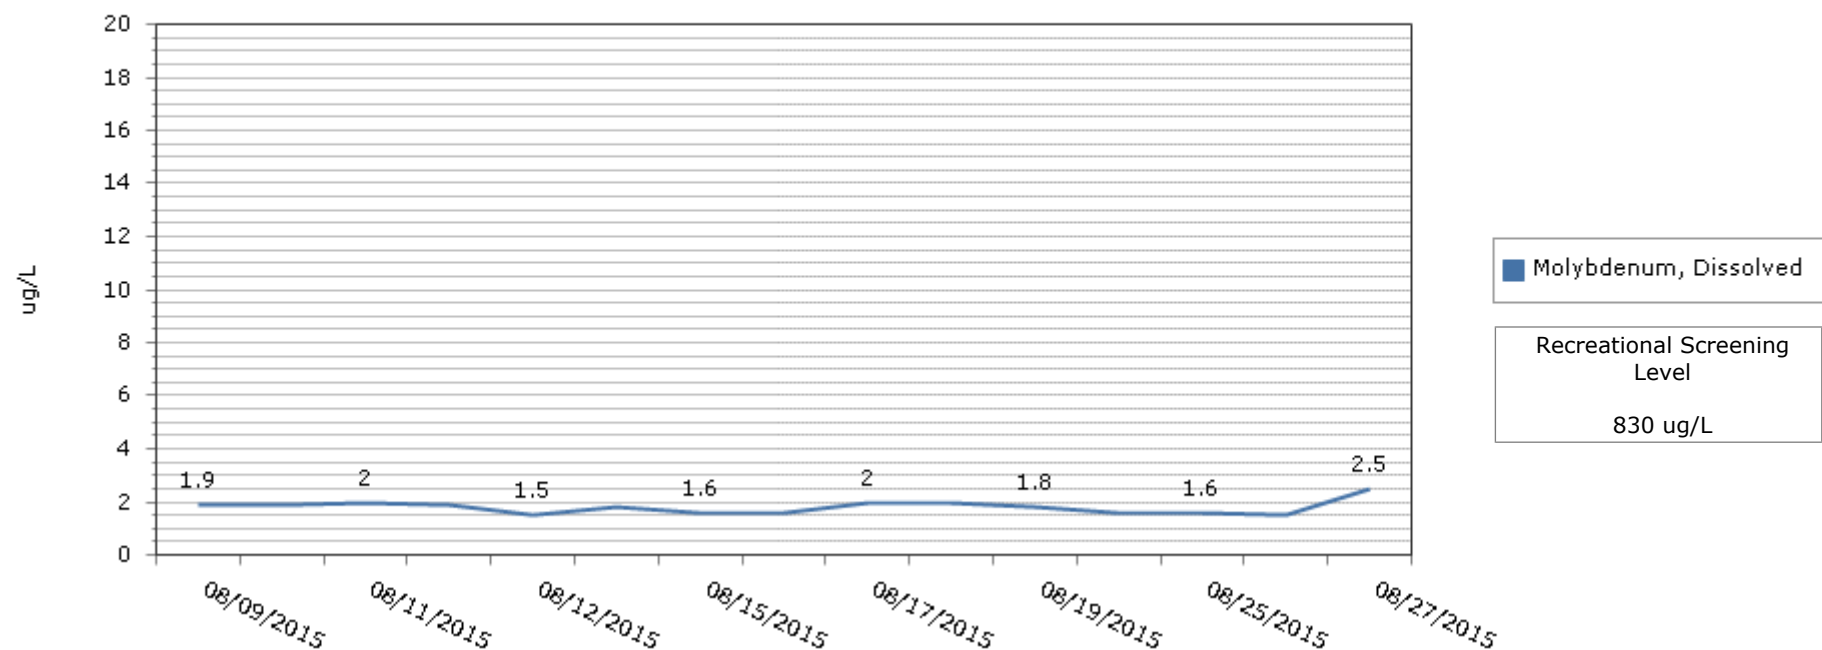

For samples with metal concentrations that were too low to detect, EPA plotted the Method Detection Level (MDL) value onto the trend graph.

The trend graphs do not specify which values are MDLs. Please refer to the data tables to determine the exact values of the sample results.

Mercury, Dissolved for location SJ4C

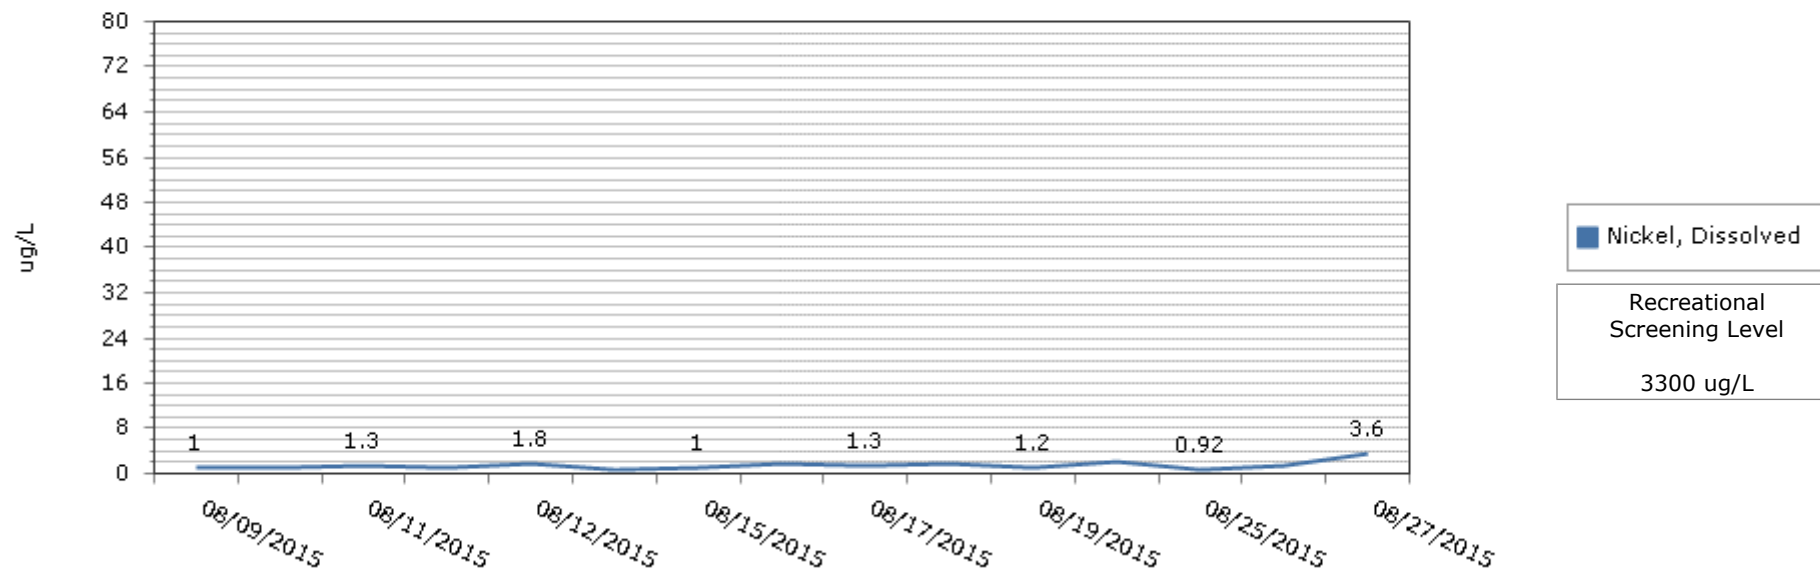

Molybdenum, Dissolved for location SJ4C

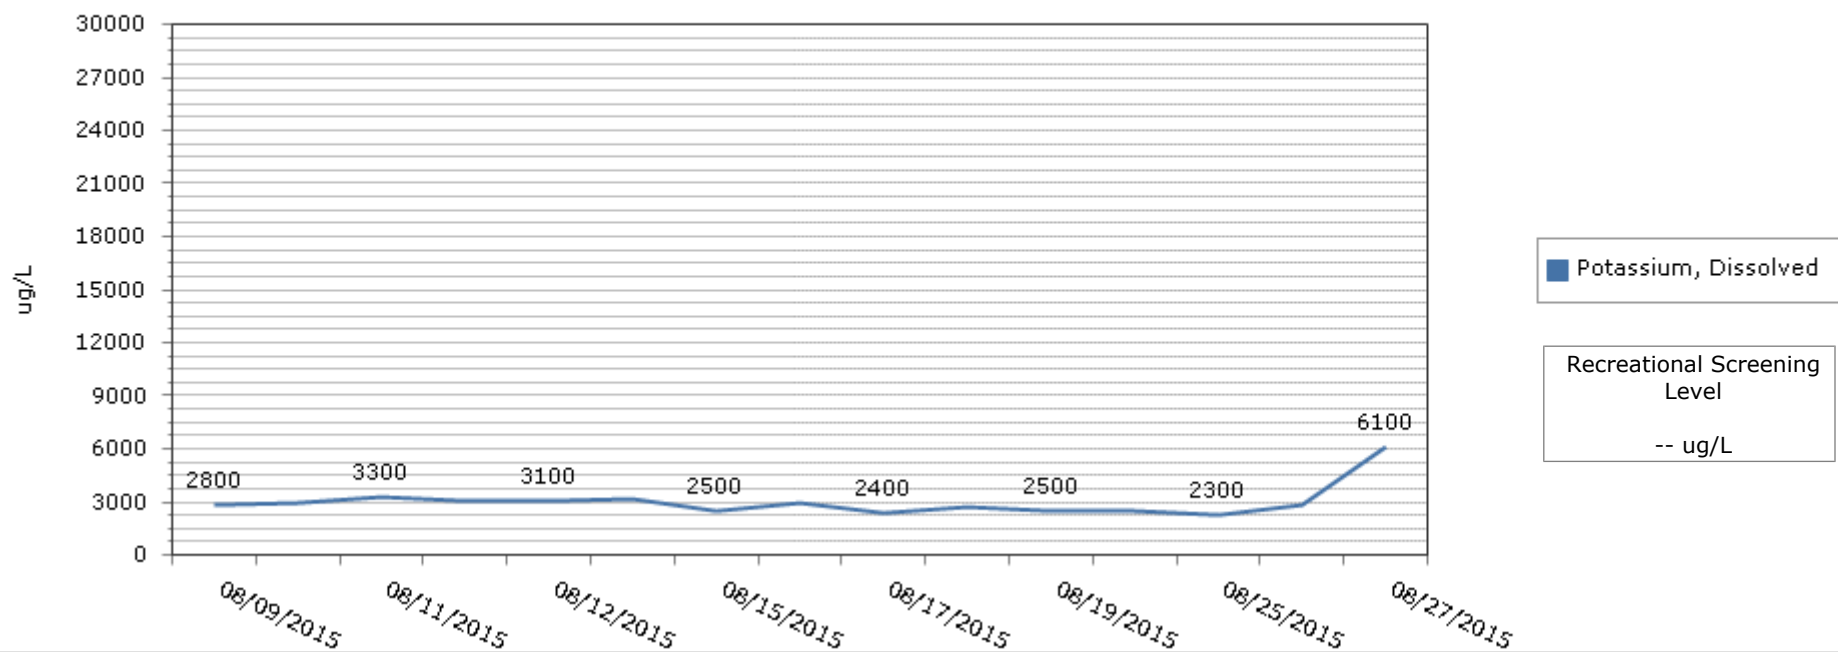

For samples with metal concentrations that were too low to detect, EPA plotted the Method Detection Level (MDL) value onto the trend graph.

The trend graphs do not specify which values are MDLs. Please refer to the data tables to determine the exact values of the sample results.

Nickel, Dissolved for location SJ4C

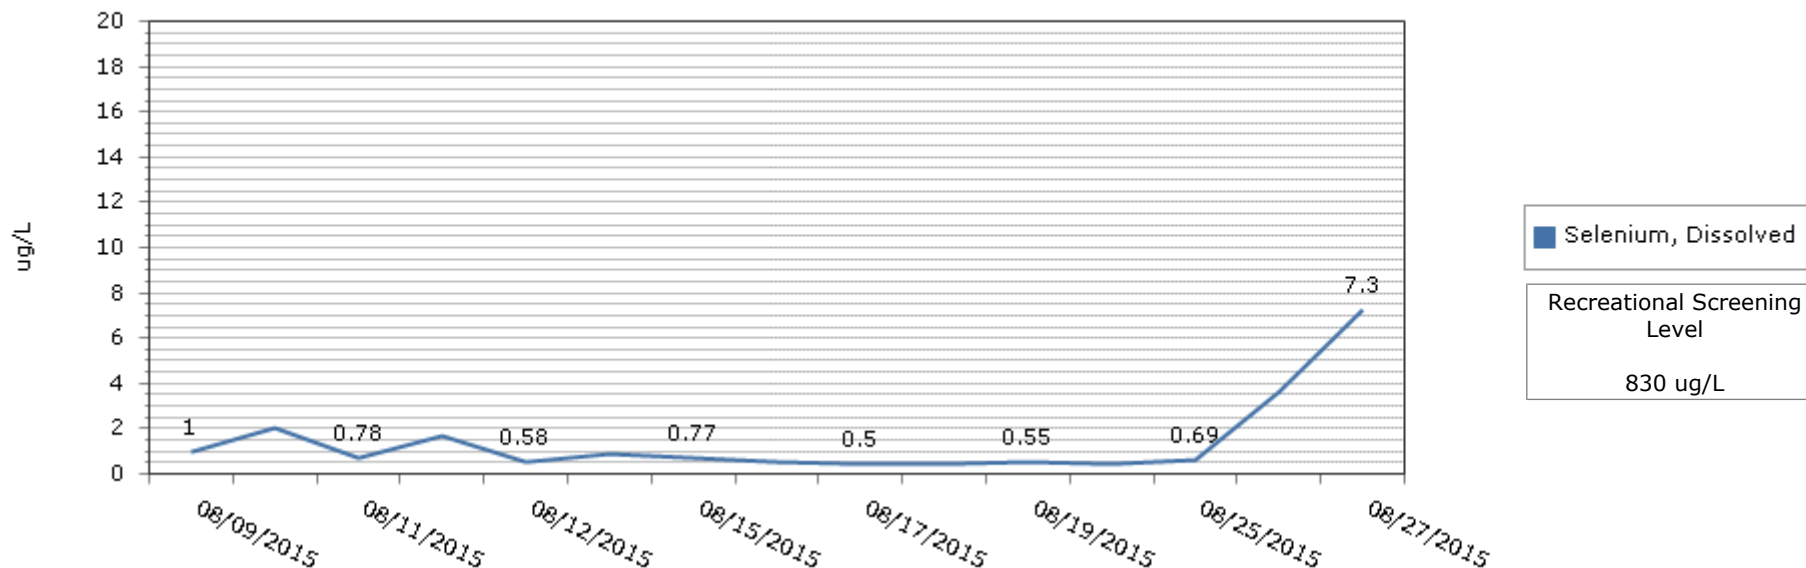

Potassium, Dissolved for location SJ4C

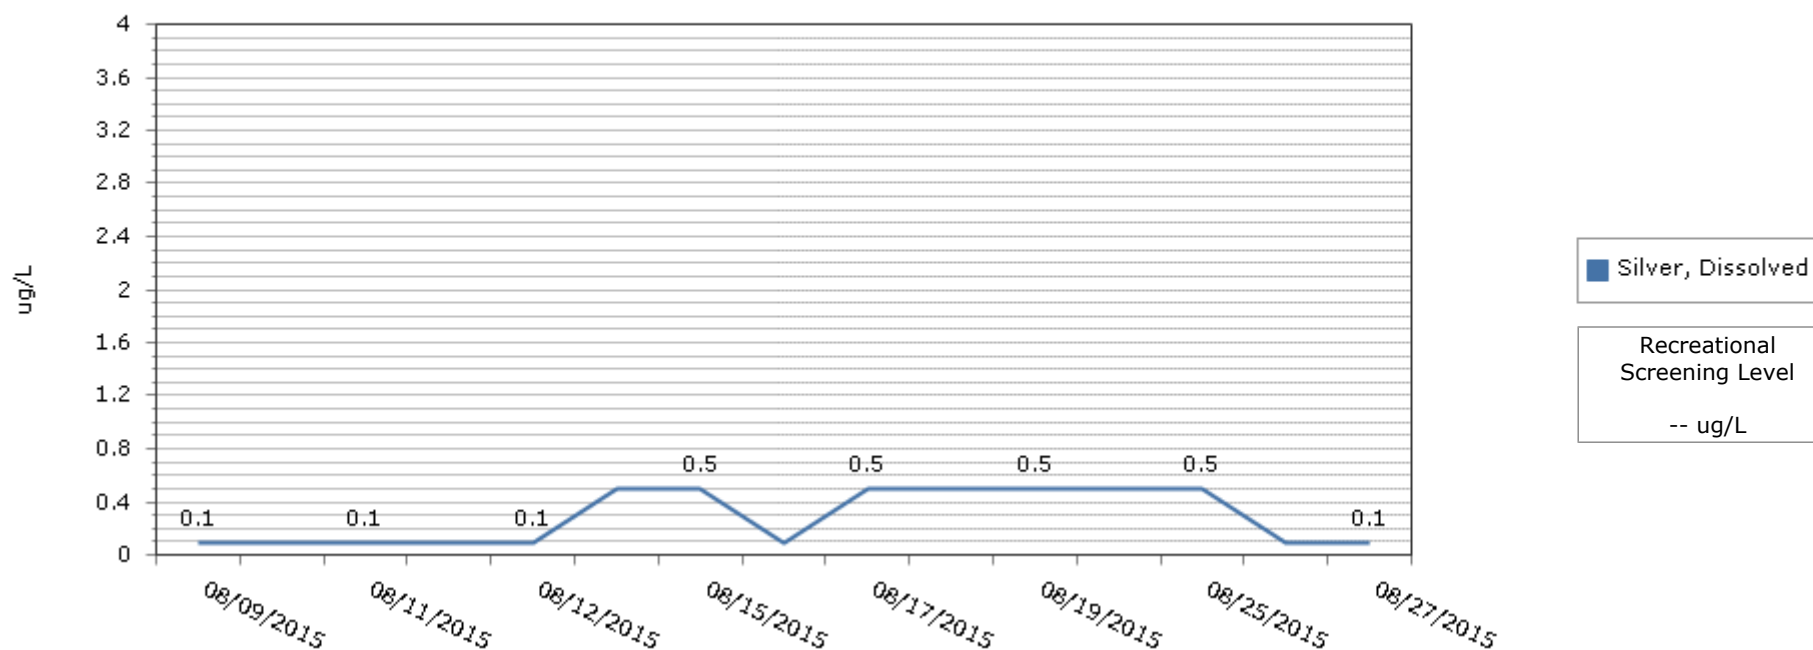

For samples with metal concentrations that were too low to detect, EPA plotted the Method Detection Level (MDL) value onto the trend graph.

The trend graphs do not specify which values are MDLs. Please refer to the data tables to determine the exact values of the sample results.

Selenium, Dissolved for location SJ4C

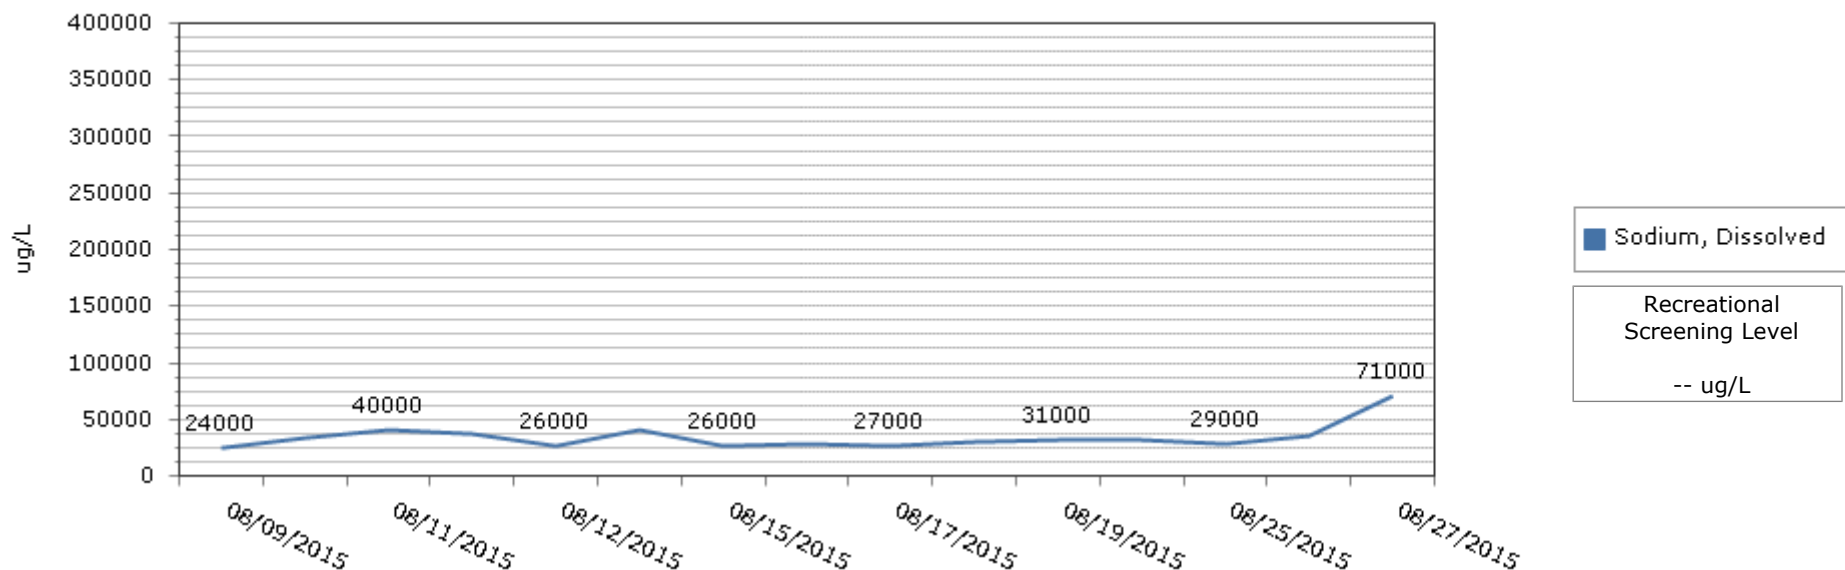

Silver, Dissolved for location SJ4C

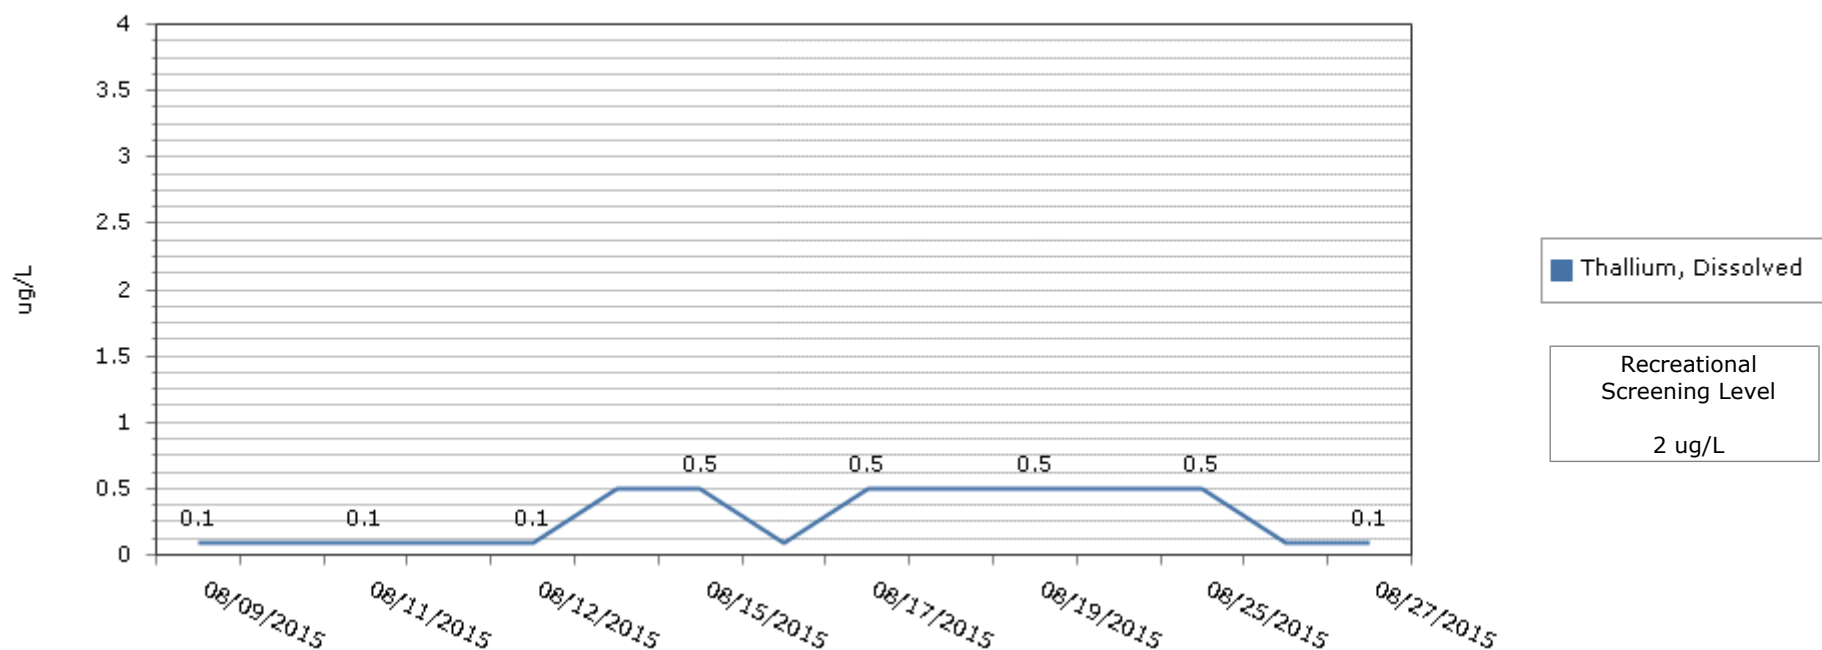

For samples with metal concentrations that were too low to detect, EPA plotted the Method Detection Level (MDL) value onto the trend graph.

The trend graphs do not specify which values are MDLs. Please refer to the data tables to determine the exact values of the sample results.

Sodium, Dissolved for location SJ4C

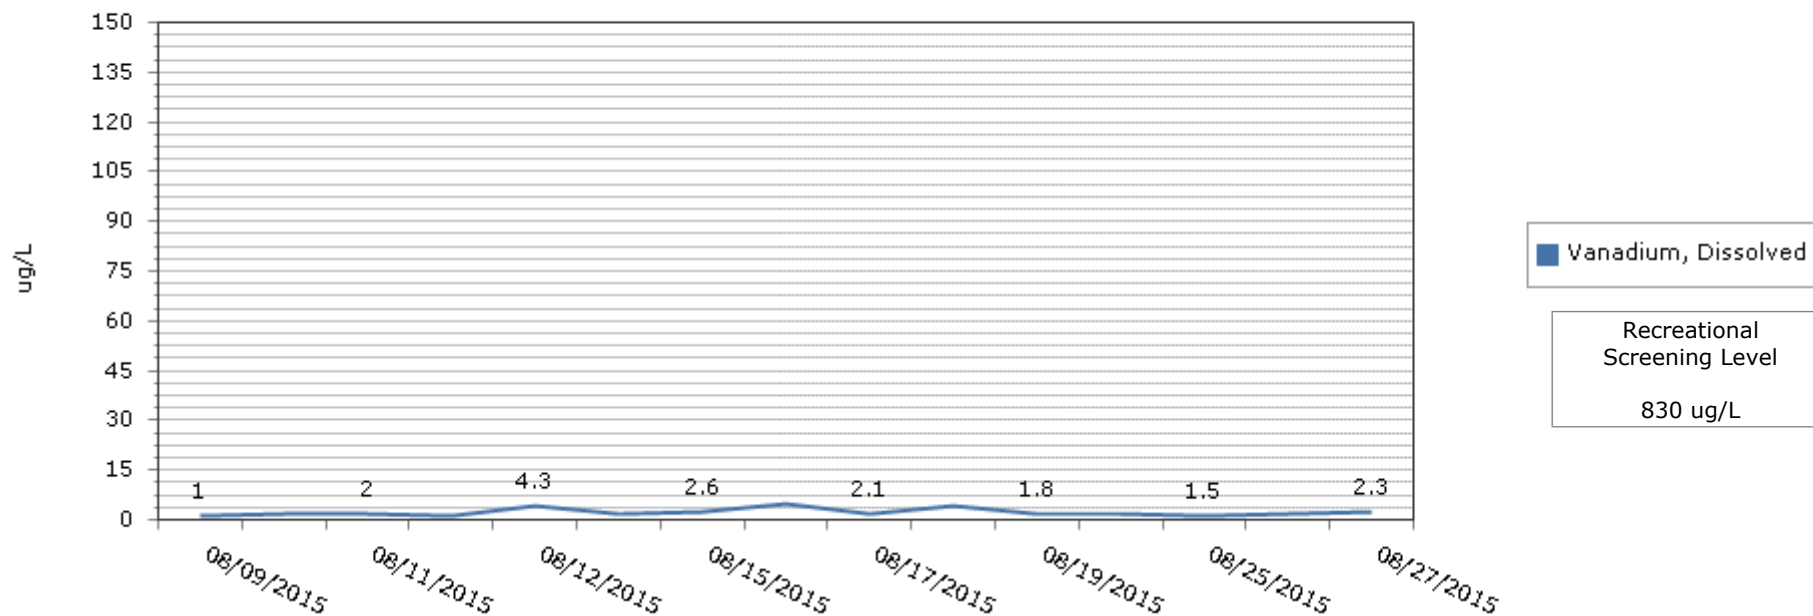

Thallium, Dissolved for location SJ4C

For samples with metal concentrations that were too low to detect, EPA plotted the Method Detection Level (MDL) value onto the trend graph.

The trend graphs do not specify which values are MDLs. Please refer to the data tables to determine the exact values of the sample results.

Vanadium, Dissolved for location SJ4C

Zinc, Dissolved for location SJ4C
