

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION 4

ATLANTA FEDERAL CENTER  
61 FORSYTH STREET  
ATLANTA, GEORGIA 30303-8960

June 14, 2011

The Honorable Rick Scott  
Governor, State of Florida  
The Capitol  
Tallahassee, Florida 32399-0001

Dear Governor Scott:

Thank you for your recommendations submitted to the U.S. Environmental Protection Agency October 15, 2009, and May 4, 2010 (recommendation letters), on air quality designations for the revised National Ambient Air Quality Standards (NAAQS) for lead throughout the State of Florida. This letter is to notify you of EPA's preliminary decision to designate portions of Florida as unclassifiable/attainment, and to inform you of our approach for completing the designations for the revised lead standards. Reducing levels of lead pollution is an important part of the EPA's commitment to a clean, healthy environment. Lead exposure can cause a range of adverse health effects, most notably in children. Exposures to low levels of lead early in life have been linked to effects on IQ, learning, memory, and behavior.

On October 15, 2008, the EPA substantially strengthened the health-based or "primary" NAAQS by lowering it from 1.5 micrograms per cubic meter ( $\mu\text{g}/\text{m}^3$ ) – a level set in 1978 – to a level of  $0.15 \mu\text{g}/\text{m}^3$ . This stronger standard provides increased protection against adverse health effects associated with exposure to lead in at-risk groups, including children. To provide increased protection against lead-related environmental and other welfare effects, the EPA revised the secondary NAAQS to be identical in all respects to the revised primary standard. The EPA also determined that the pre-existing ambient lead monitoring network was inadequate for determining whether many areas are meeting the revised lead standards and established new criteria for siting ambient lead monitors and new data collection requirements. Monitors meeting the new network siting requirements were to begin operation January 1, 2010.

Within two years of promulgating new or revised NAAQS, the Clean Air Act (CAA) requires the EPA to complete the initial process of identifying or designating areas that meet or do not meet an air quality standard. If the Administrator has insufficient information to make these designations, the EPA has the authority to extend the designation process by up to one year. In light of the new monitoring network, the EPA is completing the lead designations in two rounds. In the first round, published on November 16, 2010, the EPA designated as "nonattainment" 16 areas as violating the 2008 Lead NAAQS based on data from the pre-2010 monitoring network. For all other areas, the EPA extended the deadline for designations by up to one year so that data from the newly deployed monitors can be considered in making appropriate designation decisions. States were given an opportunity to update their recommendation letters for those remaining areas for our consideration in the second round of

designations by December 15, 2010. The EPA intends to complete the second round of lead designations by no later than October 14, 2011.

Consistent with the CAA, and after carefully considering Florida's recommendation letters and all the associated technical information for the 2008 Lead NAAQS, including the most recent air quality data from 2008-2010, the EPA is proposing to designate the portion of Hillsborough County outside the Tampa nonattainment area, and all remaining counties as unclassifiable/attainment. The EPA uses this designation for initial designations to identify areas that have data indicating attainment, or where there is no evidence of a violation.

If your state has additional information that the EPA should consider with respect to our proposed modification to your designation recommendation, please submit it to us by August 15, 2011. The EPA's preliminary designation decisions and supporting documentation will be made available to the general public for review. We will be accepting comments through August 15, 2011. We will review any information we receive from the State of Florida and the general public by this date, and we plan to promulgate the second round of final designations by October 14, 2011.

We look forward to a continued dialogue with you and your staff as we work together to implement the 2008 Lead NAAQS. Should you have any questions, please do not hesitate to call me, or have your staff contact Beverly Banister of my staff at 404-562-9077.

Sincerely,

Gwendolyn Keyes Fleming  
Regional Administrator
