² The 1-hour design value is the 98th percentile concentration averaged over the 3-year period.

³ The annual average is calculated by averaging all hourly NO₂ concentrations measured during a year

* Site does not have valid data. A site must have valid data to be used for designations. The 1-hour standard design value is valid if it encompasses three consecutive calendar years of complete data. The annual standard design value is valid when at least 75 percent of the hours in the year are reported.
