# Navajo Abandoned Uranium Mine

## Site Screen Report

This form is for use at the site of abandoned uranium mines (AUM) located on Navajo Nation lands. Applicable sites include all mine and mine features that have or have not undergone reclamation by the Navajo Abandoned Mine Lands Reclamation Program, including features, adits, pits and waste piles. Applicable sites also include all AUM sites listed in the USEPA CERCLIS database, all sites listed in the 2008 AUM GIS Report issued by USACOE and USEPA, all AUM sites on allotment lands associated with the Navajo Nation, and any and all AUM sites not listed in any database located on Navajo lands. Reconnaissance of any sites located on lands adjacent to Navajo lands that may be impacting Navajo lands will need to be coordinated with the authorities appropriate to those lands.

The purpose of the form is to ascertain the status and location of the identified AUM site, and record all immediate site information associated with the mine site. Decisions and recommendations on what additional steps are needed will be provided on a separate document.

## **Black Rock Point Mines AUM Site**

Navajo AUM Northern Region

Tribal Trust Private Bureau of La State		]	Public lands Tribal Fee Land Allotment Fee land		
Subsurface M	Iineral Rights:				
No informatio	n on subsurface mi	ineral rights	ownership was fo	und in the E	EPA/AUM Database.
Claim and op	erator informatio	on:			
	surface land status ation was identified			and. No oth	er historical ownership
Number of re	esidential structur	res within 20	00 feet of mine:	None	
Estimated vol	lume of mine wast	te onsite: 2	2,780 yd <sup>3</sup>		

#### Part II Summary of radiological readings

#### **Highest gamma radiation measurement:**

193,453 counts per minute (cpm)

#### Describe any other radiological measurements:

A total of 3,090 gamma radiation measurements were collected from the mine site, ranging from 6,192 cpm to 193,453 cpm. Measurements collected in the vicinity of the waste debris were found at levels up to approximately 190,000 cpm, and near the adit at levels up to approximately 20,000 cpm. The measurements are represented in Figures 1 and 2.

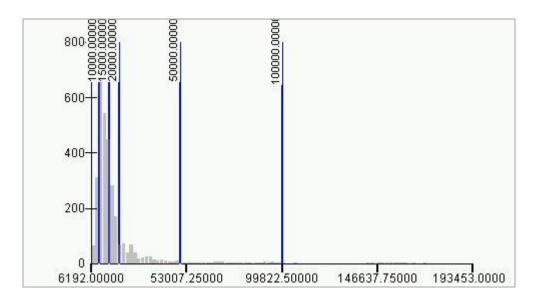

## **Background Locations**

**Average background =** 10,180 cpm

#1 10,180 cpm

#### **Distribution Chart and Statistics:**

The following chart and statistics were generated by ESRI ArcGIS 9.3.1, and show the general distribution of the site gamma radiation measurements. The horizontal X axis represents the gamma radiation reading levels in cpm (lowest levels to the left). The vertical Y axis represents the frequency of each gamma radiation level.

 Count:
 3090

 Minimum:
 6192,00000

 Maximum:
 193453,00000

 Sum:
 60087187,00000

 Mean:
 19445,69159

 Median:
 13545,50000

 Standard Deviation:
 21165,95822

#### Part III Status of Reclamation and Mine Waste

The following information was obtained from the Navajo Abandoned Mine Land Reclamation Program (NAMLRP) Point Features Database:

NAMLRP Status of the mine site: Reclaimed: Yes Waste Pile onsite: Yes

NAMLRP Project Number: NA-0906, NA-0902

**NAMLRP Mine features:** 7 Portals, 4 Prospects

The following information was obtained from field observations collected during the 2010 site screening:

Provide description and status of all mine sites and features at site. Include all waste piles, adits, pits and other features, and indicate whether they are open, closed, covered, capped, buried or unreclaimed. Indicate approximate size, shape and extent, including description of any reclamation caps. Note condition of all caps.

#### **Observed reclamation work and status:**

#### **Adits**

4' x 3' hole, local resident claimed it was actually a dirt covered steel-sealed adit

#### **Waste Piles**

200' x 75' x 5' down-hill below hole area; additional rock scattered throughout site

#### **Pits**

None

#### **Shafts**

None

#### **Other Debris and Mine Features**

None

#### Part IV

#### **Site observations and Environs**

Observed Structures: list number of and describe human habitation status of structures at the following distances from mine:

**0 to 200 feet:** None

200 feet to 0.25 mile:

Observed Public or commercial structure: list and describe all schools, clinics, Chapter Houses, places of business and any other structure used by members of the community at the following distances:

0 to 200 feet: None

200 feet to 0.25 mile: None

Levels measured around the perimeter(s) of the identified structure(s):

Consistent with background levels

Observed water sources: list the number and type of wells and surface water sources that are potentially used for human consumption at the following distances from the mine:

0 to 0.25 miles: None

**0.25 miles to 4 miles:** Clark house well 0.75 mi NW of site

Sensitive environments: note and describe all sensitive environments located within visible range of the mine site, including: wetlands, endangered species, habitats and approximate locations of sites that may be under protection of the government of the Navajo Nation.

None

Known Site History: include information from interviews with Chapter officials and residents. Note information on mine ownership, type of mining operation, period of operation, known amount of production, and any other information as provided.

Black Rock Point Mines consists of an area of 95,221.63 m<sup>2</sup>. The mine was identified as being operational from 1951 to 1966. Historical documents showed the operator of the mine as Thomas Clani from 1951 to 1958, and in 1962, and VCA from 1965 to 1966. While operational, the mine had a total reported production volume of 2,025 tons. No other historical information or any additional ownership / lease information was identified in the EPA/AUM database.

### Part V Response Action Summary

**Site Name(s):** Black Rock Point Mines Chapter: Teec Nos Pos

#### **Decision Criteria**

Is there an unreclaimed waste pile at the site? Yes

At what distance from the waste pile is the nearest residential structure located?

At what distances from the waste pile are there potential drinking water sources? 0.75 mi

Is there a reclamation cap or sealed adit in place at the site? Yes

Is the cap/seal functionally intact? Yes

Is the cap/seal sufficiently degraded to create a concern about releases? None

At what distance from the cap/seal is the nearest domestic structure located?

At what distance from the cap/seal is the nearest domestic drinking water source? 0.75 mi

#### **Summary of emergency response factors**

None

#### **Summary hazard ranking system factors**

None

#### **Summary of reclamation factors**

Sealed/buried adit; unreclaimed waste rock
