

This workbook contains information on the datasets used to create the 2012 non-EGU and nonpoint emissions projections developed for the Transport Rule Final rulemaking.

The included sheets are as follows:

- * ptnonipm_programs_2012: gives information about the datasets used to project the 2005 non-EGU point emissions from 2005 to 2012, and the affected inventories
- * ptnonipm_cap_2012: gives the national impact of each control program for CAPs
- * ptnonipm_cap_st_2012: gives the impact of each control program for CAPs by state
- * ptnonipm_cap_plant_2012: gives the impact of each control program for CAPs by plant
- * nonpt_programs_2012: gives information about the datasets used to project the 2005 nonpoint emissions from 2005 to 2012, and the affected inventories
- * nonpt_cap_2012: shows the impact of control programs on nonpoint emissions nationally
- * nonpt_capst_2012: shows the impact of control programs on nonpoint emissions by state
- * WRAPoilgas_to_2012: shows the impact of control programs nationally and by state on this inventor
- * TCEQ_OK_OilGas_to_2012: shows the impact of control programs nationally and by state on this inve
- * lm_programs_2012: gives information about datasets used to project locomotive and marine emissic
- * lm_2012: shows the impact of the programs nationally and by state

Dataset Version	Description
0	Controls that reflect enforceable controls for NOx and VOC from the New
1	Controls for 2012 that represent three separate RICE NESHAPs
0	Controls for TCEQ oil and gas and non-ISIS related cement controls.
0	Projection factors for agriculture based on animal population stats.
1	Projection factors for residential wood combustion and landfills.
0	Projection factors for gasoline stage 2 refueling.

York ozone SIP.
