This workbook contains information on the datasets used to create the 2014 non-EGU and nonpoint emissions projections developed for the Transport Rule Final rulemaking.
The included sheets are as follows:

* ptnonipm_programs_2014: gives information about the datasets used to project the 2005 non-EGU point emissions from 2005 to 2014, and the affected inventories
* ptnonipm_cap_2014: gives the national impact of each control program for CAPs
* ptnonipm_cap_st_2014: gives the impact of each control program for CAPs by state
* ptnonipm_cap_plant_2014: gives the impact of each control program for CAPs by plant
* nonpt_programs_2014: gives information about the datasets used to project the 2005 nonpoint emissions from 2005 to 2014, and the affected inventories
* nonpt_cap_2014: shows the impact of control programs on nonpoint emissions nationally
* nonpt_capst_2014: shows the impact of control programs on nonpoint emissions by state
* WRAPoilgas_to_2014: shows the impact of control programs nationally and by state on this inventor
* TCEQ_OK_OilGas_to_2014: shows the impact of control programs nationally and by state on this inve
* lm_programs_2014: gives information about datasets used to project locomotive and marine emissic
* lm_2014: shows the impact of the programs nationally and by state

Description
Cement plant and unit closures identified via the ISIS 2013 policy case.
Plant and unit closures identified through EPA review.
Plant and unit closures through 2014 identified as a result of Transport Rule comments.
Plant and unit closures identified 2008 or before.
Controls that implement OECA consent decrees.
Cement plant and unit closures identified via the ISIS 2013 policy case.
Controls resulting from the 2002v3 DOJ Texas settlement.
Hazardous Waste Incinerator controls for CAPs and Haps carried over from 2002v31.
Industrial boiler controls not related to application of the MACT but derived from the Boiler MACT ICR database dated 4/30/10.
Controls for large municipal combustors carried over from 2002v31.
MACT controls carried over from 2002v3 and updated as appropriate.
Controls that reflect enforceable controls for NOx and VOC from the New York ozone SIP.
Controls for refineries specified by EPA expert refinery staff.
Controls for 2014 and 2016 that represent three separate RICE NESHAPs
SO2 reductions from the Ultra-low Sulfur Diesel requirement for CI engines
Controls for NOx, SO2, PM., and HCl resulting from Saint Gobain and Lafarge consent decrees
SO2 reductions due to state sulfur content rules for fuel oil.
Controls related to consent decrees identified during the Transport Rule comment period.
Controls for TCEQ oil and gas and non-ISIS related cement controls.
Projection factors for aircraft derived from the FAA Terminal Area Forecast System.
Projection factors that implement the 2013 ISIS policy case for cement.
Projection factors for Solid and Liquid Municipal Waste Combustors.
Projection factors for gasoline stage 2 refueling.
Projection factors derived from Transport Rule comments.
