EPA-R5-2017-008095	Shannon E. Lisa	Edison Wetlands Association	06/06/2017 01:06:00 PM	This application under the FOIA requests information on three Superfund sites in Johnson County, Indiana. The 501©(3) non-profit, Edison Wetlands Association, Inc. (EWA) requests a file review of the complete administrative records at any EPA repositories on: Webb Wellfield, C.R. 200 N and N. 400 E, Franklin, IN Amphenol Products Company Plant at 980 Hurricane Road, Franklin, IN Atterbury Reserve Forces Training Area, Hospital Road, Edinburg, IN This includes files held by the EPA and any other agency, including but not limited to: the ATSDR, DOH, DOD and any and all state and federal agencies. This request covers all media including electronic, paper, messages, notes, e-mails, video and audio regarding the referenced sites. The EWA has been dedicated to protecting human health and the environment via education, action, and public awareness since 1989, and has provided technical assistance to communities throughout the US. The EWA is partnered with stakeholders in the Johnson County, IN region, including those affiliated with Trevor's Law (S.50). The EWA is working to acquire, review, and disseminate information about the aforementioned sites in simple-to-understand language to stakeholders through fact sheets, newsletters, presentations, and other media. This will improve meaningful public participation in federal and state-led Superfund processes in Johnson County. The requested information will also give local wealth-challenged families the tools needed to improve communication with the EPA, the Indiana Dept. of Environmental Management (IDEM), and other agencies. The reason for review of the complete administrative record from both the removal and remedial branch is that it will provide understanding and certainty of the contents of the administrative record. This request will significantly contribute to public understanding of the Superfund process, and EPA and other government agencies' roles in the monitoring and remediation of the sites.

EPA-R4-2017-008633	Daniel O. Reddy	Naval Reactors Facility	06/20/2017 06:06:05 PM	Hello, My name is Daniel Reddy. I am a student conducting a summer research project at Naval Reactors Facility on PCB extraction. I came across an article that referenced an experimental study conducted by Stewart at ORNL in 1988 validating EPA Method 3541 (SOXTEC extraction) in comparison to EPA Method 3540 (Soxhlet extraction). These are the references for the documents that are seemingly impossible to find: Stewart, J. EPA Verification Experiment for Validation of the SOXTEC PCB Extraction Procedure, Oak Ridge National Laboratory, Oak Ridge, TN, 37831-6138, October 1988. Stewart, J. Intra-Laboratory Recovery Data for the PCB Extraction Procedure. ORNL, Oak Ridge, TN 37831-6138. October 1989. I have been in touch with the ORNL librarian, who has also contacted an EPA librarian, but neither has been able to locate these documents. My study is attempting to reconcile EPA Methods 3540 and 3541 as part of my summer internship at NRF. Having copies of these documents is very important to the progress of my study because I would like to model my study based on the Oak Ridge study. Since they were sent to EPA for verification, I hope that these documents can be obtained. Thank you, Daniel Reddy

EPA-R4-2017-008610	justin b. jones		06/20/2017 01:06:00 PM	trying to find out who has been calling the N.C. epa on me for burning yard debris in my yard in robenson county. about a month ago I started getting the robenson county epa man coming to my house saying someone was calling the N.C.epa on me for burning yard debris in my yard which happens to be in the county not the city. which in the county you can burn yard debris. the man from robenson county epa said he didn't see a problem with what I was doing because the county allows that. well next thing I know I start having the robenson county epa man at my house every day for a week straight because someone was calling in to the N.C epa saying I was burning shingles and bringing yard debris from jobsites and burning it in my yard. I happen to work for a tree service which has its own dump spot for debris so none was coming to my house but whoever was calling wasn't calling the robenson county eps they where calling the N.C. epa instead and said they had watched us bring the debris in from other jobsite and had dates and times. well we explained to the robenson county epa that we hadn't and he tried telling the N.C epa man that but he called him a liar and said he knew for a fact that we were bring it in from other jobsites but yet the N.C. epa said he had never been by my house he was only going by what he was been told by the person telling it. the problem got so bad that I put a pile of yard debris in a pile left to go to work and it got set on fire and my water was cut off at the road so it couldn't be put out at that point the N.C.C epa said if I didn't get it straighten out he was going to have air quality fine me \$15,000. I'm trying to find out who did it so I can take them to court for harassment, stalking , and tampering with my water.

It is believed that, in the early 1960s, slag from the Union Carbide facility located on 47th Street in Niagara Falls was used as fill on the properties prior to paving. The Union Carbide facility processed ore containing naturally-occurring high levels of uranium and thorium to extract niobium. The slag contained sufficient quantities of uranium and thorium to be classified as a licensable radioactive source material. Union Carbide subsequently obtained a license from the Atomic Energy Commission, now the Nuclear Regulatory Commission, and the State of New York; however, the slag had been used as fill throughout the Niagara Falls region prior to licensing. Based on the original survey and subsequent investigations, it is believed that the radioactive Union Carbide slag was deposited on the NFB site." The EPA began investigation in 2015 and has twice collected samples at Port Discovery Seafarms. This FOIA request is for any and all information learned, acquired and /or compiled from those expeditions. This information is necessary to make informed planting decisions. EPA-R10-2017-008274	Thomas J. Madsen	Port Discovery Seafarms	06/12/2017 01:06:00 PM	This request concerns sediment and water quality pollution in Discovery Bay on the Olympic Peninsula in the State of Washington. Background On June 5, 2017 Burt Shephard, an EPA Region 10 employee, explained to me in a telephone call that the EPA had identified a water sampling location in Discovery Bay located North of Beckett Point. Mr. Shepard described this site as being an Oyster Farm known as "Snow Creek." Mr. Shepard represented that the site is operated by the Jamestown Tribe and listed on marine charts. (I am the owner Snow Creek Shellfish LLC and do not operate a shellfish farm near Beckett Point.) EPA Region 10 provided me a document titled Discovery Bay Quality Assurance Project Plan ("Plan") dated May 2017 and prepared by the EPA Region 10. The document lists Margo Young as the Project Manager. The Plan identifies two water quality sampling locations: one at my property and one near Becket Point that is identified as both as SNOW CREEK on a map (fig.1) and as "SNOW CREEK OYSTERS" in the text of the document (paragraph 2.2.1). FOIA Request Please produce any and all public records containing information in the Plan that about the Snow Creek or Snow Creek Oyster site related to: Any and all records that describe location, ownership and operations at the site listed as "SNOW CREEK" or "SNOW CREEK OYSTERS" in the Plan. 2. EPA-HQ-2017-008639	Charles Pfister		06/20/2017 06:06:43 PM	This is a request under the Freedom of Information Act. I hereby request copies of the following records: We are requesting records regarding an EPA consent agreement and final order in 1988 with De'Longhi USA, the manufacturer of a consumer oil-filled space heater. See the attached article in the EPA Journal, Vol. 14, No. 4, May 1988, p. 36. The Agency determined that some of approximately 500,000 heaters distributed in the US by De'Longhi contained oil contaminated by PCBs. We are also attaching two newspaper articles about the situation, indicating that possibly the original discovery of PCBs was made by Environment Canada. I am specifically asking for copies of the following documents: 1) Technical documents regarding the extent and nature of the PCB contamination and any risk assessment. 2) A copy of the Consent Decree and Final Order. 3) All correspondence with De'Longhi about the matter. 4) All documents regarding the recall of the heaters in question if not included in #3. I understand that the documents are probably archived and effort will be needed to locate the documents. Note that we briefly spoke with Jenny McLeod in OLEM/ORCR, who indicated that there may be documents in more than one office, including her office. If the documents are voluminous, we might consider viewing the documents before requesting copies. Please let us know about this situation if appropriate. I do have a commercial interest in this request, as I represent a consumer who has filed a legal claim against the manufacturer of the oil filled heater due to a fatal fire, and this consumer may have been exposed to PCBs when oil leaked out of the heater. However, there is also a public interest in this request. See the Expedited Processing Request. I am willing to pay fees for this request up to \$1,000. If you estimate that the fees will exceed this limit, please inform me before processing my request. If you have any questions regarding this request please contact me.

EPA-HQ-2017-008389	Lauren Hoff-Downing	Georgia Legal Services Program	06/13/2017 08:06:15 PM	This letter serves as a formal request for information under the Freedom of Information Act, 5 U.S.C. § 552. We request the following documents pertaining to the February 8, 2017 Informal Resolution Agreement between the U.S. Environmental Protection Agency (EPA) and the Georgia Department of Agriculture (GDA), which resolved External Civil Rights Compliance Office (ECRCO) Complaint No. 02NO-16-R4: 1. GDA's final draft of its written procedures to ensure meaningful access to all of GDA's programs and activities by all persons, including access by persons with Limited-English proficiency (LEP) 2. GDA's final draft of its written procedures to ensure meaningful access to all of GDA's programs and activities by persons with disabilities 3. GDA's final draft of its grievance procedures for complaints filed under the federal non-discrimination statutes 4. Any documents or other materials concerning language access sent between the EPA and the GDA from February 8, 2017 to June 13, 2017. As these documents were drafted by a state agency, rather than a U.S. government agency, they are not exempt from disclosure under 5 U.S.C. § 552(b)(5); 5 U.S.C. § 551(1) ("agency" means each authority of the Government of the United States."). Moreover, the requested documents were not drafted to assist the EPA in its decision-making process, but instead were drafted by a state agency to fulfil its obligations with respect to an informal resolution agreement with the EPA. Because the informal resolution agreement concluded the EPA's investigation and decision-making process, and because the GDA prepared the documents to create state procedures, rather than to assist the EPA in policymaking, the requested documents are not protected by the deliberative process privilege. All documents can be provided to us electronically either on CD-Rom or by email to documents@gaftr.org.

The records file must be available during reasonable business hours. [...] The public reading area should include, wherever feasible:[...] Sign-in book." In addition, The EPA's annual financial report stated, "the building has a guard sitting in the lobby 24 hours/7 days a week and non-duty hours access to the building is restricted and monitored through a sign-in sheet." Given the preceding, the requested documents should be provided to American Bridge 21st Century without redactions and in a timely manner.</p>

During a conference call with Mr. Mike Holloway on the EPA grant we applied for, we felt it was important for us to request a copy of the comments so we can improve on our proposal for future grant applications. We made such a request and Mr. Holloway responded with the following information: "During your recent RFA grant proposal debriefing, you requested a hard copy of the full reviewers' consensus score/evaluation sheets of your University of California Berkeley grant proposal. As indicated, I've contacted the EPA Office of Grants and Debarment (OGD) to obtain clarification on the policy about giving hard copies of the reviewers' consensus scoresheets to applicants. The EPA OGD typically does not release the hard copies of the scoresheets to applicants. OGD has confirmed that the applicants would need to submit a Freedom of Information Act (FOIA) request to the EPA for the consensus evaluation scoresheets. The scoresheets will not be released without the submission of a FOIA request from the applicant." Here is the detailed grant application information. We are grateful if you could share a copy of the evaluation scoresheet on the grant we applied for. EPA-HQ-2017-007851	Michael Gerrard	Sabin Center for Climate Change Law, Columbia Law School	05/31/2017 01:05:31 PM	We are seeking any records detailing the parameters and findings of the following study, described on EPA's Superfund and Climate Change Adaptation website (https://www.epa.gov/superfund/superfund-climate-change-adaptation): "A screening analysis by EPA evaluated how the vulnerabilities may affect soil, sediment, and groundwater remedies involving technologies such as soil vapor extraction, bioremediation, permeable reactive barriers and pump-and-treat (P&T) systems, or involving strategies such as monitored natural attenuation or ex-situ containment. The analysis identified Superfund sites near or within 100-year and 500-year floodplains and Superfund sites within a 1-meter sea level rise zone. Results showed that cleanup projects involving P&T technology for groundwater remediation and on-site systems for containment source containment may be particularly vulnerable to climate change." An EPA press release dated May 17, 2017 (https://www.epa.gov/newsreleases/bill-signed-president-trump-gives-epas-wifia-program-additional-help-meet-communities) stated that 43 entities submitted letters. If the agency has compiled the entities and their projects into a list, I would like the list. If there is not a list, then I would like the letters themselves, without any attachments. The letters were to be no longer than 25 pages each. I would like to receive the information in the following format: electronic. The letters were filed electronically so digital copies will be available. As a representative of the news media I am only required to pay for the direct cost of duplication after the first 100 pages. Through this request, I am gathering information on how to finance the nation's water infrastructure. This information is being sought on behalf of Circle of Blue, a news agency, for dissemination to the general public. Please waive any applicable fees. Release of the information is in the public interest because it will contribute significantly to public understanding of government operations and activities. The public needs to know which water projects could be funded with taxpayer money. If my request is denied in whole or part, I ask that you justify all deletions by reference to specific exemptions of the act. I will also expect you to release all segregable portions of otherwise exempt material. I, of course, reserve the right to appeal your decision to withhold any information or to deny a waiver of fees. Please communicate with me by telephone or email if you have questions regarding this request. I look forward to your reply within 20 business days, as the statute requires. Thank you for your assistance.

EPA-HQ-2017-007409	Zachary Mollendor		05/17/2017 01:05:00 PM	I am requesting a full version of the Financial_Transaction (or FIN_TRA) table from the legacy CERCLIS database in an ASCII text file. The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) "was decommissioned in 2014, following the deployment of SEMS."(1) The publicly accessible data from CERCLIS are "drawn upon the final CERCLIS data set, which represents the program progress as of the end of Fiscal Year 2013."(1) A comparison between the entries of the Data Element Dictionary provided by the EPA with the aforementioned CERCLIS datasets indicates that the publicly available CERCLIS datasets are incomplete. For example, in the publicly available CERCLIS data download, the RFTT_CODE field in the FIN_TRA table includes only the following values: A, B, C, D, I, M, O. The data element dictionary provided by the EPA indicates that there are many more values than what is included in the publicly accessible version. In the requested full version of the Financial_Transaction table from the legacy CERCLIS database, I am requesting that the following fields are included with all values as defined in the data element dictionary: RFTT_CODE, SITE_ID, RAT_CODE, ACT_CODE_ID, FT_ID, FT_IFMS_FLAG, FT_DATE, FT_AMT, FT_FY, FT_BUDGET_FY, RFBS_CODE. I have attached the data element dictionary provided by the EPA as well as the publicly available version of the FIN_TRA table from the legacy CERCLIS downloaded online. EPA-HQ-2017-006779	Lisa L. Lowe		05/02/2017 04:05:27 PM	Requested: Contract between CSRA and EPA for CSRA to support the EPA's High Performance Computing (HPC) systems and Environmental Modeling and Visualization Laboratory (EMVL) projects. Justification: Transparency is one of the goals of EPA. CSRA promised to provide HPC services and EMVL support to EPA under the guidelines of this project. CSRA management bases it's rationale for employee compensation and terms of employment, including work environment, based on this contract. The contract trumps corporate policies. When explaining work requirements and compensation to the employees, the CSRA management says 'it's in the contract'. As an American citizen and as a tax payer, I deserve to know the deliverables promised, the rate schedules, and the negotiated terms of this contract. As a dedicated professional supporting the EPA through CSRA, I deserve to have access to this contract that now mysteriously dictates every aspect of my livelihood. I have requested this document from both my management and through the EPA contracts website, and neither have been forthcoming. Further clarification: \$58 million contract for CSRA to provide HPC services to EPA. Award was announced in February 2017, Transition was March 2017, and CSRA officially took over staff in April 2017.

EPA-HQ-2017-005796	Anthony Lacey	Inside EPA	04/06/2017 04:04:23 PM	I am seeking all EPA emails, memos, etc. that mention either my name (Anthony Lacey) or the FOIA request EPA-HQ-2017-002051, which seeks any agency documents from one month of the presidential transition. EPA has still not granted the FOIA despite granting expedited processing, and the latest March 31 deadline has lapsed. I want to know what communications have been made about this FOIA so I can see for myself what is behind the delays, so I therefore seek under FOIA any records that mention my name either in full or part, or mention the FOIA request by number or other reference, starting on Dec. 14, 2016, and continuing through to the date of this FOIA request, April 6, 2017.

				I am seeking all EPA staff comments on the following legislation introduced in the 115th Congress: S.767 Clean Air, Healthy Kids Act H.R.1747 Brownfields Authorization Increase Act H.R.1716 to prohibit hiring freeze at EPA H.R.1674 Long Island Sound Restoration and Stewardship Act H.R.1673 Water Affordability, Transparency, Equity and Reliability Act H.R.1670 Infrastructure 2.0 Act H.R.1653 Drinking Water Affordability Act H.R.1647 Water Infrastructure Trust Fund Act S.692 Water Infrastructure Flexibility Act S.675 Long Island Sound Restoration and Stewardship Act S.J.Res.38 CRA disapproval resolution on Utah SIPs H.J.Res.87 CRA disapproval resolution on Utah SIPs H.R.1431 EPA Science Advisory Board Reform Act H.R.1430 HONEST Act H.R.1315 RFS Reform Act H.R.1314 RFS Elimination Act S.519 A bill to amend SDWA S.J.Res.28 CRA disapproval resolution on risk management program H.R.1261 Federal Regulatory Certainty for Water Act H.Res.152 Sense of House on WOTUS rule H.R.861 A bill to terminate EPA S.J.Res.21 CRA disapproval resolution on CSAPR update H.J.Res.59 CRA disapproval resolution on risk management program S.263 Ozone Standards Implementation Act H.R.694 Stop EPA Overregulation of Rural Americans Act H.R.637 Stop EPA Overreach Act H.J.Res.22 CRA disapproval resolution of oil and gas emissions standards I am seeking all possible correspondence -- internal EPA letters and emails between EPA staff that discuss the bills, as well as communications with outside entities such as Congress discussing the bills. These records are not protected by the deliberative exemption in FOIA because they do NOT affect EPA rulemaking in any way shape or form. They are simply the opinions of EPA staff on legislation that Congress is developing, nothing more. If you withhold any documents you must provide a list of the withheld documents and a document-specific reason for each withholding beyond simply citing a FOIA provision. Thank you in advance.

If possible, I would prefer to receive the largest number of records or documents in electronic form. Please describe the deleted material in detail and specify the reasons for believing that the alleged statutory justification applies in this instance. Do contact me by telephone or e-mail if you have any questions regarding this request or recommendations on how to streamline or revise it. If my request is denied in whole or in part, please specify which exemption(s) is (are) claimed for each passage or whole document denied. In addition, please give the number of pages in each document and the total number of pages pertaining to this request and the dates of the documents withheld. EPA-HQ-2017-005033	Kevin Bogardus	E&E News	03/17/2017 01:03:00 PM	I request all communications records sent to and/or from David Schnare -- including emails sent to and/or from his EPA email account, schnare.david@epa.gov, and from any other non-official email accounts associated with Schnare that were used for official purposes as well as text messages sent to and/or from Schnare -- during the time period of Nov. 9, 2016 to March 17, 2017. I request copies of all of Schnare's communications records because after his March 15, 2017 resignation from EPA, he alleged that he left the agency because of EPA officials' "misuse of federal funds, failure to honor oaths of office, and a lack of loyalty to the President [Trump]" (please see "Questions trail agency critic's exit," Kevin Bogardus, Greenwire, March 16, 2017 http://www.eenews.net/stories/1060051580). Consequently, there is an overwhelming public interest that all of Schnare's communications records are disclosed, considering that those records may shed more light on Schnare's allegations against other EPA officials. Please consider any emails, letters, memorandums, text messages, voice and video recordings as well as other documented forms of communication sent to and/or from Schnare as responsive records to my request. Please consider Personally Identifiable Information as not responsive to my request.

				Pursuant to the federal Freedom of Information Act, 5 USC-552, as a representative of the news media I am requesting access to the documents, sent via hard copy or email, described below: Correspondence between Environmental Protection Agency (EPA) Administrator Scott Pruitt and Representative Markwayne Mullin sent between & including the dates of February 17, 2017 and March 13, 2017. Correspondence between EPA Administrator Pruitt and Senator James Inhofe sent between & including the dates of 2-17-2017 and 3-13-2017. Correspondence between EPA Administrator Pruitt and Justin Savage or any other attorneys at Hogan Lovells US LLP (located at 555 Thirteenth Street, NW, Washington, DC 20004) sent between & including the dates of 2-17-2017 and 3-13-2017. Correspondence between EPA Administrator Pruitt and the RMP Coalition, consisting of the American Chemistry Council, The American Forest & Paper Association, the American Petrochemical & Fuels Manufacturers, the American Petroleum Institute, the Chamber of Commerce of the United States of America, the National Association of Manufacturers, and the Utility Air Regulatory Group – and/or between EPA Administrator Pruitt and any of these individual organizations – sent between & including the dates of 2-17-2017 and 3-13-2017. — These documents are of public interest as they will contribute to public understanding of the decision to reopen a previously concluded EPA rule-making process, thus delaying the effective date of a public safety regulation designed to prevent catastrophic industrial accidents and to protect communities and emergency first responders. The rule applies to approximately 12,500 facilities in the U.S. that, according to the EPA, have had on average one serious safety "incident" every other day for the past 10 years. Understanding the decision to delay implementing this safety, measure previously approved by the EPA is a matter of urgent public interest.

EPA-HQ-2017-004807	Joseph R. Byrd		03/10/2017 08:03:14 PM	Almost a year ago, a report assessing the cancer risk of the active ingredient, glyphosate, in Monsanto's Roundup herbicide appeared on EPA's website. EPA quickly retracted the report, only to post it again a few months later. Not long after, EPA's retraction of the report, the chair of the committee that authored the report left EPA. This FOIA request seeks records related to that cancer risk assessment report, including any and all communications between EPA and Monsanto and any internal EPA communications concerning the chemical glyphosate. When a pesticide is proposed for registration or re-registration, EPA's Office of Pesticide Programs reviews studies to evaluate the pesticide's potential for causing cancer. The Cancer Assessment Review Committee (CARC) then reviews these results and recommends a cancer classification. This FOIA request includes all documents and communication regarding the CARC of glyphosate. In September 2016, EPA posted the 2015 CARC Final Report to its Glyphosate Registration Review Docket. This FOIA request includes all documents and communication regarding the 2015 CARC Final Report of glyphosate. This FOIA request further includes any and all communication, information, and documentation concerning glyphosate including, but not limited to records referring or relating to the CARC report on glyphosate, records from January 1, 2015, through the date of the request between Monsanto officials and EPA that discuss or relate to glyphosate. I request this information to be assimilated and distributed electronically via electronic mail in order to limit cost and stimulate efficiency.

EPA-HQ-2017-004658	Mindy Poldberg		03/07/2017 09:03:32 PM	To Whom it May Concern: I would like to request any and all documents that were sent from the White House to the EPA regarding a change to the Renewable Fuel Standard Point of Obligation. As the media has widely reported, discussions between Carl Icahn and outside private parties in the oil and renewable fuels industry occurred in late Feb/early March regarding the White House's consideration of moving the Point of Obligation from refiners/importers to some point further down the fuel distribution chain. In addition to any point of obligation package or memo, I would also request any other documents that were sent that pertained to other changes that might be considered as part of a package to move point of obligation: this list may include things like the E15 Reid Vapor Pressure waiver, or review of MOVES and other models, but my request list is not limited to these. I believe this package was likely sent from the White House to the EPA the week of Feb 27-March 5, but those dates are not exact. This package may include documents from other White House officials to Administrator Pruitt including Gary Cohn. Thank you.

EPA-HQ-2017-004400	Renaud Coulomb	University of Melbourne	03/01/2017 02:03:00 PM	To whom it may concern, I am a Lecturer at the University of Melbourne. For an academic project, I would like to access the HRS documentation for each hazardous waste site that has received an HRS score within the Superfund program. I have verified that these reports are not available online (EPA website or regulation.gov website). The Federal Register table of the CERCLIS database contains HRS scores only for sites that are/were on the NPL list (mostly sites with an HRS score larger than 28.5). I thus need HRS scores (overall scores and by pathways) for sites that have not been included in the NPL list. Period: 1982 to 2016; EPA regions: All 10 regions; Format: pdf file per site ; if a database (excel format) already exists that includes HRS scores for all sites that have received an HRS score (and not only the NPL subsample), such database would be preferable. This request cancels requests made by my research assistant, Sylvia Griselda, few days ago. Best regards, Dr. Renaud Coulomb Contacts: renaud.coulomb@unimelb.edu.au +61402910189.

EPA-HQ-2017-003625	Abrahm Lustgarten	ProPublica	02/06/2017 07:02:03 PM	The following is a re-filing of a FOIA request previously submitted to EPA Region 4, but which seems to be more appropriately handled by EPA HQ: The original FOIA # is EPA-R5-2017-003467 I am requesting copies of all releasable files relating to the permitting of, conduct of, or investigations into, the company U.S. Technology, based in Canton OH, and its handling of hazardous materials, between the years 2000 and 2017. It is my understanding that U.S. Technology is the subject of investigations or enforcement actions in both EPA Region 4, and in EPA Region 6, and perhaps elsewhere. It is information regarding the company's conduct and operations in these specific regions which I am requesting information about. In addition I request copies of all correspondence, including emails and letters received from or addressed to parties outside of the U.S. EPA concerning U.S. Technology, as well as any releasable intra-agency correspondence. I understand that my original request was forwarded to EPA Region 5 because the company in question is based there, But to reiterate, this request specifically concerns actions in R4 and R6. Also, I was advised previously that Region staff did not know or have enough information to know where to begin their search. To clarify my request, because this concerns a hazardous waste handling issue and an enforcement issue, I would suggest beginning with the RCRA enforcement offices and the criminal investigations divisions of these regional offices. However I do not know that responsive records would be limited to those offices, and therefore would like the request considered more broadly.

EPA-HQ-2017-003151	Jason Paladino	Investigative Reporting Program, UC Berkeley Journalism	01/25/2017 02:01:00 PM	Pursuant to the federal Freedom of Information Act, 5 U.S.C. 552, I request access to and copies of the communications from the Trump administration to EPA regarding a media blackout. Please make email communications, memos, messages, or other forms of communication available. Background: https://www.washingtonpost.com/news/energy-environment/wp/2017/01/23/trump-administration-tells-epa-to-freeze-all-grants-contracts/?utm_term=.506443b4d67d As a journalist acting in the public interest I would request a fee waiver. Further, in the interests of saving taxpayer funds, I would request that all data and documents be communicated electronically. If specific portions of any documents are exempt from disclosure, please provide the non-exempt portions and please provide a statutory reason as to why those records are exempt. The disclosure of the requested records will significantly contribute to expanded public understanding of government operations. I have the intent and ability to disseminate this significant expansion of public understanding of government operations. The public interest in this significant expansion of public understanding of government operations far outweighs any commercial interest of my own in the requested release. This request is made under the state's public records law, which was inspired by and created as a result of the federal Freedom of Information Act (FOIA). I call your attention to President Obama's 21 January 2009 Memorandum concerning the Freedom of Information Act, in which he states: "All agencies should adopt a presumption in favor of disclosure, in order to renew their commitment to the principles embodied in FOIA [...] The presumption of disclosure should be applied to all decisions involving FOIA." In the same Memorandum, President Obama added that government information should not be kept confidential "merely because public officials might be embarrassed by disclosure"

EPA-HQ-2017-003120	Alex Porges	Landis International	01/24/2017 07:01:02 PM	<p>The Pyrethroid Working Group (PWG) is an industry-based group that works together on regulatory issues associated with uses of Pyrethroids as pest-control agents used in crop protection, residential settings and public health. The group comprises six companies who are basic manufacturers and primary registrants of a number of Pyrethroid insecticides. Since the PWG was assembled, over 200 study data reports have been submitted to the EPA in order to satisfy Agency requirements. However, it has become apparent that while these data have been provided to the EPA, EFED has not responded similarly with transmitting data evaluation records (DERs) back to the PWG. Currently the Pyrethroid active ingredients are undergoing Registration Review and the EPA preliminary risk assessment (PRA) has been posted for public comment. While the number of data submissions for which the PWG does not have DERs is extensive, there is a priority list which is important to positioning the PWG's Pyrethroid PRA response correctly. The PWG is hereby requesting that these priority DERs be sent to the task force in an accelerated timeframe so that they are able to draft a response appropriately. The list also includes a number of Open Literature Review Summaries (OLRSs) which are critical for the PWG to draft their PRA response. The provided spreadsheet lists the 106 DERs that the PWG is requesting with the top 52 (i.e. rows 2 – 53) considered top priority. The provided Word document lists the OLRs that the PWG is requesting with the top 18 considered top priority (highlighted in blue). If you have any questions or comments about the FOIA request, please contact Dick Collier or myself at the following phone numbers or email addresses: (229) 251-2818 & (229) 548-2802 or dcollier@landisintl.com & aporges@landisintl.com, respectively. Criswell		01/24/2017 07:01:26 PM	<p>President Trump has just issued a media blackout on the EPA, not allowing the agency to update the public on any agency news until his administration sees fit. I am requesting any and all communication between the Trump administration and the EPA during the media blackout. During this time of a new administration, especially since President Trump wants to change the focus of the EPA, it is essential the American people have transparent access to any and all communications regarding the agency in the new administration. The EPA serves at the pleasure of the President; he has a right to order a media blackout, however, since the President serves as the pleasure of the citizens of the United States of America, we have a right to know any communications between the Administration and the EPA during this time. Unless this information is paramount to national security, I am requesting its immediate release.</p>

EPA-HQ-2017-001866	Paul M. Whatling	FMC Corporation	12/07/2016 06:12:22 PM	This is a request or files cited by EPA in its draft human health risk assessment for malathion, or for study data evaluation records that have we have submitted to EPA in support of the registration of malathion in the United States. The first attached file requests the Agency's data evaluation records for studies submitted to support the registration of malathion. The second attached file requests copies of documents that EPA has cited in its draft human health risk assessment, which has a comment period that ends on December 21, 2016. These documents are needed in order for the registrant and the public to fully understand the ecological, endangered species and human health risk assessments that the agency has posted for public comment. Since the Agency has established regulatory deadlines for commenting on these risk assessments, time is of the essence for the EPA to comply with our request to provide the requested documents. Based on this, we request a fee waiver. And, we request expedited processing because of the urgency to inform stakeholders and the public about the reasons for the conclusions of the EPA's draft human health risk assessment. This is especially important given that malathion is an important tool used to control mosquitoes that spread diseases like the zika virus.

EPA-HQ-2017-001307	Gregory Alcorn		11/16/2016 02:11:00 PM	Pursuant to the Freedom of Information Act, I am requesting access to historical pesticide registration information currently maintained by the U.S. Environmental Protection Agency (EPA). As means of background, the Federal Insecticide, Fungicide, and Rodenticide Act of 1947 (FIFRA) required companies to register pesticides with the U.S. Department of Agriculture (USDA). In 1972, the Federal Environmental Pesticide Control Act (FEPCA) transferred pesticide registration responsibilities from USDA to EPA. It is my understanding that copies of the historical pesticide registration records maintained by USDA were also transferred to EPA in 1972. I am specifically requesting information on where historical pesticide registration records are currently located, as well as access to these records. I am a private researcher, not connected to a government agency. As such, I understand that EPA may charge reasonable research fees associated with this request. I authorize up to \$500 in such fees; if the fees will exceed this amount, please contact me for additional authorization.

Other senior administration officials, such as former Secretary of State Hillary Clinton and Defense Secretary Ash Carter, have been found to have used a personal email account for government business. Both of those instances not only ran counter to their departments' policies but could have led to the potential exposure of classified information. In response to worries over their use of personal email for government business & not;-- and also litigation in former Secretary Clinton's case & not;-- both former Secretary Clinton and Secretary Carter released thousands of pages of their personal emails that were used for government business. Further, a recent court ruling found that agency officials should expect that work-related emails in their personal email accounts are subject to the Freedom of Information Act. In Competitive Enterprise Institute vs. Office of Science and Technology Policy, D.C. Circuit Senior Judge David Sentelle wrote in the U.S. Court of Appeals for the District of Columbia Circuit's opinion that "an agency cannot shield its records from search or disclosure under FOIA by the expedient of storing them in a private email account controlled by the agency head." Administrator McCarthy should follow the example of other administration officials as well as court precedent and release all of her personal emails that were used for EPA business.

Although the two groups and OMB sent the letters to Inhofe, it is my understanding that EPA received courtesy copies of the responses filed by the two groups and OMB. EPA's press office has refused for weeks to answer questions about those letters, leaving as my only option a FOIA request to obtain those courtesy copies sent to EPA. EPA-HQ-2016-002780	Sebastian Blanco	AutoblogGreen	01/14/2016 05:01:14 PM	I previously requested communication documents between the EPA and VW from August and September 2015, as that was when I thought the EPA became aware of VW's "defeat device." I would still like those documents, but the lawsuit filed by the DOJ this month show that the EPA was first aware of questions about VW's diesel emissions in late 2014. Therefore, I would also like to request any communications between the EPA and VW that took place in May and June 2014 regarding questions about the automaker's diesel emissions. It appears from the lawsuit that the vehicles that initially caused questions to be raised were a 2012 Jetta and a 2013 Passat that were being tested by the Center for Alternative Fuels, Engines & Emissions at West Virginia University and the California Air Resources Board. These two organizations came to the EPA with their findings and the EPA went to VW. Therefore, I am also requesting the initial communications from WVA and CARB to the EPA regarding questions about VW's diesel emissions. These should also have taken place in May 2014. This request is being made pursuant to the Freedom of Information Act (5 U.S.C.§ 552) for articles that will be made available to the public via my website AutoblogGreen as well as potentially other means. Both physical and digital copies of the requested files will be accepted.

All communications from January 2010 to the present between EPA and TVA relating to the Peninsula Landfill and/or any specific cell or phase of the Peninsula Landfill, including Phase 1A, Phase 1B or Phase 2. 3. All documents discussing the meaning or interpretation of the following terms used in EPA's rule governing the Disposal of Coal Combustion Residuals from Electric Utilities ("CCR Rule"): new landfill, existing landfill, and lateral expansion. 4. All documents discussing whether the Peninsula Landfill and/or any specific cell or phase of the Peninsula Landfill, including Phase 1A, Phase 1B or Phase 2 is understood by EPA, TDEC and/or TVA to be a "new" or "existing" landfill under the CCR Rule and/or whether any phase of the Kingston Landfill is understood to be a lateral expansion of an existing landfill. Due to the massive coal ash spill at the Tennessee Valley Authority - Kingston Fossil Plant ("Kingston Plant") on December 22, 2008, we recognize that EPA likely possesses a substantial number of records generally relating to the Kingston Plant and coal ash. To be clear, we are not seeking records related to that spill and its subsequent clean-up. Rather, we are only requesting records related to the Peninsula Landfill and any specific cell or phase of the Peninsula Landfill, including Phase 1A, Phase 1B or Phase 2, which obtained a state solid waste permit in 2007 and a major modification in 2015.

All records produced or collected by EPA at the September 3, 2015 meeting or conference call between representatives of EPA and VW. I request that you produce the requested records on a rolling basis as they are located, instead of a single release. Further, this request is segregable, and your agency may not withhold entire records because of one section that you believe is exempt from disclosure. If you withhold any part of the requested records from disclosure, you must specify in a written response the factual and legal basis for the withholding. Additionally, I request you provide the records on computer files in the same format as they are currently maintained at EPA. I agree to pay reasonable fees for the records, including actual costs up to \$1000. If you estimate that actual costs will exceed this amount, please contact me so that I may make appropriate arrangements for payment. Thank you for your assistance, and please contact me with any questions or further information.

EPA-HQ-2016-000485	Robert K. Wright	Financial Times	10/16/2015 08:10:18 PM	I wish to see the correspondence between the EPA and Volkswagen surrounding the EPA's decision - delivered on around July 20 2015 - to refuse certification for VW's 2016 model year diesels. I understand that the correspondence continued in various forms until September 3, 2015, when VW admitted its misconduct over emissions controls.
EPA-HQ-2016-000484	Robert K. Wright	Financial Times	10/16/2015 08:10:16 PM	I wish to see the correspondence between the EPA and Volkswagen around spring 2014 where the EPA first informed Volkswagen about its concerns about emissions from its diesel-powered, four-cylinder engines and VW's reply to those concerns.
EPA-HQ-2016-000482	Robert K. Wright	Financial Times	10/16/2015 08:10:13 PM	I wish to see any correspondence between the agency and Volkswagen over its plans to introduce to the US market for the first time for the 2009 model year diesel-engine vehicles with Lean NOx Trap (LNT) emissions-control technology. The technology was first introduced on the Jetta in 2008. I am particularly interested in any explanations EPA sought from Volkswagen over how this unique technology would work and any explanations that Volkswagen provided. VW is the only carmaker to have offered emissions control via a Lean NOx Trap on the US market. All other vehicles on the market use some form of the chemical urea to break down the emissions, in a system sometimes known as Selective Catalytic Reduction.

It is my understanding the letters were sent this past summer. The letters would have most likely been signed by Richard Gebken or Linda Deluise in the Office of Pesticide Programs' Registration Division, and the purpose of the letter was to notify the registrant that their products' ingredient statements needed to be amended regarding the ingredient statement. If all of the letters were identical, only one copy of the letter would be necessary, with a list of all the registrants/dates sent. Thank you

				Freedom of Information Act Request Pursuant to the Freedom of Information Act, 5 U.S.C. § 552, and relevant U.S. Environmental Protection Agency ("EPA") regulations set forth in 40 C.F.R. Part 2, subpart A, I am writing on behalf of my client, Christina D. Storz, to request all correspondence, data and documents related to EPA's September 18, 2015 Clean Air Act Notice of Violation ("2015 NOV") issued to Volkswagen AG, Audi AG, and Volkswagen Group of America (collectively referred to herein as "VW") alleging violations of the Clean Air Act ("CAA"), 42 U.S.C. §§ 7401-7671q (and related implementing regulations) and § 7522(a)(I) stemming from the alleged installation of "defeat devices" in VW automobiles. Because the specified categories of requested documents is extensive, the entire FOIA request is included in the attached document. The scope of this FOIA request is broad and should be interpreted to cover all of EPA offices nationally, including, without limitation, EPA Headquarters, EPA's Office of Transportation and Air Quality ("EOTAQ"), any EPA Regional office, and EPA's National Vehicle and Fuel Emissions Laboratory ("NVFEL"). It also is intended to request any responsive documents that are otherwise in the possession or control of any EPA officials, employees, consultants, or agents. This request is time sensitive. For that reason, please produce responsive, non-privileged documents as soon as they are available rather than waiting until all the responsive documents have been collected. I have included a copying charge limit of \$3,000 but that is not a firm cap. I would request, however, that EPA contact me if copying charges are expected to exceed that amount before those charges are incurred. And if you have any questions or wish to discuss narrowing this request in some manner, please feel free to give me a call. William J. Moore, III (904) 685-2172

("FOIA"), I request access to and copies of communications or other documents sent between the Environmental Protection Agency (EPA) and Eastern Research Group that refer to Volkswagen from January 1, 2014 to the present ("the Records"). This request is ongoing, seeking copies of (or access to) all Records as they are filed with the EPA. I am further requesting that the Records be provided to me on computer files or, if not maintained on computer files, in the same format as they are currently maintained at the EPA. I am a reporter for Bloomberg News, an accredited and recognized news-gathering organization. I request the Records to inform the public about matters of public concern. As a representative of the news media, I am only required to pay for the direct cost of duplication after the first 100 pages. Please waive all applicable fees. In the event a fee waiver is not granted, I agree to pay reasonable fees for the Records, including actual costs up to \$250. If you estimate that actual costs will exceed this amount, please contact me so that I may make the appropriate arrangements for payment. FOIA requires that your agency respond to the this request for information within 20 business days of receipt of this letter. This request is segregable, and your agency may not withhold entire records because of one section that you believe is exempt from disclosure. Under federal law, if you choose to withhold any such parts of the records from disclosure, you must specify in a written response the factual and legal basis for withholding any part of the Records. Please contact me if I may assist in your office's response to this request. As I am making this request as a journalist and this information is of timely value, I would appreciate your communicating with me by telephone or email, rather than by mail, if you have questions regarding this request.

EPA-HQ-2015-007071	Richard J. Lazarus	Harvard Law School	05/13/2015 07:05:46 PM	<p>A copy of this description is also included in an attached formal letter:</p> <p>The purpose of this letter is to make a formal request pursuant to the federal Freedom of Information Act for documents, both hard copies and electronic in form (including emails) pertaining to the decision of the U.S. Environmental Protection Agency in 2003 that greenhouse gases were not pollutants within the meaning of the federal Clean Air Act. More specifically, I am interested in documents relevant to the Agency's decision making between January 1, 2001, and August 28, 2003, when EPA formally denied a petition seeking regulation of greenhouse gas emissions from new motor vehicles under the Clean Air Act, extending to the Agency's defense of that decision before the U.S. Court of Appeals for the D.C. Circuit and the U.S. Supreme Court.</p> <p>I am seeking access to these documents in support of my research on the history of a Supreme Court case, Massachusetts v. EPA, decided by the Court in April 2007. For this same reason, I would like to request a fee waiver for the associated costs. The exclusive purpose of my research is in support of an academic publication, most likely a book for a general audience, that I believe will be of significant interest and value to the public. The Massachusetts case is one of the most significant environmental law decisions handed down by the U.S. Supreme Court. And my aim is to tell the story of that case in a manner that highlights for the public the challenges of both environmental lawmaking and Supreme Court advocacy. I have published significant scholarship on similar topics. See http://www.law.harvard.edu/faculty/rlazarus/index.html,</p> <p>Please also know that I would be pleased to speak with anyone in your office or any relevant office at EPA about possible ways to make the processing of my request easier and more convenient for those involved. I can certainly travel to DC to review documents in person if that would be helpful and expedite matters.</p>

EPA-HQ-2015-000312	Robert Wampler	The National Security Archive	10/08/2014 01:10:00 PM	<p>Documents relating to preparations for or participation in the Bonn Climate Change Conference, which took place from June 3-14, 2013. The Bonn conference comprised the 38th sessions of the Subsidiary Body for Implementation (SBI) and Subsidiary Body for Scientific and Technological Advice (SBSTA), as well as the resumed second session of the Ad Hoc Working Group on the Durban Platform for Enhanced Action (ADP 2). SBI 38 was marked by disagreement over a proposal by the Russian Federation, Belarus and Ukraine to introduce a new item on legal and procedural issues related to decision-making under the Conference of the Parties (COP) and Conference of the Parties serving as the meeting of the Parties to the Kyoto Protocol (CMP). This proposal was motivated by dissatisfaction with the decision-making process at the UN Climate Change Conference in Doha in 2012. Other parties</p> <p>opposed considering it as a new SBI agenda item, and instead proposed placing the issue on the SBI agenda item regarding arrangements for intergovernmental meetings. No resolution of the issue was made at this meeting. SBSTA 38 made progress on reducing emissions from deforestation and forest degradation in developing countries and the role of conservation and enhancement of forest carbon stocks (REDD+). The resumed ADP 2 was structured around workshops and roundtables on Workstream 1 (2015 agreement) and Workstream 2 (pre-2020</p> <p>ambition). The scope of the search for relevant documents would include, but not be limited to, documents</p> <p>prepared for the EPA Administrator Lisa P. Jackson and/or any other EPA officials who were either involved in preparations for the meeting or were part of the U.S. delegation to the meeting.</p>

				<p>Documents relating to the United Nations Climate Change Conference in Doha, Qatar, which took place from 26 November to 8 December 2012. It included the eighteenth session of the Conference of the Parties (COP 18) to the United Nations Framework Convention on Climate Change (UNFCCC) and the eighth session of the Conference of the Parties serving as the Meeting of the Parties to the Kyoto Protocol (CMP 8). The conference also included meetings by five subsidiary bodies: the thirtyseventh sessions of the Subsidiary Body for Scientific and Technological Advice</p> <p>(SBSTA 37) and the Subsidiary Body for Implementation (SBI 37), the second part of the seventeenth session of the Ad hoc Working Group on Further Commitments for Annex I Parties under the Kyoto Protocol (AWG-KP 1 7), the second part of the fifteenth session of the Ad hoc Working Group on Longterm Cooperative Action under</p> <p>the UNFCCC (AWG-LCA 15) and the second part of the Ad hoc Working Group on the Durban Platform for Enhanced Action (ADP 1). Negotiations in Doha focused on ensuring the implementation of agreements reached at previous conferences. The package of "Doha Climate Gateway" decisions adopted on the evening of Saturday, 8 December, included amendments to the Kyoto Protocol to establish its second commitment period. Having been launched at CMP 1 in 2005, the AWG-KP terminated its work in Doha. The parties also agreed to terminate the AWGLCA and</p> <p>negotiations under the Bali Action Plan. Key elements of the outcome also included an agreement to consider institutional mechanisms to address loss and damage in developing countries that are particularly vulnerable to the adverse effects of climate change. The scope of the search for relevant documents would include, but not be limited to, documents prepared for the EPA Administrator Lisa P. Jackson and/or any other EPA officials who were either</p>

"EPA is aware that some manufacturers and suppliers may be selling after-market motorcycle parts that could increase air pollution," the agency said in a written statement. 				<p>In most cases buildings of less than 5,000 sf in size are not eligible to receive the EPA's ENERGY STAR building score.
