

Chapter 129 -- Standards for Sources

SOURCES OF VOCs

§ 129.66. Compliance schedules and final compliance dates.

The owner or operator of a source newly subject to the requirements of §§129.52, 129.52b, 129.52c, §§129.59-129.61 or §§129.67-129.69 as a result of revised applicability requirements of this title relating to the control of VOC shall achieve compliance with the applicable emission limitations within 1 year of the date of publication of the notice of final adoption of this requirement in the *Pennsylvania Bulletin*. Newly subject sources or facilities are those which were not subject to the emission limitations because they emitted less than the cutoff levels or operated at de minimis production levels prior to the date of publication of the limitation in the *Pennsylvania Bulletin* but are now subject to the standard because they meet or exceed the cutoff levels contained in §129.52(a), §129.52b(a), §129.52c(a) or §129.69 (relating to the manufacture of pneumatic rubber tires). The date of adoption of the applicable emission standard for these previously unregulated sources will be determined to be the date that the applicable cutoff levels contained in §129.52(a), §129.52b(a), §129.52c(a) or §129.69 (relating to surface coating processes; and manufacture of pneumatic rubber tires) are published in the *Pennsylvania Bulletin*.
