

## Chapter 129 -- Standards for Sources

### SOURCES OF VOCs

#### § 129.72. Manufacture of surface active agents.

(a) This section applies to a facility which has surface active agent manufacturing sources with a potential to emit greater than 100 tons -- 90,000 kg -- of volatile organic compounds per year.

(b) No person may cause, suffer or permit the emission into the outdoor atmosphere of volatile organic compounds from solvent wash tanks, reaction vessels, separators, distillation processes, solvent strippers and solvent storage tanks unless the emissions are exhausted through an emission reduction system which is designed and operated to recover or destroy at least 90% by weight of the volatile organic compound emissions.
