EPA-HQ-2017-003120	Alex Porges	Landis International	1/24/2017 19:01	The Pyrethroid Working Group (PWG) is an industry-based group that works together on regulatory issues associated with uses of Pyrethroids as pest-control agents used in crop protection, residential settings and public health. The group comprises six companies who are basic manufacturers and primary registrants of a number of Pyrethroid insecticides. Since the PWG was assembled, over 200 study data reports have been submitted to the EPA in order to satisfy Agency requirements. However, it has become apparent that while these data have been provided to the EPA, EFED has not responded similarly with transmitting data evaluation records (DERs) back to the PWG. Currently the Pyrethroid active ingredients are undergoing Registration Review and the EPA preliminary risk assessment (PRA) has been posted for public comment. While the number of data submissions for which the PWG does not have DERs's is extensive, there is a priority list which is important to positioning the PWG's Pyrethroid PRA response correctly. The PWG is hereby requesting that these priority DERs be sent to the task force in an accelerated timeframe so that they are able to draft a response appropriately. The list also includes a number of Open Literature Review Summaries (OLRSs) which are critical for the PWG to draft their PRA response. The provided spreadsheet lists the 106 DERs that the PWG is requesting with the top 52 (i.e. rows 2 – 53) considered top priority. The provided Word document lists the OLRs's that the PWG is requesting with the top 18 considered top priority (highlighted in blue). EPA-HQ-2017-003625	Abrahm Lustgarten	ProPublica	2/6/2017 19:02	The following is a re-filing of a FOIA request previously submitted to EPA Region 4, but which seems to be more appropriately handled by EPA HQ: The original FOIA # is EPA-R5-2017-003467 I am requesting copies of all releasable files relating to the permitting of, conduct of, or investigations into, the company U.S. Technology, based in Canton OH, and its handling of hazardous materials, between the years 2000 and 2017. It is my understanding that U.S. Technology is the subject of investigations or enforcement actions in both EPA Region 4, and in EPA Region 6, and perhaps elsewhere. It is information regarding the company's conduct and operations in these specific regions which I am requesting information about. In addition I request copies of all correspondence, including emails and letters received from or addressed to parties outside of the U.S. EPA concerning U.S. Technology, as well as any releasable intra-agency correspondence. I understand that my original request was forwarded to EPA Region 5 because the company in question is based there, But to reiterate, this request specifically concerns actions in R4 and R6. Also, I was advised previously that Region staff did not know or have enough information to know where to begin their search. To clarify my request, because this concerns a hazardous waste handling issue and an enforcement issue, I would suggest beginning with the RCRA enforcement offices and the criminal investigations divisions of these regional offices. However I do not know that responsive records would be limited to those offices, and therefore would like the request considered more broadly.

EPA-HQ-2017-004400	Renaud Coulomb	University of Melbourne	3/1/2017 14:03	To whom it may concern, I am a Lecturer at the University of Melbourne. For an academic project, I would like to access the HRS documentation for each hazardous waste site that has received an HRS score within the Superfund program. I have verified that these reports are not available online (EPA website or regulation.gov website). The Federal Register table of the CERCLIS database contains HRS scores only for sites that are/were on the NPL list (mostly sites with an HRS score larger than 28.5). I thus need HRS scores (overall scores and by pathways) for sites that have not been included in the NPL list. Period: 1982 to 2016; EPA regions: All 10 regions; Format: pdf file per site ; if a database (excel format) already exists that includes HRS scores for all sites that have received an HRS score (and not only the NPL subsample), such database would be preferable. This request cancels requests made by my research assistant, Sylvia Griselda, few days ago. Best regards, Dr. Renaud Coulomb Contacts: renaud.coulomb@unimelb.edu.au +61402910189.

EPA-HQ-2017-004822	anthony grasso		3/13/2017 18:03	In a recent interview, Scott Pruitt, Administrator of the EPA, said the following, "I think that measuring with precision human activity on the climate is something very challenging to do, and there's tremendous disagreement about the degree of impact, so no, I would not agree that it's a primary contributor to the global warming that we see." I would like to know the names of each and every study, scientist or source that Mr. Pruitt is referencing when he said, acting as the head of the EPA, that there is disagreement in the scientific community. Please provide the names of studies, scientists, or reports that contradict the finding that human activity is a primary contributor to global warming. My sincere thanks as a citizen.

EPA-HQ-2017-004807	Joseph R. Byrd		3/10/2017 20:03	Almost a year ago, a report assessing the cancer risk of the active ingredient, glyphosate, in Monsanto's Roundup herbicide appeared on EPA's website. EPA quickly retracted the report, only to post it again a few months later. Not long after, EPA's retraction of the report, the chair of the committee that authored the report left EPA. This FOIA request seeks records related to that cancer risk assessment report, including any and all communications between EPA and Monsanto and any internal EPA communications concerning the chemical glyphosate. When a pesticide is proposed for registration or re-registration, EPA's Office of Pesticide Programs reviews studies to evaluate the pesticide's potential for causing cancer. The Cancer Assessment Review Committee (CARC) then reviews these results and recommends a cancer classification. This FOIA request includes all documents and communication regarding the CARC of glyphosate. In September 2016, EPA posted the 2015 CARC Final Report to its Glyphosate Registration Review Docket. This FOIA request includes all documents and communication regarding the 2015 CARC Final Report of glyphosate. This FOIA request further includes any and all communication, information, and documentation concerning glyphosate including, but not limited to records referring or relating to the CARC report on glyphosate, records from January 1, 2015, through the date of the request between Monsanto officials and EPA that discuss or relate to glyphosate. I request this information to be assimilated and distributed electronically via electronic mail in order to limit cost and stimulate efficiency.

EPA-HQ-2017-004977	Elizabeth Grossman		3/16/2017 13:03	Pursuant to the federal Freedom of Information Act, 5 USC-552, as a representative of the news media I am requesting access to the documents, sent via hard copy or email, described below: Correspondence between Environmental Protection Agency (EPA) Administrator Scott Pruitt and Representative Markwayne Mullin sent between & including the dates of February 17, 2017 and March 13, 2017. Correspondence between EPA Administrator Pruitt and Senator James Inhofe sent between & including the dates of 2-17-2017 and 3-13-2017. Correspondence between EPA Administrator Pruitt and Justin Savage or any other attorneys at Hogan Lovells US LLP (located at 555 Thirteenth Street, NW, Washington, DC 20004) sent between & including the dates of 2-17-2017 and 3-13-2017. Correspondence between EPA Administrator Pruitt and the RMP Coalition, consisting of the American Chemistry Council, The American Forest & Paper Association, the American Petrochemical & Fuels Manufacturers, the American Petroleum Institute, the Chamber of Commerce of the United States of America, the National Association of Manufacturers, and the Utility Air Regulatory Group – and/or between EPA Administrator Pruitt and any of these individual organizations – sent between & including the dates of 2-17-2017 and 3-13-2017. — These documents are of public interest as they will contribute to public understanding of the decision to reopen a previously concluded EPA rule-making process, thus delaying the effective date of a public safety regulation designed to prevent catastrophic industrial accidents and to protect communities and emergency first responders. The rule applies to approximately 12,500 facilities in the U.S. that, according to the EPA, have had on average one serious safety "incident" every other day for the past 10 years. Understanding the decision to delay implementing this safety, measure previously approved by the EPA is a matter of urgent public interest.

In the event your agency denies my request for expedited treatment, whether through your agency's affirmative denial of the request for expedited treatment or through your agency's failure to respond to the request for expedited treatment, then FOIA requires that your agency nonetheless respond to the underlying request for information within 20 business days of receipt of this letter. This request is segregable, and your agency may not withhold entire records because of one section that you believe is exempt from disclosure. Under federal law, if you choose to withhold any such parts of the records from disclosure, you must specify in a written response the factual and legal basis for withholding any part of the Records. Please contact me if I may assist in your office's response to this request. As I am making this request as a journalist and this information is of timely value, I would appreciate your communicating with me by telephone or email, rather than by mail, if you have questions regarding this request.

EPA-HQ-2017-006779	Lisa L. Lowe		5/2/2017 16:05	Requested: Contract between CSRA and EPA for CSRA to support the EPA's High Performance Computing (HPC) systems and Environmental Modeling and Visualization Laboratory (EMVL) projects. Justification: Transparency is one of the goals of EPA. CSRA promised to provide HPC services and EMVL support to EPA under the guidelines of this project. CSRA management bases it's rationale for employee compensation and terms of employment, including work environment, based on this contract. The contract trumps corporate policies. When explaining work requirements and compensation to the employees, the CSRA management says 'it's in the contract'. As an American citizen and as a tax payer, I deserve to know the deliverables promised, the rate schedules, and the negotiated terms of this contract. As a dedicated professional supporting the EPA through CSRA, I deserve to have access to this contract that now mysteriously dictates every aspect of my livelihood. I have requested this document from both my management and through the EPA contracts website, and neither have been forthcoming. Further clarification: \$58 million contract for CSRA to provide HPC services to EPA. Award was announced in February 2017, Transition was March 2017, and CSRA officially took over staff in April 2017.

I would like to receive the information in the following format: electronic. As a representative of the news media I am only required to pay for the direct cost of duplication after the first 100 pages. This information is being sought on behalf of ProPublica, an independent non-profit news organization, for dissemination to the general public. Please waive any applicable fees. Release of the information is in the public interest because it will contribute significantly to public understanding of government operations and activities, specifically the determination of potential conflicts of interest of federal employees with decision-making authority over public policy, and the resolution of these conflicts by Designated Agency Ethics Officials. As a non-profit journalistic entity, ProPublica does not have the same commercial interests of other news organizations. If my request is denied in whole or part, I ask that you justify all deletions by reference to specific exemptions of the Act. I will also expect you to release all segregable portions of otherwise exempt material. I, of course, reserve the right to appeal your decision to withhold any information or to deny a waiver of fees. As I am making this request as a journalist and this information is of timely value, I would appreciate your communicating with me by telephone, rather than by mail, if you have questions regarding this request. I also ask that this request be expedited under terms of the Freedom of Information Act. Expedited processing is allowed for requests that show a "compelling need," and ProPublica is primarily engaged in disseminating information, with an urgency to inform the public concerning federal government activity.

EPA-HQ-2017-008639	Charles Pfister		6/20/2017 18:06	This is a request under the Freedom of Information Act. I hereby request copies of the following records: We are requesting records regarding an EPA consent agreement and final order in 1988 with De'Longhi USA, the manufacturer of a consumer oil-filled space heater. See the attached article in the EPA Journal, Vol. 14, No. 4, May 1988, p. 36. The Agency determined that some of approximately 500,000 heaters distributed in the US by De'Longhi contained oil contaminated by PCBs. We are also attaching two newspaper articles about the situation, indicating that possibly the original discovery of PCBs was made by Environment Canada. I am specifically asking for copies of the following documents: 1) Technical documents regarding the extent and nature of the PCB contamination and any risk assessment. 2) A copy of the Consent Decree and Final Order. 3) All correspondence with De'Longhi about the matter. 4) All documents regarding the recall of the heaters in question if not included in #3. I understand that the documents are probably archived and effort will be needed to locate the documents. Note that we briefly spoke with Jenny McLeod in OLEM/ORCR, who indicated that there may be documents in more than one office, including her office. If the documents are voluminous, we might consider viewing the documents before requesting copies. Please let us know about this situation if appropriate. I do have a commercial interest in this request, as I represent a consumer who has filed a legal claim against the manufacturer of the oil filled heater due to a fatal fire, and this consumer may have been exposed to PCBs when oil leaked out of the heater. However, there is also a public interest in this request. See the Expedited Processing Request. I am willing to pay fees for this request up to \$1,000. If you estimate that the fees will exceed this limit, please inform me before processing my request. If you have any questions regarding this request please contact me.

I would like a history of the names so that I know whom the facility belonged to in prior years, not just today. Annual snapshots of REGISTRY_ID and FAC_NAME, with the historical FAC_NAMES in each year, would do. Better yet, annual snapshots of your ECHO EXPORTER download database would be great. This is for an academic study and we would like to go back at least to 2007. Thank you.

EPA-HQ-2017-010157	Shadman Karim	ERIS	8/3/2017 18:08	Hello There, I am looking to acquire the most recently up to date RCRA info data files that is available for public through EPA. We have been using the data files from the ftp site for some time - ftp://ftp.epa.gov/rcrainfodata/rcra_flatfiles/ But the most recent updates, the files have significant errors in the fixed lengths comparing to what is mentioned in the V6 RCRA Info Flat files documentation. Without the proper explanation of the fixed lengths, it is not possible to use the .txt files available in the ftp site. (For example, "HREPORT_UNIV.txt" file has clarification till fixed length 1052 but the actual file has 1219 fixed length) I was wondering if someone from your division could provide me the files in an alternative format (e.g MS Access) where the fixed length issue can be easily solved. Please give me call at 416-510-5204 ext 43627 if you have any questions. Thanks, Shadman Karim

I am writing to request copies of any and all OGE conflict of interest waivers that may have been granted to the following individuals: Tate Bennett, Troy Lyons, Liz Bowman, and Christian Palich. According to the Office of Government Ethics, "18 U.S.C. § 208 requires that an executive branch employee be disqualified ("recused") from a "particular matter" if the matter would have a direct and predictable effect on the employee's own financial interests or on certain financial interests that are "imputed" to the employee by the statute, unless the employee first obtains an individual waiver or a regulatory exemption applies." I am requesting copies of any and all recusal letters purported to show that the following individuals recused themselves from a "particular matter" as described under statute 18 U.S.C. § 208: Tate Bennett, Troy Lyons, Liz Bowman, and Christian Palich. I am also requesting copies of the Environmental Protection Agency's recusal policy. I am requesting copies of the full calendars, starting from January 20, 2017 until the date of this request, for the following individuals: Tate Bennett, Troy Lyons, Liz Bowman, and Christian Palich. As you know, public records law provides that if portions of a document are exempt from release, the remainder must be segregated and disclosed. While I expect that you will send me all non-exempt portions of the records I have requested, I respectfully reserve the right to challenge your decision to withhold any materials. Due to the time-sensitive nature of this request, I will hold the Environmental Protection Agency to a strict 20-day deadline for an initial response and expect the agency to provide written notice of its intention to take any extension to respond.

Washington, DC 20460 Submitted online Re: Public Records Request This is a request under the Freedom of Information Act for a copy of United States Environmental Protection Agency administrator Scott Pruitt's daily calendar from July 6, 2017 to the date of this request. I am also requesting copies of all travel reports, records of travel authorizations, travel arrangements, per diems, reimbursements, sources of funds, miscellaneous expenses, travel responsibilities, modifications to tickets issued through the department's travel management center, and any other record of Pruitt's travel during the same period. I prefer to receive records in electronic format. Due to the time-sensitive nature of this request, I will hold the Environmental Protection Agency to a strict 20 business-day timeline for a response unless the agency notifies me in writing of extenuating circumstances that necessitate an extension by ten business-days. Please provide a written statement of the grounds, including specific provisions of FOIA, for denying, redacting, or withholding any records responsive to this request. EPA-HQ-2017-010328	James Duffy	Clean Air Task Force	8/8/2017 19:08	On January 11, 2017 the United States District Court for the Northern District of West Virginia ordered EPA to submit a § 321(a) evaluation of the coal industry and other entities affected by EPA rules and regulations no later than July 1, 2017. Two days before the evaluation was due the U.S. Court of Appeals for the Fourth Circuit vacated the District Court's order. Given that the Court of Appeals decision was released on June 29, 2017, merely two days before the section 321 report was due to the District Court, CATF believes that the section 321 report was in fact prepared by the Agency but never submitted to the Court or otherwise made public. CATF therefore requests: 1. Any and all reports, memoranda, or evaluations prepared in response to the District Court's Jan. 11, 2017 Order (Attach A); and 2. The underlying data supporting any report or evaluation.

EPA-HQ-2017-010892	Xuege Lu	Cornell University	8/28/2017 13:08	Pursuant to the Freedom of Information Act, 5 U.S.C. § 552, [and/or the Privacy Act, 5 U.S.C. § 552a,] I hereby request access to (or electronic copy of) all records pertaining to citizens' complaints filed to local city halls against "fracking" (with fracking as key words in their complaints) in the State of Pennsylvania, Colorado, and Texas from year 2005-2015; the records I request should come in full texts with complete information re: filing dates, names (if any), descriptions of the complaints, firms/personal targeted, geographical location (if any). I am requesting these records as a PhD student and researcher at Cornell University based in Ithaca, New York. This information will solely utilized for academic purposes. I request a waiver of fees because my interest in the records is not primarily commercial, and disclosure of the information will contribute significantly to public understanding of the operations or activities of the government, given the high exposure of fracking as an environmental and social issue largely discussed in the public. The public deserves to know and measure the sentiment of fracking as an issue and our research will better shed lights on this matter. I will expect a response within 20 working days as provided by law. If my request is denied in whole or in part, I expect a detailed justification for withholding the records. I also request any segregable portions that are not exempt to be disclosed.

I am currently gearing up to begin my dissertation in Public Administration at Valdosta State University in southern Georgia, although I actually reside in Denver. I am exploring the possibility of researching the relationship between employee motivation (engagement) to desired program outcomes. I believe that the Federal employee survey may be able to provide me a longitudinal (multiple year) look into the employee motivation macro-data. My first question is, are the results of the survey (raw data minus personal data of course) available under FOIA? Second, if the data is available, how many years of surveys do you have? Third, can the data be provided on a divisional basis? My thought is, if the data is robust enough to be statistically viable, I would like to get as many years as possible for all EPA regulatory divisions (air, water, waste). In advance, I thank you for your help and guidance and please feel free to email or call me if you need more information or have any questions. Thank you, Geoff Rabinowitz 407-488-3433

EPA-HQ-2017-010899	James Snead		8/28/2017 14:08	The United States is a party to the United Nations Framework Convention on Climate Change. The objective of this treaty is to achieve “stabilization of greenhouse gas concentrations in the atmosphere at a level that would prevent dangerous anthropogenic interference with the climate system.” The objective implies that numeric values establishing the maximum acceptable greenhouse gas concentrations are known. Regarding carbon dioxide, please provide any EPA documents, emails, or other records defining what atmospheric carbon dioxide concentration prevents interference with the climate system. Understanding what maximum CO2 concentration is deemed safe and comparing this to the current measured concentration enables the public to assess what needs to be done in terms of U.S. public policy and legislation.

On September 3, 2015, officials from the Environmental Protection Agency, California Air Resources Board and Volkswagen met to discuss diesel vehicle emissions. Please notify me if fees are expected to exceed \$200. If you withhold any parts of these records from disclosure, please specify in a written response which documents you have excluded. (7) Records containing the words "Oliver Schmidt" and "Volkswagen" from January 1, 2014, to the present. EPA-HQ-2016-000421	Rebecca Perlman	Stanford University	10/15/2015 13:10	To Whom it May Concern, I'm a Ph.D. candidate at Stanford University, and I'm trying to find data on which companies had registrations for a given pesticide in 1996. So for example, I'd like to be able to see which companies had registrations for pesticides containing 2,4-D in 1996 (even if that registration was subsequently cancelled). I would like this information for a little under 90 pesticides. The list of pesticides is attached. Thank you for your consideration. Sincerely, Rebecca Perlman
EPA-HQ-2016-000482	Robert K. Wright	Financial Times	10/16/2015 20:10	I wish to see any correspondence between the agency and Volkswagen over its plans to introduce to the US market for the first time for the 2009 model year diesel-engine vehicles with Lean NOx Trap (LNT) emissions-control technology. The technology was first introduced on the Jetta in 2008. I am particularly interested in any explanations EPA sought from Volkswagen over how this unique technology would work and any explanations that Volkswagen provided. VW is the only carmaker to have offered emissions control via a Lean NOx Trap on the US market. All other vehicles on the market use some form of the chemical urea to break down the emissions, in a system sometimes known as Selective Catalytic Reduction.
EPA-HQ-2016-000484	Robert K. Wright	Financial Times	10/16/2015 20:10	I wish to see the correspondence between the EPA and Volkswagen around spring 2014 where the EPA first informed Volkswagen about its concerns about emissions from its diesel-powered, four-cylinder engines and VW's reply to those concerns.
EPA-HQ-2016-000485	Robert K. Wright	Financial Times	10/16/2015 20:10	I wish to see the correspondence between the EPA and Volkswagen surrounding the EPA's decision - delivered on around July 20 2015 - to refuse certification for VW's 2016 model year diesels. I understand that the correspondence continued in various forms until September 3, 2015, when VW admitted its misconduct over emissions controls.
EPA-HQ-2016-000506	Under Agency Review		10/19/2015 13:10	I am formally requesting the inert ingredients of the following pesticides and their adjuvants: 1. EPA-HQ-2017-001866	Paul M. Whatling	FMC Corporation	12/7/2016 18:12	This is a request or files cited by EPA in its draft human health risk assessment for malathion, or for study data evaluation records that have we have submitted to EPA in support of the registration of malathion in the United States. The first attached file requests the Agency's data evaluation records for studies submitted to support the registration of malathion. The second attached file requests copies of documents that EPA has cited in its draft human health risk assessment, which has a comment period that ends on December 21, 2016. These documents are needed in order for the registrant and the public to fully understand the ecological, endangered species and human health risk assessments that the agency has posted for public comment. Since the Agency has established regulatory deadlines for commenting on these risk assessments, time is of the essence for the EPA to comply with our request to provide the requested documents. Based on this, we request a fee waiver. And, we request expedited processing because of the urgency to inform stakeholders and the public about the reasons for the conclusions of the EPA's draft human health risk assessment. This is especially important given that malathion is an important tool used to control mosquitoes that spread diseases like the zika virus.

EPA-HQ-2015-007071	Richard J. Lazarus	Harvard Law School	5/13/2015 19:05	A copy of this description is also included in an attached formal letter: The purpose of this sletter is to make a formal request pursuant to the federal Freedom of Information Act for documents, both hard copies and electronic in form (including emails) pertaining to the decision of the U.S. Environmental Protection Agency in 2003 that greenhouse gases were not pollutants within the meaning of the federal Clean Air Act. More specifically, I am interested in documents relevant to the Agency's decision making between January 1, 2001, and August 28, 2003, when EPA formally denied a petition seeking regulation of greenhouse gas emissions from new motor vehicles under the Clean Air Act, extending to the Agency's defense of that decision before the U.S. Court of Appeals for the D.C. Circuit and the U.S. Supreme Court. I am seeking access to these documents in support of my research on the history of a Supreme Court case, Massachusetts v. EPA, decided by the Court in April 2007. For this same reason, I would like to request a fee waiver for the associated costs. The exclusive purpose of my research is in support of an academic publication, most likely a book for a general audience, that I believe will be of significant interest and value to the public. The Massachusetts case is one of the most significant environmental law decisions handed down by the U.S. Supreme Court. And my aim is to tell the story of that case in a manner that highlights for the public the challenges of both environmental lawmaking and Supreme Court advocacy. I have published significant scholarship on similar topics. See http://www.law.harvard.edu/faculty/rlazarus/index.html , Please also know that I would be pleased to speak with anyone in your office or any relevant office at EPA about possible ways to make the processing of my request easier and more convenient for those involved. I can certainly travel to DC to review documents in person if that would be helpful and expedite matters.

It also is intended to request any responsive documents that are otherwise in the possession or control of any EPA officials, employees, consultants, or agents. This request is time sensitive. For that reason, please produce responsive, non-privileged documents as soon as they are available rather than waiting until all the responsive documents have been collected. I have included a copying charge limit of \$3,000 but that is not a firm cap. EPA-HQ-2016-002375	Anne Passino	Southern Environmental Law Center	12/28/2015 20:12	PLEASE SEE ATTACHED LETTER FOR FULL DESCRIPTION. 1. All communications from January 2010 to the present between the U.S. Environmental Protection Agency ("EPA") and the Tennessee Department of Environment and Conservation ("TDEC") relating to the Tennessee Valley Authority ("TVA") - Kingston Fossil Plant Solid Waste Disposal Facility, Class II Landfill, Tennessee Permit No. IDL730000211 (the "Peninsula Landfill") and/or any specific cell or phase of the Peninsula Landfill, including Phase 1A, Phase 1B or Phase 2. 2. All communications from January 2010 to the present between EPA and TVA relating to the Peninsula Landfill and/or any specific cell or phase of the Peninsula Landfill, including Phase 1A, Phase 1B or Phase 2. 3. All documents discussing the meaning or interpretation of the following terms used in EPA's rule governing the Disposal of Coal Combustion Residuals from Electric Utilities ("CCR Rule"): new landfill, existing landfill, and lateral expansion. 4. All documents discussing whether the Peninsula Landfill and/or any specific cell or phase of the Peninsula Landfill, including Phase 1A, Phase 1B or Phase 2 is understood by EPA, TDEC and/or TVA to be a "new" or "existing" landfill under the CCR Rule and/or whether any phase of the Kingston Landfill is understood to be a lateral expansion of an existing landfill. Due to the massive coal ash spill at the Tennessee Valley Authority - Kingston Fossil Plant ("Kingston Plant") on December 22, 2008, we recognize that EPA likely possesses a substantial number of records generally relating to the Kingston Plant and coal ash. To be clear, we are not seeking records related to that spill and its subsequent clean-up. Rather, we are only requesting records related to the Peninsula Landfill and any specific cell or phase of the Peninsula Landfill, including Phase 1A, Phase 1B or Phase 2, which obtained a state solid waste permit in 2007 and a major modification in 2015.

EPA-HQ-2016-002780	Sebastian Blanco	AutoblogGreen	1/14/2016 17:01	I previously requested communication documents between the EPA and VW from August and September 2015, as that was when I thought the EPA became aware of VW's "defeat device." I would still like those documents, but the lawsuit filed by the DOJ this month show that the EPA was first aware of questions about VW's diesel emissions in late 2014. Therefore, I would also like to request any communications between the EPA and VW that took place in May and June 2014 regarding questions about the automaker's diesel emissions. It appears from the lawsuit that the vehicles that initially caused questions to be raised were a 2012 Jetta and a 2013 Passat that were being tested by the Center for Alternative Fuels, Engines & Emissions at West Virginia University and the California Air Resources Board. These two organizations came to the EPA with their findings and the EPA went to VW. Therefore, I am also requesting the initial communications from WVA and CARB to the EPA regarding questions about VW's diesel emissions. These should also have taken place in May 2014. This request is being made pursuant to the Freedom of Information Act (5 U.S.C. § 552) for articles that will be made available to the public via my website AutoblogGreen as well as potentially other means. Both physical and digital copies of the requested files will be accepted.

EPA-HQ-2016-006506	bridget dicosmo		5/10/2016 15:05	I am requesting copies of correspondence received by EPA that two environmental groups (Surfrider and the Natural Resources Defense Council) and the White House Office of Management & Budget (OMB) sent to Sen. James Inhofe (R-OK), chairman of the Senate Environment & Public Works Committee, in response to his Feb. 26 letter asking the two groups and OMB questions about a Government Accountability Office finding on promotion of EPA's Clean Water Act jurisdiction rule. Although the two groups and OMB sent the letters to Inhofe, it is my understanding that EPA received courtesy copies of the responses filed by the two groups and OMB. EPA's press office has refused for weeks to answer questions about those letters, leaving as my only option a FOIA request to obtain those courtesy copies sent to EPA. These are NOT deliberative documents as they have nothing to do with the crafting of the rule itself.

EPA-HQ-2016-009485	Kevin Bogardus	E&E News	8/17/2016 17:08	I request copies of any and all emails concerning official EPA business that were sent to or from EPA Administrator Gina McCarthy's personal email account(s) from July 18, 2013 to the present day. Other senior administration officials, such as former Secretary of State Hillary Clinton and Defense Secretary Ash Carter, have been found to have used a personal email account for government business. Both of those instances not only ran counter to their departments' policies but could have led to the potential exposure of classified information. In response to worries over their use of personal email for government business ¬– and also litigation in former Secretary Clinton's case ¬– both former Secretary Clinton and Secretary Carter released thousands of pages of their personal emails that were used for government business. Further, a recent court ruling found that agency officials should expect that work-related emails in their personal email accounts are subject to the Freedom of Information Act. In Competitive Enterprise Institute vs. Office of Science and Technology Policy, D.C. Circuit Senior Judge David Sentelle wrote in the U.S. Court of Appeals for the District of Columbia Circuit's opinion that "an agency cannot shield its records from search or disclosure under FOIA by the expedient of storing them in a private email account controlled by the agency head." Administrator McCarthy should follow the example of other administration officials as well as court precedent and release all of her personal emails that were used for EPA business.

EPA-HQ-2017-001307	Gregory Alcorn		11/16/2016 14:11	Pursuant to the Freedom of Information Act, I am requesting access to historical pesticide registration information currently maintained by the U.S. Environmental Protection Agency (EPA). As means of background, the Federal Insecticide, Fungicide, and Rodenticide Act of 1947 (FIFRA) required companies to register pesticides with the U.S. Department of Agriculture (USDA). In 1972, the Federal Environmental Pesticide Control Act (FEPCA) transferred pesticide registration responsibilities from USDA to EPA. It is my understanding that copies of the historical pesticide registration records maintained by USDA were also transferred to EPA in 1972. I am specifically requesting information on where historical pesticide registration records are currently located, as well as access to these records. I am a private researcher, not connected to a government agency. As such, I understand that EPA may charge reasonable research fees associated with this request. I authorize up to \$500 in such fees; if the fees will exceed this amount, please contact me for additional authorization.
