The two documents are: (1) the rice pesticides drinking water estimated environmental concentration modeling (probably in a memo prepared by EFED) and (2) the human health risk assessment (probably prepared by HED) estimate the human health risk (including drinking water consumption) for this pesticide. The City of Sacramento (my client for whom I'm making this request) has needs for these documents that are timely (i.e., need within 1-2 weeks at most) due to the legally mandated schedule associated with the state's review of the registration application for the product which limits the time during which they can provide scientific input to the state. My client has logistical limitations on their ability to pay direct costs such as any EPA costs associated with a FOIA, so I must request that EPA not incur any billable costs associated with this request. Please contact me if this is a problem. I am currently gearing up to begin my dissertation in Public Administration at Valdosta State University in southern Georgia, although I actually reside In Denver. I am exploring the possibility of researching the relationship between employee motivation (engagement) to desired program outcomes. I believe that the Federal employee survey may be able to provide me a longitudinal (multiple year) look into the employee motivation macro-data. My first question is, are the results of the survey (raw data minus personal data of course) available under FOIA? Second, if the data is available, how many years of surveys do you have? Third, can the data be provided on a divisional basis? My thought is, if the data is robust enough to be statistically viable, I would like to get as many years as possible for all EPA regulatory divisions (air, water, waste). In advance, I thank you for your help and guidance and
