20.11.102.7 DEFINITIONS: In addition to the definitions in 20.11.102.7 NMAC the definitions in 20.11.1 NMAC apply unless there is a conflict between definitions, in which case the definition in this Part shall govern.

A. "Ethanol" means a colorless volatile flammable alcohol with the molecular composition of C_2H_6O .

B. "Facility or Facilities" means a place or places of business which sells or supplies for wholesale or retail purposes gasoline motor fuel, including fuel-transporting businesses.

C. "Gasoline Motor Fuels" means for purposes of this Part, any flammable liquid used primarily as fuel for the propulsion of motor vehicles, but does not include diesel engine fuel, kerosene, liquefied petroleum gas, natural gas and products specially prepared and sold for use in the turbo-prop or jet-type engines.

D. "MTBE" means methyl tertiary butyl ether.

E. "Methanol" means a light volatile flammable poisonous liquid alcohol CH_3OH formed by the destructive distillation of wood or manufactured from natural gas or coal, and used in combination with heavier co-solvent alcohols as an octane enhancer for addition to gasoline.

F. "Motor Vehicle" means any vehicle propelled by a spark ignited internal combustion engine which is designed primarily for travel on public highways and which is generally and commonly used to transport persons and property over the public highways.

G. "Oxygen Content By Weight" means a measurement of the percentage of oxygen in an oxygenated fuel.

H. "Oxygenate" means any oxygen-containing ashless, organic compound which may be used as a fuel or as a gasoline blending component and which was approved as a blending agent under the provisions of a waiver issued by the U.S. Environmental Protection Agency pursuant to the Clean Air Act, Section 211 (f) (4).

I. "Oxygenated Fuel" means a motor vehicle fuel blend, whether leaded or unleaded, consisting primarily of gasoline and a substantial amount of one or more oxygenates, generally an alcohol or ether.

J. "Oxygenated Fuels Procedures Manual or Procedures Manual" means a compilation of procedures developed by the Manager pursuant to 20.11.102.13 NMAC.

20.11.102.12 OXYGENATED FUELS: Oxygenated fuels shall be used in all gasoline powered motor vehicles as a wintertime air pollution control strategy for reduction of carbon monoxide emissions in Bernalillo County.

A. Annual Program Duration and Minimum Oxygen Content:

(1) Beginning November 1 and ending the last day of February of 1991 and every year thereafter no person shall supply or sell any gasoline motor fuel intended as a final product for fueling of motor vehicles within Bernalillo County, or sell at retail, or sell to a private or government fleet for consumption; or introduce such fuels into a motor vehicle in Bernalillo County unless the fuel contains a minimum 2.7% oxygen content by weight, except as required pursuant to 20.11.102.14 NMAC.

(2) The blending tolerance for oxygenated fuels shall be established by the Department.

(3) The Board, after considering EPA guidelines, all available information, reports, data, and testimony, shall make a determination by July of each year whether the oxygenate levels should be modified or remain the same.

(4) Oxygenates approved for use in this program shall be blended per unit volume of gasoline motor fuel, and blended up to a 10 per cent by volume for ethanol, and up to 15 per cent by volume MTBE or at the volume for any other gasoline motor fuel additive which has been issued a waiver by the EPA pursuant to the Clean Air Act, Section 211 (f) (4).

(5) No gasoline motor fuel blended with methanol and intended as a final product for fueling of motor vehicles shall be sold at retail within Bernalillo County.

B. Labeling and Notice to the Public:

(1) All oxygenated motor fuel sold shall be labeled at each dispensing pump identifying the type of oxygenate, in accordance with labeling criteria developed by the Department. Each gasoline pump stand at retail dispensing facilities must have a label stating, "The gasoline dispensed from this pump is oxygenated and will reduce carbon monoxide pollution from motor vehicles."

(2) All retail gasoline vending facilities shall keep readily available all pamphlets, brochures, fact sheets, and other written information provided to them by the Department for information and dissemination to the public.

(3) The Department shall develop a public education plan to inform the public of the commencement of the program, encourage compliance, and answer questions during the duration of the program. The Board may review the plan and provide guidance and advice to the Department on its implementation.

C. Enforcement:

(1) To determine compliance with this regulation, the Department shall develop sampling frequency and testing criteria for gasoline motor fuel. The Department, upon presentation of proper identification shall be allowed to enter a facility during reasonable times. The Department may collect those samples deemed appropriate after paying for or offering to pay for these samples at any facility.

(2) The Department may enter into any agreement as appropriate with any agency of the State, or other local government entities, to assist in the monitoring, compliance, and enforcement of 20.11.102 NMAC and the Procedures Manual.

(3) Any person selling or supplying, or offering to sell or supply gasoline motor fuels not meeting the provisions of 20.11.102 NMAC shall be subject to penalties and other civil, criminal, and equitable actions authorized by the Air Quality Control Act, NMSA 1978, 74-2-1 et seq.

D. Suspension of Program Due to Oxygenate Shortage: Should extreme and unusual circumstances occur in the marketplace preventing the blending of oxygenates at the levels designated by this Part, the Manager may take the necessary steps as a temporary emergency measure to relax or suspend this Part. The Manager shall inform the members of the Board of such action taken within seven days of this occurrence. At its next regular meeting, or at a special meeting if so called, the Board shall review the Manager's action.

E. Program Review: By the regular meeting of the Board in July of each program year, the Department shall provide a report to the Board reviewing the results of the program, which shall include an analysis of costs and benefits to the consumer, investigations of complaints, compliance and quality assurance activities, and other findings and recommendations.

20.11.102.13 OXYGENATED FUELS PROCEDURES MANUAL:

A. The Manager shall develop an official document entitled Oxygenated Fuels Procedures Manual outlining in sufficient detail the procedures necessary for complying with this Part. Upon approval by the Board, the Vehicle Pollution Management Division Manager shall publish the official Oxygenated Fuels Procedures Manual and within ten days of publication provide general notice of its availability.

B. The Procedures, details, and specifications contained in the Oxygenated Fuels Procedures Manual are a part of and are incorporated into this Part and are binding upon each person governed by this Part.

C. The Procedures Manual shall be reviewed and amended as required, and kept updated by the Manager. Notice of manual amendments, shall be provided by the Manager with copies made available to the users. It is the responsibility of the user to obtain and incorporate amendments as made available by the Manager.

20.11.102.14 CONTINGENCY MEASURES: In the event that Bernalillo County experiences a violation of the National Ambient Air Quality Standard for carbon monoxide after July 1, 1995, the following additional carbon monoxide control measures will take effect:

A. The minimum oxygen content by weight of 2.7% required in Paragraph (1), of Subsection A of 20.11.102.12 NMAC, will be increased to 3.0% for ethanol beginning November 1 of the following winter pollution season and continuing through the last day of February and resuming every winter pollution season (November through February) thereafter.

B. In addition to the blending requirements referenced in Paragraph (4), of Subsection A of 20.11.102.12 NMAC, oxygenated fuel shall be blended prior to removal by tank truck from primary supply points (refineries and terminals).
