01-FOI-00262-12	Hall, John	Hall & Associates	records associated with EPA Region I's Draft NPDES Permits for Exeter, NH, NPDES Permit No. NH0100871; Newmarket, NH, NPDES Permit No. NH0100196; and Dover, NH, NPDES Permit No. NH0101311. 01-FOI-00263-12	Hall, John	Hall & Associates	records associated with EPA Region I's Draft NPDES Permits for Exeter, NH, NPDES Permit No. NH0100871; Newmarket, NH, NPDES Permit No. NH0100196; and Dover, NH, NPDES Permit No. NH0101311. More specifically, all information from the Great Bay Estuary that shows that the statement 'the best available information shows that transparency in Great Bay and Lower Piscataqua River did not change materially from 1990 to 2005; therefore this parameter could not be the factor causing eelgrass declines found in the system prior to that time as assumed in the draft 2009 numeric criteria', is incorrect.	9/26/2012
01-FOI-00266-12	Hall, John	Hall & Associates	records associated with EPA Region I's Draft NPDES Permits for Exeter, NH, NPDES Permit No. NH0100871; Newmarket, NH, NPDES Permit No. NH0100196; and Dover, NH, NPDES Permit No. NH0101311. More specifically, all information from the Great Bay Estuary that shows that the statement 'transparency in the major tidal rivers (Squamscott, Lamprey, Upper Piscataqua) is poor, but the available data shows that: (1) the effect of algal growth on transparency is generally negligible [and] (2) CDOM and turbidity are the key factors controlling transparency in this area of the system', is incorrect.	9/26/2012

More specifically, all information from the Great Bay Estuary that shows that the statement 'since 2005, there has been "no site-specific research" conducted that was designed to "evaluate the cause of recent eelgrass declines anywhere in the Great Bay system. To date, the causes of such eelgrass declines remain unknown', is incorrect.	9/26/2012

More specifically, all information from the Great Bay Estuary that shows that the statement 'the various DES analyses [submitted to EPA] that confirmed (1) TN increases did not cause changes in transparency, algal levels or DO and (2) a "cause and effect" relationship between TN and transparency/DO did not exist, were excluded from the technical information presented in the 2009 numeric nutrient criteria document and, therefore, were never presented to EPA's internal peer review panel', is incorrect.	9/26/2012
01-FOI-00269-12	Hall, John	Hall & Associates	records associated with EPA Region I's Draft NPDES Permits for Exeter, NH, NPDES Permit No. NH0100871; Newmarket, NH, NPDES Permit No. NH0100196; and Dover, NH, NPDES Permit No. NH0101311. More specifically, all information from the Great Bay Estuary that shows that the statement 'dissolved nutrient concentrations (2009-2011) have returned to pre-1995 levels when eelgrass thrived in Great Bay. There is no information from the Great Bay Estuary showing this level of TIN will impair the eelgrass population', is incorrect.	9/26/2012
